

ОСНОВНЫЕ ТЕНДЕНЦИИ И МЕХАНИЗМЫ ПОСТИНДУСТРИАЛЬНОГО РАЗВИТИЯ ЭКОНОМИКИ

Статья посвящена изучению основных тенденций и механизмов постиндустриального развития экономики. Представлены терминологические и теоретические особенности определения постиндустриального этапа развития экономики. Сформулированы принципы функционирования и развития сетевой экономики. Описаны факторы, влияющие на развитие экономики в условиях постиндустриального общества.

Ключевые слова: развитие, сетевая экономика, постиндустриальное, информационное общество, принципы, механизм, факторы

Переход к постиндустриальной экономике существенно изменяет основные организационные механизмы обеспечения социально-экономического развития общества. Если в эпоху индустриальной революции обеспечение экономического роста основывалось на концентрации и централизации производства, то в условиях постиндустриальной экономики конкурентное преимущество достигается, в первую очередь, на основе новых информационных технологий и сетевых форм управления. Они, в свою очередь, поддерживают функционирование более гибкой и децентрализованной модели организации экономической деятельности и ведения бизнеса. При этом знания становятся не только новым экономическим ресурсом, но и структурным элементом общества. Знания отличаются от традиционных товаров тем, что их можно копировать и многократно практически использовать. Информатизация общества существенно ускоряет развитие экономики, основанной на знаниях, и все большая часть производства базируется на использовании идей, а не на материальных объектах, т.е. дематериализуется. В производстве высокотехнологичной продукции доля информационно-интеллектуальной составляющей может достигать 90% и более. По прогнозам экспертов, благодаря интенсивному развитию средств информации и широкого внедрения новых информационных технологий почти 90% населения стран, вступивших в стадию постиндустриальной экономики, будет занято в информационно-технологической сфере и только около 10% - в материально-вещественной сфере (т.е. в индустрии и в сельском хозяйстве) [6].

Таким образом, именно переход от материальных товаров к интенсивному росту доли

невещественных продуктов также является принципиальной особенностью постиндустриальной экономики. Предполагается, что в перспективе процесс развития постиндустриальной экономики уже не будет иметь технологическую, материально-энергетическую ориентацию, а перейдет на информационно-биологическую стратегию. При этом пределы роста информационной экономики пока не ясны, так как интеллектуальные ресурсы практически ни в одной стране не используются в полной мере.

Концепция Информационного Общества как постиндустриального этапа развития цивилизации начала формироваться в 1970-х годах. Первоначально основные положения этой концепции нашли свое отражение в работах Д. Белла, Е. Масуда, Э. Тоффлера, Р. Дрюкера и в дальнейшем были развиты в работах многих авторов [2, 4, 7].

Указанная концепция исходила из крупномасштабных сдвигов в структуре производительных сил общества, вызванных комплексной автоматизацией и компьютеризацией, созданием индустрии информации, коммуникационно-вычислительных сетей, национальных и международных баз данных и на этой основе повышением уровня интеллектуализации общества. Построение Информационного Общества предполагает создание и развитие новой общественно-информационной структуры, охватывающей все основные сферы социально-экономической деятельности, включая сферы производства, транспорта, сбыта, управления, обслуживания, образования, быта. Эта структура органично интегрируется в телекоммуникационные сети, через которые путем прямых кон-
