El Libro Del Ambiente:

El ambiente de aprendizaje Catherine E. Loughlin, Joseph H. Suina, 1987 Esta obra presenta un completo panorama de ideas y estrategias para hacer frente a los comunes y numerosos problemas que plantea la disposición del ambiente escolar. Asimismo contribuye a reafirmar de un modo práctico y comprensible la importancia crítica del enseñante y el profesionalismo inherente al papel del docente. LOUGHLIN y SUINA resaltan cuatro razones en las que efectuar cambios eficaces la organización del espacio para el aprendizaje la disposición de los materiales y la organización para sitios especiales. El texto posee numerosas ilustraciones y anotaciones que proporcionan ejemplos concretos de principios ambientales en acción. Asimismo se ofrece al lector una lista especialmente útil sobre problemas frecuentes en el aula que han sido identificados por los propios profesores antes de la aplicación en la práctica docente de los principios ambientales que aquí se propugnan. Los profesores podrán estimular en los niños el empleo de destrezas comunicativas y expectativas y facilitar cualquier actividad de aprendizaje.

Valorizar el medio ambiente David Glover, International Development Research Centre (Canada), 2010 Una gran cantidad de personas en los países en desarrollo depende del medio ambiente natural para sus medios de vida sea en tierras de cultivo o bosques humedales o zonas costeras. Para estas personas el medio ambiente es mucho más que una fuente de recreación es la base de la economía. Pero carencias en el funcionamiento de los mercados derechos de propiedad incompletos y políticas equivocadas pueden llevar a las personas a seguir comportamientos que son racionales en el corto plazo o desde un punto de vista individual pero daninos para el medio ambiente y las futuras generaciones. La economía tiene mucho para ofrecer en la comprensión y en la orientación de este comportamiento. También proporciona herramientas para los tomadores de decisiones enfrentados a opciones difíciles. Como podemos comparar el valor de los beneficios ambientales con los costos de su preservación. Como podemos evaluar los impactos de la intervención ambiental o de la no intervención sobre los pobres. Como deberíamos repartir los costos de las mejoras. Este libro expone la forma como investigadores en cuatro de las redes regionales de economía ambiental del IDRC han tratado cuestiones como estas en una gran variedad de situaciones en Asia, África y América Latina. Reúne las percepciones de más de 15 años de investigaciones y evalúa sus impactos sobre las políticas públicas y sobre la comunidad científica. Concluye con una mirada hacia el futuro de la economía ambiental en el mundo en desarrollo.
