Germany from the Outside Laurie Ruth Johnson, 2022-09-08 The nation state is a European invention of the 18th and 19th centuries In the case of the German nation in particular this invention was tied closely to the idea of a homogeneous German culture with a strong normative function As a consequence histories of German culture and literature often are told from the inside as the unfolding of a canon of works representing certain core values with which every person who considers him or herself German necessarily must identify But what happens if we describe German culture and its history from the outside

And as something heterogeneous shaped by multiple and diverse sources many of which are not obviously connected to things traditionally considered German Emphasizing current issues of migration displacement systemic injustice and belonging Germany from the Outside explores new opportunities for understanding and shaping community at a time when many are questioning the ability of cultural practices to effect structural change Located at the nexus of cultural political historiographical and philosophical discourses the essays in this volume inform discussions about next directions for German Studies and for the Humanities in a fraught era

*Der Pharmazie*, 1847 **Kafka and the Universal** Arthur Cools, Vivian Liska, 2016-07-25 Kafka's work has been attributed a  
 universal significance and is often regarded as the ultimate witness of the human condition in the twentieth century Yet his  
 work is also considered paradigmatic for the expression of the singular that cannot be subsumed under any generalization  
 This paradox engenders questions not only concerning the meaning of the universal as it manifests itself in and is  
 transformed by Kafka's writings but also about the expression of the singular in literary fiction as it challenges the opposition  
 between the universal and the singular The contributions in this volume approach these questions from a variety of  
 perspectives They are structured according to the following issues ambiguity as a tool of deconstructing the pre-established

philosophical meanings of the universal the concept of the law as a major symbol for the universal meaning of Kafka's writings the presence of animals in Kafka's texts the modernist mode of writing as challenge of philosophical concepts of the universal and the meaning and relevance of the universal in contemporary Kafka reception This volume examines central aspects of the interplay between philosophy and literature Representative Short Story Cycles of the Twentieth Century Forrest L.
