**Eileen Gray and the Design of Sapphic Modernity** Jasmine Rault, 2017-07-05 The first book length feminist analysis of Eileen Gray's work. Eileen Gray and the Design of Sapphic Modernity: Staying In argues that Gray's unusual architecture and design, as well as its history of abuse and neglect, emerged from her involvement with cultures of sapphic modernism. Bringing together a range of theoretical and historical sources from architecture and design, communication and media to gender and sexuality studies, Jasmine Rault shows that Gray shared with many of her female contemporaries a commitment to designing spaces for sexually dissident modernity. This volume examines Gray's early lacquer work and Romaine Brooks' earliest nude paintings, Gray's first built house, E 1027, in relation to Radclyffe Hall and her novel *The Well of Loneliness*, and Gray's private house, Tempe Pailla with Djuna Barnes' *Nightwood*. While both female sexual dissidence and modernist architecture were reduced to rigid identities through mass media, women such as Gray, Brooks, Hall and Barnes resisted the clarity of such identities with opaque, non-communicative aesthetics. Rault demonstrates that by defying the modern imperative to publicity, clarity and identity, Gray helped design a sapphic modernity that cultivated the dynamism of uncertain bodies and unfixed pleasures, which depended on staying in rather than coming out.

**The Routledge Companion to Women in Architecture** Anna Sokolina, 2021-06-28 The Routledge Companion to Women in Architecture illuminates the names of pioneering women who over time continue to foster shape and build cultural, spiritual and physical environments in diverse regions around the globe. It uncovers the remarkable evolution of women's leadership, professional perspectives, craftsmanship and scholarship in architecture from the preindustrial age to the present. The book is organized chronologically in five parts, outlining the stages of women's expanding engagement, leadership and contributions to architecture through the centuries. It contains twenty-nine chapters written by thirty-three recognized scholars committed to probing broader topographies across time and place and presenting portraits of practicing architects, leaders, teachers, writers, critics and other kinds of professionals in the built environment. The intertwined research sets out debates, questions and projects around women in architecture, stimulates broader studies and discussions in emerging areas and becomes a catalyst for academic programs and future publications on the subject. The novelty of this volume is in presenting not only a collection of case studies but in broadening the discipline by advancing an incisive overview of the topic as a whole. It is an invaluable resource for architectural historians, academics, students and professionals.

Designing for Diversity Kathryn H. Anthony,2021-08-18 A powerful statement about the repercussions of discrimination and the benefits of diversity in architecture Providing hard data for trends that many perceive only vaguely and some deny altogether Designing for Diversity reveals a profession rife with gender and racial discrimination and examines the aspects of architectural practice that hinder or support the full participation of women and persons of color Drawing on interviews and surveys of hundreds of architects Kathryn H Anthony outlines some of the forms of discrimination that recur most frequently in architecture being offered added responsibility without a commensurate rise

in position salary or credit not being allowed to engage in client contact field experience or construction supervision and being confined to certain kinds of positions typically interior design for women government work for African Americans and computer aided design for Asian American architects Anthony discusses the profession's attitude toward flexible schedules part time contracts and the demands of family and identifies strategies that have helped underrepresented individuals advance in the profession especially establishing a strong relationship with a mentor She also observes a strong tendency for underrepresented architects to leave mainstream practice either establishing their own firms going into government or corporate work or abandoning the field altogether Given the traditional mismatch between diverse consumers and predominantly white male producers of the built environment plus the shifting population balance toward communities of color Anthony contends that the architectural profession staves off true diversity at its own peril *Designing for Diversity* argues convincingly that improving the climate for nontraditional architects will do much to strengthen architecture as a profession Practicing architects managers of firms and educators will learn how to create conditions more welcoming to a diversity of users as well as designers of the built environment *Women's Places* Brenda Martin, Penny Sparke, 2003-09-02
