Ethnic Medicine in the Southwest Eleanor Bauwens, Margarita Artschwager Kay, Mary Elizabeth Shutler, Loudell F. Snow, 2016-10-18 Four studies examine the use of

popular and folk health remedies in different Southwestern ethnic communities **Maternal Transition** Candace Johnson, 2014-07-11 What are the political dimensions that are revealed in women's preferences for health care during pregnancy and childbirth? The answers to this question vary from one community to the next and often from woman to the next although the trends in the Global North and South are strikingly different. Employing three conceptual frames: medicalization, the public-private distinction, and intersectionality, Candace Johnson examines these differences through the narratives of women in Canada, the United States, Cuba, and Honduras. In Canada and the United States, women from privileged and marginalized social groups demonstrate the differences across the North-South divide, and women in Cuba and Honduras speak to the realities of severely constrained decision making in developing countries. Each case study includes narratives drawn from in-depth interviews with women who were pregnant or who had recently had children. Johnson argues that women's expressed preferences in different contexts reveal important details about the inequality that they experience in that context, in addition to various elements of identity. Both inequality and identity are affected by the ways in which women experience the division between public and private lives: the life of the community and the life of the home and family, as well as the consequences of intersectionality, the combinations of various sources of disadvantage, and women's reactions to these, either in the form of resistance or compliance. The rigorous and highly original cross-cultural and comparative research on health, gender, poverty, and social context makes *Maternal Transition* an excellent contribution to global maternal health policy debates. Críticas, 2004 Obstetric Medicine Shital Gandhi, Dan Farine, 2022-02-07 The subspecialty of Obstetric Medicine sits in a unique intersection of the disciplines of Internal Medicine and Obstetrics. Its focus is in the skilled management of medical problems in pregnancy, from pre-pregnancy optimization to the management of acute and chronic conditions in pregnancy and in the postpartum period to ensure resolution and safe transition back to the primary care provider. This book will provide novel insights into the management of pregnant women. Clinical pearls will be emphasized, such as illustrating atypical aspects of a presenting symptom, finding, and when a subspecialty referral or transfer to a high-risk centre must occur for patient safety. This book will combine basic science principles, build on existing guidelines, and provide crucial tips on how to safely manage acute and chronic medical conditions in pregnancy. It is THE book for subspecialists in Obstetric Medicine. **Los remedios florales del Doctor Bach para las mujeres** Judy Howard, 1994 Este libro es una magnífica contribución a la terapia floral del Doctor Bach en este caso en su relación con la feminidad. En él se exploran con especial atención los aspectos emocionales que rodean las situaciones de crisis o los periodos de transición. La adolescencia, la preocupación por la figura, el embarazo y el parto, el síndrome premenstrual, la menopausia, la sexualidad, los problemas del trabajo y la pareja son algunas de las facetas de la vida de una mujer que a veces son abordadas con estados negativos de la mente produciendo episodios de angustia e infelicidad. La autora repasa uno a uno estos problemas y nos propone a partir de su dilatada experiencia como terapeuta el tratamiento con el remedio floral más adecuado. Health
