Handbook of Psychotherapy Integration John C. Norcross, Marvin R. Goldfried, 2005-02-24 The 13 years between the publication of the original edition of the handbook and this second edition have been marked by memorable growth in psychotherapy integration. The original classic was the first compilation of the early integrative approaches and was hailed by one reviewer as the bible of the integration movement. In the interim, psychotherapy integration has grown into a mature empirically supported and international movement. This second edition provides a state-of-the-art comprehensive description of psychotherapy and its clinical practices by leading proponents. In addition to updates of all of the chapters, the new edition features 1) eight new chapters covering topics such as cognitive analytic therapy, integrative psychotherapy with culturally diverse clients, cognitive behavioral analysis system and blending spirituality with psychotherapy; 2) an entirely new section with two chapters on assimilative integration; 3) updated reviews of the empirical research on integrative and eclectic treatments; 4) chapter guidelines that facilitate comparative analyses and ensure comprehensiveness; and 5) a summary outline to help readers compare the integrative approaches. Blending the best of clinical expertise, empirical research, and theoretical pluralism, the revision of this integration bible will prove invaluable to practitioners, researchers, and students alike. *Social Work with the Aged and Their Families* Roberta R. Greene, 2017-07-12 In recent years, theoreticians, researchers, and practitioners have become increasingly interested in older adults and the aging process. This volume draws on related disciplines to better understand the biological, psychological, and social aspects of aging. *Social Work with the Aged and Their Families* covers areas of central interest to those coping with the needs of an aging population. Among the topics addressed are assessment of the aging, taking into account biological age, psychological age, and socio-cultural and spiritual age. Greene also considers the importance of the family system, family roles, and development, functional age, individual and family intervention, and group and community interventions. The scientific and systematic study of aging is known as gerontology. Geriatric social workers are those who have applied established social work theories in an attempt to find suitable techniques for working with their elderly clients. The need for specialized services has given birth to various services and programs. For example, meals on wheels and home health care services have been designed to meet specific physical needs of older adults. However, mental health services have lagged far behind as practitioners struggled to adapt such specialties as family therapy to families of later years. A major contribution of this book, now in its third edition, is the functional age model of intergenerational treatment, FAM, which is an outgrowth of that demand. The functional age model of intergenerational treatment is an integrative theoretical framework for social workers interested in clinical social work practice with older adults and their families. Since its initial construction in 1986, the model has been augmented by more recent concepts related to successful aging, spirituality, and resiliency. These additions, together with the original assessment and intervention strategies, present the major converging conceptual trends that constitute a model for twenty-first century social work practice in the field of aging. **Narrative Social Work Practice** Roberta Greene, Nancy Greene, Harriet Cohen, Taunya

Social Work, Constructivist Research Mary K. Rodwell, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company Under the Cover of Kindness Leslie Margolin, 1997 In Under the Cover of Kindness Leslie Margolin looks at how this country's social welfare system developed and with what results From his detailed examination of social work texts primarily case histories he argues persuasively that social work disguises its own assumptions and claims to power as a way of further legitimizing its actions By attending to these case histories Margolin shows how social work entails not only the intrusion into the previously private space of the home but also the constant justification of this intervention to both clients and workers themselves as representing charitable and disinterested help This book critically assesses how social workers invent themselves as they simultaneously invent their field of knowledge **Travels in the Trench Between Child Welfare Theory and Practice** George Thomas, 1994 Travels in the Trench Between Child Welfare Theory and Practice examines how the child welfare field's rush to establish credibility and permanence through program growth during the post World War II era gave rise to a massive but fragile conglomerate unprepared to prove its merits when challenged by an increasingly dubious public Author George Thomas proposes a broad based shift from program growth to knowledge based growth in policy management education research and information technology initiatives to revitalize performance and restore public confidence in the system Thomas's book proposes to shift the leadership emphasis away from the big business flavor of child welfare and re define it into a mediator role of trusting worker and client competencies Travels in the Trench Between Child Welfare Theory and Practice shows how the two sides merge and concentrate on five key issues Policy Contrasts the impact of the two orientations on shaping the field's sense of mission defining its role establishing its priorities

for growth relative to size specialization and knowledge base and stimulating or reducing client adversarialism and public perceptions of chronic mission failure Management Examines how the priorities of the two orientations differ relative to preserving hierarchical authority rewarding work that exceeds mandates promoting innovation and experimentation and relying on process as distinct from client outcome accountability Education Examines how the priorities of the two orientations differ relative to relying on manpower and brain power on one right way of doing things versus doing what is legal and ethical Research Examines how the priorities of the two orientations differ relative to confirming the rightness of the field s existing knowledge base and testing it to expand its scientifically validated portion through discovery Information Technology Explores how the priorities of the two orientations differ relative to disclosing and preserving privileged communications developing common and specialized language and breaking down or protecting authority and status differentials This historical and cross sectional analysis forms a framework proposing that the field s future value in meeting the nation s child welfare needs must have a willingness to shift its commitments from problem to competency oriented theory and practice to accept a de emphasis on growth and a reduction in specialization and to redirect investments in education research and information technology According to Thomas this enables readers to revitalize practice wisdom grow the scientifically validated portion of the field s knowledge base and begin to restore public confidence in the system The book s contents are presented in interview style to enliven the material and make it more accessible to a wide audience The reader determines the sense and direction of the analysis and the appropriateness of the questions from which it flows Travels in the Trenches is intended to promote critical analysis of the link between long range vision and its impact on daily practice
