Egbert Havinga Enjoying Organic Chemistry 1927 1987:

Enjoying Organic Chemistry, 1927-1987 Egbert Havinga, 1991-01-01 One noted scientist explained his refusal to contribute a volume by saying in part that it is extraordinarily difficult to write in good taste about oneself Only if one can manage a humorous and light touch does it come off well Naturally I would like to place my work in what I consider its true scientific perspective but Each autobiography reflects the author's science his lifestyle and the style of his research Naturally the volumes are not uniform although each author attempted to follow the guidelines To write in good taste was not an objective of the series On the contrary the authors were specifically requested not to write a review article of their field but to detail their own research accomplishments To the extent that this instruction was followed and the result is not in good taste then these are criticisms that I as editor must bear not the writer As in any project I have a few regrets It is truly sad that Egbert Havinga who wrote this volume and David Ginsburg who translated another died during the development of this project There have been many rewards some of which are documented in my personal account of this project entitled **Extracting the Essence Adventures of an Editor** published in **CHEMTECH BOOK JACKET**

Enjoying Organic Chemistry, 1927-1987 Egbert Havinga, 1991 The selection criteria were numerous Each individual had to have made seminal contributions to organic chemistry over a multidecade career The average age of the authors is over 70 Profiles would represent scientists born and professionally productive in different countries Chemistry in 13 countries is detailed Taken together these individuals were to have conducted research in nearly all sub specialties of organic chemistry Invitations to contribute were based on solicited advice and on recommendations of chemists from five continents including nearly all of the contributors The final assemblage was selected entirely and exclusively by me Not all who were invited chose to participate and not all who should have been invited could be asked A very detailed four page document was sent to the contributors in which they were informed that the objectives of the series were 1 to delineate the overall scientific development of organic chemistry during the past 30 40 years a period during which this field has dramatically changed and matured 2 to describe the development of specific areas of organic chemistry to highlight the crucial discoveries and to examine the impact they have had on the continuing development in the field 3 to focus attention on the research of some of the seminal contributors to organic chemistry to indicate how their research programs progressed over a 20 40 year period and 4 to provide a documented source for individuals interested in the hows and whys of the development of modern organic chemistry
