A Changing Role. New material has been added throughout the textbook on the following topics: characteristics of an effective coach, mentoring work values, unions, dealing with change, supervisory styles, empowerment, SARA, identifying stakeholders, dealing with Limited English Proficient individuals, intercultural communication and equity theory. The case studies and references have been thoroughly updated and expanded. Each chapter opens with a case study to illustrate the concept and includes key terms. Contains a new chapter on homeland security and terrorism and how they are changing the role of the police supervisor. Used nationwide for police promotional exams.

EFFECTIVE POLICE MANAGEMENT Harry W. More, Terry L. More, 2012-09-01. The law enforcement profession is well aware of the need for performance based management. Results are what count and programs are increasingly required to demonstrate that activities and programs are viable and worthy of budgetary support. This emphasizes the necessity of ensuring that the managerial processes foster accountability. To ensure success it is essential that organizational leaders encourage and constantly supervise this management process. Performance improvement occurs when there is an ongoing process that creates strategic performance objectives such as measures performance collects and analyses which result in the reporting of performance data that can focus on improvement. The key chapter in the text is entitled Accountability for Performance inasmuch as it circumscribes the remainder of the concepts discussed and reviews the necessity of creating an accountability environment fostered by positive communications. The pivotal aspects of accountability are discussed and each of the five levels reviewed. Chapters deal with a range of potential evaluation tools to include logic models, crime mapping, program evaluation techniques and problem solving. Considerable attention is given to performance measurement, the different types of measurement and commonly used measures in law enforcement. There is also a brief discussion of CompStat and its four principles with special emphasis on relentless follow up and assessment. In addition, attention is given to the utilization of performance information and the research measurements that create process improvements. Within the proactive problem solving process, the reader will find basic questions for the scanning process.
