The most valuable asset of the Reich. 1. 1920 - 1932 Alfred C. Mierzejewski,1999 Most Valuable Asset of the Reich A History of the German National Railway Volume 1 1920 1932 *The Most Valuable Asset of the Reich* Alfred C. Mierzejewski,2014-03-30 The largest enterprise in the capitalist world between 1920 and 1932 the Deutsche Reichsbahn German National Railway was at the center of events in a period of great turmoil in Germany In the first detailed history of this important organization Alfred Mierzejewski presents a sophisticated analysis of the Reichsbahn s operations finances and political and social roles In addition he uses the story of the Reichsbahn to gain new perspectives on modern German economic and political history Mierzejewski describes and analyzes the beginnings of the national railway in Germany and the problems that it faced He examines the Reichsbahn s noncapitalistic commonweal approach to economic management and shows how the railway was used to hold Germany together especially in the face of Bavarian particularism Mierzejewski s account also provides unparalleled insight into Germany s reparations policies demonstrating that Germany was fully capable of paying the Dawes annuities and that the government s claims that reparations paid by the Reichsbahn hurt both the railway and Germany were groundless A second volume will cover the period from 1933 to 1945 **Berlin, 750 Years** Margrit Beran Krewson,1986 *The Lost Termini of Berlin* Ilja Nieuwland,2024-11-04 From the birth of Berlin s railway network to the time when the bombs of the Second World War and the concrete slabs of the Wall changed the city forever the Prussian and later German capital counted eight major railway stations These were beacons in the city impressive monuments magnificently built for the bygone rituals of arrival and departure yet tightly woven into a distinct part of town Railway stations are magical meaningful places allowing for escape as well as promise nostalgia as well as novelty They process all sorts of people from well to do business types to unfortunates forced to live on the fringes of society There is a nervous energy around them created by those looking forward to their journey others trying to get oriented in a place that is new to them and some facing the drudgery of yet another commute And if pre World War 2 Berlin was anything it was energetic Building an adequate transport infrastructure for Europe s fastest growing city proved to be a continuous challenge that required flexibility and adaptation and touched the city in ways that can still be seen today This is the history of Berlin s railway stations the people that used them and the way the city was shaped by them *The Most Valuable Asset of the Reich: 1920-1932* Alfred C.
