*Ideas of poverty in the Age of Enlightenment* Niall O'Flaherty, Robin Mills, 2024-04-16 This collection of essays examines the ways in which poverty was conceptualised in the social political and religious discourses of eighteenth century Europe It brings together experts with a wide range of expertise to offer pathbreaking discussions of how eighteenth century thinkers thought about the poor Because the theme of poverty played important roles in many critical issues in European history it was central to some of the key debates in Enlightenment political thought throughout the period including the controversies about sovereignty and representation public and private charity as well as questions relating to crime and punishment The book examines some of the most important contributions to these debates while also ranging beyond the canonical Enlightenment thinkers to investigate how poverty was conceptualised in the wider intellectual culture as politicians administrators and pamphlet writers grappled with the issue

*The Death Penalty's Denial of Fundamental Human Rights* John Bessler, 2022-12-15 The Death Penalty's Denial of Fundamental Human Rights details how capital punishment violates universal human rights to life to be free from torture and other forms of cruelty to be treated in a non arbitrary non discriminatory manner and to dignity In tracing the evolution of the world's understanding of torture which now absolutely prohibits physical and psychological torture the book argues that an immutable characteristic of capital punishment already outlawed in many countries and American states is that it makes use of death threats Mock executions and other credible death threats in fact have long been treated as torturous acts When crime victims are threatened with death and are helpless to prevent their deaths for example courts routinely find such threats inflict psychological torture With simulated executions and non lethal corporal punishments already prohibited as torturous acts death sentences and real executions the book contends must be classified as torturous acts too

*The Port Jews of Habsburg Trieste: Absolutist Politics and Enlightenment Culture* Lois C. Dubin, 2023-10-03 Winner of the 2000 Barbara Jelavich Prize in Habsburg Russian or Ottoman history American Association for the Advancement of Slavic Studies and finalist in the 1999 National Jewish Book Awards History category Dubin's brilliant study of the cosmopolitan entrep t of goods and peoples that was Trieste breaks new ground in our understanding of Jewish life in the Old Regime Europe It demonstrates with exacting detail the extensive privileges such port Jews enjoyed and the effect enlightened absolutism and emancipation politics exercised upon them while skillfully portraying the Jews political and cultural responses It is a classic study in modern Jewish history David Sorkin University of Wisconsin Madison Lois C Dubin has produced a solid and original monograph that explores the economic legal

political and cultural changes experienced by Trieste's Jewish community within the context of the reform policy of the Austrian enlightened absolutists and Enlightenment ideology Dubin has written an outstanding work on Trieste's Jews a very valuable study that I recommend to any reader interested in Jewish and Habsburg history as well as the Enlightenment The American Historical Review A valuable and carefully researched book Dubin's book is an important contribution not only to the study of Habsburg Jewry but also to our understanding of eighteenth century absolutism The Journal of Modern History The book is replete with keen insights into the experiences of European Jews during the initial phases of the transition from the world of corporate orders to modern class society Dubin's discussion of the dynamics of Haskalah in Trieste is a sophisticated and nuanced analysis of one of the crucial chapters in the modernization of European Jewry Journal of Urban History With this superb book Lois C Dubin has successfully and elegantly slain the two headed dragon of modern Jewish historiography nationalism and Germanocentrism She has also provided Habsburg historians with a much needed treatment of the complex interaction between state building reforming absolutism and the Jews one of several significant national minorities within the heterogeneous empire The essential economic role played by Triestine Jewry once Charles VI declared Trieste a free port in 1719 made them indispensable to the Habsburg state This indispensability itself is a critical marker in the shift between medieval and early modern Jewish history What had been a liability Jewish predominance in middle class professions particularly in trade became an asset with the rise of mercantilism and a state centralized economy Coupled with the distinctive culture of Italian Jews toleration shaped the ways in which Triestine Jews responded to Josephinian reforms the Jewish Enlightenment in Berlin challenges to Jewish marriage and divorce law educational changes and the dissolution of the ghetto all of which Dubin explores with nuance and clarity The Port Jews of Habsburg Trieste employs source material in all the essential languages German Hebrew and Italian and Dubin is equally at home analyzing Viennese and Triestine archival material and rare Hebrew periodical literature published in Vienna and Berlin Her assured use of such diverse materials is also welcome because it restores historical agency to the Jewish population which is at the center of her study The Port Jews of Habsburg Trieste will undoubtedly remain the classic treatment of this fascinating city and of Habsburg state building in one of its most important ports Nancy Sinkoff H Net Dubin has made here an important contribution that belongs in every library that addresses Judaism and the modern world German Studies Review Un travail magistral Annales Histoire Sciences Sociales Catherine the Great Simon Dixon,2015-10-23 Neither a comprehensive life and times nor a conventional biography this is an engaging and accessible exploration of rulership and monarchical authority in eighteenth century Russia Its purpose is to see how Catherine II of Russia conceived of her power and how it was represented to her subjects Simon Dixon asks essential questions about Catherine's life and reign and offers new and stimulating arguments about the Enlightenment the power of the monarch in early modern Europe and the much debated role of the great individual in history Bureaucrats, Planters, and Workers Susan Deans-Smith,2010-07-05 Honorable Mention Bolton

