Einsteins Greatest Mistake Abandonment Of The Aether:

Einstein's Greatest Mistake Sid Deutsch,2006-02 If a child wants proof we can think of 10 different ways to show that we are surrounded by air but we are of course normally unaware that we live at the bottom of an ocean of air It is claimed in this book that we are unaware similarly that we are surrounded by an atmosphere of aether There is one major difference however We have not been able to detect the aether Nevertheless the aether provides a solution to the following mystery How can light or any electromagnetic wave travel for billions of years across the vastness of the Universe without losing any energy The answer is that the Universe is filled with a light transmitting medium The Aether The proof that there is an aether is the subject of the present book **Critics and alternative theories** Nikolay Chavarga, The word dissident is used in a broad sense It includes scientists proposing not fully accepted ideas within the Relativity Quantum Mechanics paradigm as well as opponents to some aspects of these theories *The Worldwide List of Alternative Theories and Critics* Jean de Climont,2020-11-01 This Worldwide List of Alternative Theories and Critics only available in english language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diploma engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont **THE ALTERNATIVE THEORIES Scientific American** ,2005 **The Aether-Cosmic Computer Structure and Function** Alf Sourial,2021-05-04 The author has worked on the thesis of the Material Aether since 1981 The author is a retired surgeon and an amateur physicist physics is his hobby A free thinker putting up a sincere effort to find the truth both in its totality as well as its minutest possible detail a tall order This book is expected to supplement and or modify most updates in physics establish the existence of the aether identify the aether as the Cosmic Computer suggest and propose the aether Cosmic Computer structure make an educated guess at the modus operandi of its function and its expected future behavior using illustrations and logistic intuition Through patience diligence perseverance in my old age and mere luck it has exceeded my expectations In assessing the blame if any for not recognizing the Aether as the cosmic computer CC the Author puts much more blame on the current Scientific Community as a whole than on Einstein in particular Let us remember that Computers were not known throughout Einstein's life They were first introduced during his last few years By contrast the current Scientific Community as a whole has lived for the past 70 years with computers It is about time they consider a few dozen serious propositions at the core of physics which may end up being accepted by default within the next ten to twenty years Etnosains dan Etnomatematik Alam Melayu (Penerbit UM) Mat Rofa Ismail, Apakah sumbangan orang Melayu dalam sains dan matematik Persoalan ini dibincangkan di bawah istilah etnosains dan etnomatematik seperti yang diterokai oleh gabungan pengarang dalam buku ini Sumbangan

etnosains dan etnomatematik di Alam Melayu berakar umbi bersama sejarah dan budaya yang membentuk acuan ilmu yang penuh dengan sistem nilai tempatan dan serantau Apabila rantau Melayu terjajah oleh kolonialisme Barat maka penulisan sejarah telah berubah paradigma daripada rantau yang mempunyai tamadun yang agung kepada rantau jajahan yang menjulang tinggi budaya Barat yang memisahkan ilmu daripada nilai Ilmu tradisi umat Melayu terpinggir dalam penulisan acuan kolonialisme kerana secara beransur ansur penjajahan bukan sahaja berlaku terhadap fizikal dan geografi tetapi juga sejarah pemikiran dan minda Ilmu yang berteraskan sains dan matematik yang lahir daripada budaya Melayu Islam seperti mantik penghujahan pemikiran kefalsafahan perdebatan sufisme pelayaran seni perubatan pengiraan takwim kalendar dan musim seni bina retorik dan ketatabahasa pancalogam persenjataan tenunan dan warisan yang lain semakin terpinggir dalam penulisan umat Melayu Pendokumentasian yang dilakukan penjajah diwarnakan oleh sistem nilai mereka di bawah paradigma kolonialisme yang lebih memetik aspek khurafat atau kelemahan berbanding pemikiran mantik yang lebih saintifik Hingga kini keagungan pemikiran etnosains dan etnomatematik Melayu masih tersorok dalam lipatan sejarah Maka menerusi tulisan beberapa tokoh ilmuwan tempatan sebahagian aspek tersebut dihuraikan dalam buku ini sebagai percubaan pentakrifan domain kajian dan diharapkan akan menjadi bidang yang penting dalam epistemologi etnografi Melayu pada masa akan datang

Unified Field Theory And Occam's Razor: Simple Solutions To Deep Questions Andras Kovacs, Giorgio Vassallo, Paul O'hara, Francesco Celani, Antonino Oscar Di Tommaso, 2022-06-20 Unified Field Theory was an expression first used by Einstein in his attempt to unify general relativity with electromagnetism Unified Field Theory and Occam s Razor attempts to provide real answers to foundational questions related to this unification and should be of high interest to innovative scientists A diverse group of contributing authors approach an old problem with an open mindedness that presents a new and fresh perspective The following topics are discussed in detail in the hope of a fruitful dialogue with all who are interested in this subject This highly original book brings together theoretical researchers and experimentalists specialized in the areas of mathematics and epistemology theoretical and experimental physics engineering and technology For years they have worked independently on topics related to the foundations and unity of physics and have had numerous overlapping ideas in terms of using Clifford algebra and spinors Within the book new technology applications are outlined and theoretical results are complemented by interpretations of experimental data

up to Einstein's time but Einstein abandoned the idea of an aether after the famous Michelson-Morley experiment. The event was expected by American scientists within the next 20 years. Historic and planetary evidence for this periodic catastrophe is considered in detail.
