Inside the basket, there is a large orange egg, several smaller white eggs, and a small tuft of dry grass. A tiny bird is perched on the edge of the basket. The title 'El Gigante y los pájaros' is written in a stylized font across the giant's arm.

Todos los monstruos de la Tierra. Bestiarios del cine y de la literatura recopila la fantástica y prolífica fauna que habita en nuestra imaginación como espectadores y lectores que disfrutamos de diferentes tipos de sustos y miedos. Cómo orientarse para elegir o huir en medio de tanta oferta y variedad. Los bestiarios fueron catalogos malogrados que recogían las monstruosidades más destacadas de cada época histórica. Su idea sobrevive poéticamente en nuestros días como una posibilidad caleidoscópica pero no totalizadora en el estudio de los monstruos. Adriano Messias, galardonado con el prestigioso premio Jabuti 2017 por esta obra, se adentra en el concepto y la delimitación del género fantástico investigando una larga tradición en torno a los monstruos que empieza en la Antigüedad clásica para llegar a nuestros días haciendo un recorrido de lo fantástico en el cine y presentando multitud de análisis de películas estudiadas en el universo de la fantasía. El autor aborda las formas de lo monstruoso de acuerdo especialmente con la perspectiva semiótica y psicoanalítica de los símbolos culturales de la sociedad convirtiendo a los monstruos no solamente en un producto de la imaginación sino en un signo que marca los momentos críticos del proceso político y social de las culturas. Así, los cuerpos de los monstruos y su función nos revelan un alto grado de significación mostrando lo que la sociedad esconde y margina.

*Early Miocene Paleobiology in Patagonia*, Sergio F. Vizcaíno, Richard F. Kay, M. Susana Bargo, 2012-10-11. Coastal exposures of the Santa Cruz Formation in southern Patagonia have been a fertile ground for recovery of Early Miocene vertebrates for more than 100 years. This volume presents a comprehensive compilation of important mammalian groups which continue to thrive today. It includes the most recent fossil finds as well as important new interpretations based on ten years of fieldwork by the authors. A key focus is placed on the paleoclimate and paleoenvironment during the time of deposition in the Middle Miocene Climatic Optimum (MMCO) between twenty and fifteen million years ago. The authors present the first reconstruction of what climatic conditions were like and present important new evidence of the geochronological age, habits and community structures of fossil bird and mammal species. Academic researchers and graduate students in paleontology, paleobiology, paleoecology, stratigraphy, climatology and geochronology will find this a valuable source of information about this fascinating geological formation. *LBLA - La Biblia de las Américas / New American Standard Bible - Biblia Bilingüe, Tapa Dura*.