Memorial Prize Conference on Latin American History A government monopoly provides an excellent case study of state society relationships This is especially true of the tobacco monopoly in colonial Mexico whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth century Mexican social and economic history from issues of economic growth and the supply of agricultural credit to rural relations labor markets urban protest and urban workers class formation work discipline and late colonial political culture Drawing on exhaustive research of previously unused archival sources Susan Deans Smith examines a wide range of new questions Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it How profitable were the tobacco manufactories and how rational was their organization What impact did the reorganization of the tobacco trade have upon those people it affected most the tobacco planters and tobacco workers This research uncovers much that was not previously known about the Bourbon government s management of the tobacco monopoly and the problems and limitations it faced Deans Smith finds that there was as much continuity as change after the monopoly s establishment and that the popular response was characterized by accommodation as well as defiance and resistance She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering entrenched opposition Rather an emphasis upon political stability and short term profits prevented any innovative reforms that might have improved the monopoly s long term performance and productivity With detailed quantitative data and rare material on the urban working poor of colonial Mexico Bureaucrats Planters and Workers will be important reading for all students of social economic and labor history especially of Mexico and Latin America *From Enlightenment to Romanticism* Ian L. Donnachie, Carmen Lavin, 2003 This is the first of two anthologies designed to explore the changes and transitions in European culture between 1780 and 1830 The collection of extracts in this anthology provide primary and secondary sources on the death of the Old Regime the Napoleonic phenomenon slavery religion and reform Each selection is accompanied by a detailed introduction explaining the context and significance of the sources Extracts in the anthology stimulate questions rather than provide reassuring answers and offer vital insights to the major events movements and personalities of the time *French Revolution* The Open University, This 16 hour free course explored the main events of the French Revolution and its significance in the shift from Enlightenment to Romanticism **Saints & Sinners** Antti P. Balk, 2008 This unique look at history elaborately recounts the birth of human civilization through the vehicle of ancient Egyptian deities albeit in light of the most recent knowledge on archaeology anthropology comparative religion linguistics sociology and general history It moves quickly but seamlessly to Greece via Crete revealing the relatively young age of Continental European and by extension all Western culture science art and religion and their highly derivative nature a point subtly repeated throughout this stunningly wide ranging work A book of contrasts it constantly compares not only the Saints

and the Sinners but the East and the West be the issues dealt with political or religious in most cases the one cannot be separated from the other It does not however presume to pass judgement only to relate the events as they happened the facts as they stand even if many of them are little known ones conspicuous by their absence in standard school history books

**Decentering Discussions on Religion and State** Sargon George Donabed, Autumn Quezada-Grant, 2015-04-09 This volume explores dynamic conversations through history between individuals and communities over questions about religion and state Divided into two sections our authors begin with considerations on the separation of religion and state as well as Roger Williams concept of religious freedom Authors in the first half consider nuanced debates centered on emerging narratives with particular emphasis on Native America Early Americans and experiences in American immigration after Independence The first half of the volume examines voices in American History as they publicly engage with notions of secular ideology Discussions then shift as the volume broadens to world perspectives on religion state relations Authors consider critical questions of nation religious identity and transnational narratives The intent of this volume is to privilege new narratives about religion state relations Decentering discussions away from national narratives allows for emerging voices at the individual and community levels This volume offers readers new openings through which to understand critical but overlooked interactions between individuals and groups of people with the state over questions about religion **Policy Signals and Market Responses** Stuart John Barton, 2016-01-26 The study presents archival evidence to show how President Kaunda raised political and economic exclusivity in Zambia in the early years of Zambia s independence and how this retarded capital investment Despite formal reforms and a new government this institutional mechanism still dominates and constrains Zambia s political economy today **Liberty** Chana B. Cox, 2006-02-21 Liberty God s Gift to Humanity is a defense of liberalism the political philosophy which holds that governments should be established for the protection of individual liberty By means of revisiting the thinking of the men who created liberal theory over the past three centuries author Chana Cox has demonstrated that historically the bond between liberalism and religion has been strong and that liberals have embraced virtue encouraged social control and increased the common good *The Great Alternatives of Social Thought* Terrence E. Cook, 1991 In an engaging and erudite style this book takes the reader to the heart of western political theory Like the cardinal points of a compass the four alternatives that Cook presents aristocrat saint capitalist socialist define the distinct strategies offered to cope with scarcities underlying violent human conflicts for these core commitments dominate their contrasting economics and politics Throughout Cook evidences a detailed knowledge of many authors and themes in classical and modern political thinking Resisting the temptation to regard the problematic as ideal types from which to embellish or criticize he blends an objective presentation of each view with penetrating insights and parallels To each alternative he applies the presumptions of rule and authority especially mediated by expectations of democracy The Western Heritage Donald Kagan, 1994-07
