Einstein on the Road Josef Eisinger, 2011-09-27 At the height of his fame Albert Einstein traveled throughout the world from Japan to South America and many places in between During these voyages between 1922 and 1933 he was in the habit of keeping travel diaries in which he recorded his impressions of people and events as well as his musings on everything from music and politics to quantum mechanics and psychoanalysis These fascinating records are now here published in thier entirety painting an engaging personal portrait of Einstein the man The author has created a vivid and entertaining narrative that brings Einstein's voice to the fore During Einstein's travels far and wide he meets with royalty presidents movie stars and artists Franklin and Eleanor Roosevelt Winston Churchill Charlie Chaplin Fritz Kreisler and Sinclair Lewis as well as the most eminent scientists of the time including Niels Bohr Max Planck Erwin Schr dinger and Edwin Hubble In his travel entries we read his candid impressions of the Far East during a long sea voyage to Japan 1922 where Einstein is welcomed with enormous enthusiasm and steals the show at an imperial reception He and Elsa visit and explore many Japanese cities as well as Singapore Sri Lanka Hong Kong Shanghai Barcelona Madrid and Jerusalem where Einstein cogitates on Zionism and sees it in action In 1931 the couple spends eight weeks in Pasadena where Einstein enjoys fruitful interactions with scientists at Caltech and the Mount Wilson observatory This portion of the diaries contains illuminating observations about America science and the Hollywood celebrities he encounters He returns to

Caltech two more times and enjoys two extended sojourns in another academic sanctuary Oxford University Back at home in Berlin his diary shows his deep involvement with the academic social and cultural life of the German capital and with the politics of the Weimar Republic He discusses books dinner parties plays concerts and sailing but his greatest passion apart from physics is music he is never happier than when playing chamber music preferably Mozart and he does so at every opportunity A lifelong pacifist he watches the rise of the Nazis with anxiety and when Hitler gains control in 1933 he renounces pacifism and searches for a place of refuge He finds it in Princeton New Jersey where he joins the newly created Institute for Advanced Study and becomes an American never more to roam Filled with memorable vignettes this singular book provides a window into the thoughts and opinions of the twentieth century's most celebrated scientist and allows us to share in his exhilarating experiences *Einstein's Pathway to the Special Theory of Relativity* Galina Weinstein, 2015-06-18

This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincaré sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincaré presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincaré and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincaré's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein *The Man Who Stalked Einstein* Bruce J. Hillman, Birgit Ertl-Wagner, Bernd C. Wagner, 2015-04-16

By the end of World War I Albert Einstein had become the face of the new science of theoretical physics and had made some powerful enemies One of those enemies Nobel Prize winner Philipp Lenard spent a career trying to discredit him Their story of conflict pitting Germany's most widely celebrated Jew against the Nazi scientist who was to become Hitler's chief advisor on physics had an impact far exceeding what the scientific community felt at the time Indeed their mutual antagonism affected the direction of science long after 1933 when Einstein took flight to America and changed the history of two nations The Man

Who Stalked Einstein details the tense relationship between Einstein and Lenard their ideas and actions during the eventful period between World War I and World War II
