Mathematics Lovers Sweet Revenge, 2017-09-25 Mathematics is a universal language that not only humans use it but is also used by chemical elements and molecules that follow mathematical models many physical phenomena are develop conform to mathematical principles such as the winds and waves of the sea geomorphology plant morphology animal anatomy and movements of the stars planets satellites and comets follow mathematical principles. The man did not invent the mathematics because this one is much older than him but he learned to interpret it and to use it to its own benefit. Nowadays computers are used to perform the most complex calculations. However until about 50 years ago mathematicians did their calculations by hand using pencil and paper. To learn math it is necessary to do calculations by hand and mental. Therefore this gridbook is a stimulus for you to make calculations by hand in the style of the old mathematicians like Pythagoras Archimedes Newton or Einstein. It does not matter if you only calculate sums and subtractions or multiply and divide or you go further and solve quadratic equations derivations integrals. One of the most important and useful things that everyone should learn is to CALCULATE. La Matemática es un idioma universal que no solo los humanos lo utilizan sino que también es utilizada por los elementos y moléculas que siguen modelos matemáticos. Muchos fenómenos físicos se ajustan a principios matemáticos tales como los vientos y las olas del mar la geomorfología vegetal la anatomía animal y los movimientos de los astros planetas satélites y cometas siguen principios matemáticos. El hombre no inventó la matemática porque esta es mucho más antigua que él pero aprendió a interpretarla y a utilizarla en beneficio propio. Hoy en día se utilizan computadoras para realizar los cálculos más complejos. Sin embargo hasta hace unos 50 años los matemáticos hacían

sus cálculos a mano con lápiz y papel Para aprender matemáticas es necesario hacer cálculos a mano y mentales Por eso este cuaderno es un estímulo para que realices cálculos a mano a la usanza de los antiguos matemáticos como Pitágoras Arquímedes Newton o Einstein No importa si solo calculas sumas y restas o multiplicas y divides o vas más allá y resuelves ecuaciones cuadráticas derivaciones integrales Una de las cosas más importantes y útiles que todo el mundo debe aprender es
