## **Enlightenment And Action From Descartes To Kant Passionate Thought:**

Enlightenment and Action from Descartes to Kant Michael Losonsky, 2001-08-13 Kant believed that true enlightenment is the use of reason freely in public. This book systematically traces the philosophical origins and development of the idea that the improvement of human understanding requires public activity. Michael Losonsky focuses on seventeenth century discussions of the problem of irresolution and the closely connected theme of the role of volition in human belief formation. This involves a discussion of the work of Descartes, Hobbes, Locke, Spinoza and Leibniz. Challenging the traditional views of seventeenth century philosophy and written in a lucid non technical language, this book will be eagerly sought out by historians of philosophy and students of the history of ideas.

**The World We Want : How and Why the Ideals of the Enlightenment Still Elude Us**  
Robert B. Loudon, Professor of Philosophy, University of Southern Maine, 2007-09-21. The World We Want compares the future world that Enlightenment intellectuals had hoped for with our own world at present. In what respects do the two worlds differ and why are they so different? To what extent is and isn't our world the world they wanted and to what extent do we today still want their world? Unlike previous philosophical critiques and defenses of the Enlightenment, the present study focuses extensively on the relevant historical and empirical record, first by examining carefully what kind of future Enlightenment intellectuals actually hoped for, second by tracking the different legacies of their central ideals over the past two centuries. But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities, the author also attempts to show why the ideals of the Enlightenment still elude us. What does our own experience tell us about the appropriateness of these ideals? Which Enlightenment ideals do not fit with human nature? Why is meaningful support for these ideals particularly within the US so weak at present? Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious? Which of their ideals have devolved into distorted versions of themselves when attempts have been made to realize them? How and why, after more than two centuries, have we still failed to realize the most significant Enlightenment ideals? In short, what is dead and what is living in these ideals?

*Jonathan Edwards's Philosophy of Nature* Avihu Zakai, 2010-05-20. Jonathan Edwards's *Philosophy of Nature*, *The Re-Enchantment of the World in the Age of Scientific Reasoning*, analyses the works of Jonathan Edwards (1703-1758) on natural philosophy in a series of contexts within which they may best be explored and understood. Its aim is to place Edwards's writings on natural philosophy in the broad historical, theological, and scientific context of a wide variety of religious responses to the rise of modern science in the early modern period: John Donne's reaction to the new astronomical philosophy of Copernicus, Kepler, and Galileo, as well as to Francis Bacon's new natural philosophy; Blaise Pascal's response to Descartes' mechanical philosophy; the reactions to Newtonian science; and finally Jonathan Edwards's response to the scientific culture and imagination of his time.

**Descartes' Cogito** Husain Sarkar, 2003-02-27. Perhaps the most famous proposition in the history of philosophy is

Descartes cogito I think therefore I am Husain Sarkar claims in this provocative interpretation of Descartes that the ancient tradition of reading the cogito as an argument is mistaken It should he says be read as an intuition Through this interpretative lens the author reconsiders key Cartesian topics the ideal inquirer the role of clear and distinct ideas the relation of these to the will memory the nature of intuition and deduction the nature content and elusiveness of I and the tenability of the doctrine of the creation of eternal truths Finally the book demonstrates how Descartes attempt to prove the existence of God is foiled by a new Cartesian Circle

**God, the Good, and the Spiritual Turn in Epistemology** Roberto Di Ceglie,2022-08-18 In this book Roberto Di Ceglie offers an historical theological and epistemological investigation exploring how commitments to God and or the good generate the optimum condition to achieve knowledge Di Ceglie criticizes the common belief that to attain knowledge one must always be ready to replace one s convictions with beliefs that appear to be proven He defends a more comprehensive view historically exemplified by outstanding Christian thinkers whereby believers are expected to commit themselves to God and to related beliefs no matter how convincing the evidence contradicting such beliefs appears to be He also argues that both believers and unbelievers can commit themselves to God and the good respectively thereby creating a spiritual turn in epistemology that enables them to generate the best possible condition for conducting rational enquiries and discussion

Loque,2022-03-03 This book offers a detailed analysis of John Locke s case for toleration and proposes an interpretation that shows the links between his political reasoning and his reflection on the ethics of belief Locke is concerned with toleration not only when he discusses the ends of the Commonwealth but also when he assesses the duties of private persons regarding the search for truth The purpose of this book is to shed light on both of these branches which have not been sufficiently explored in other studies on Locke With particular attention to the notions of charity obstinacy fallibility reciprocity and distinction between belief and knowledge the author proposes a reading of the Epistola de Tolerantia an extensive discussion of the controversy between Locke and Jonas Proast as well as an examination of An Essay Concerning Human Understanding in order to establish the meaning and interconnection of Locke s arguments in favour of toleration

**Regimens of the Mind** Sorana Corneanu,2022-12-22 In Regimens of the Mind Sorana Corneanu proposes a new approach to the epistemological and methodological doctrines of the leading experimental philosophers of seventeenth century England an approach that considers their often overlooked moral psychological and theological elements Corneanu focuses on the views about the pursuit of knowledge in the writings of Robert Boyle and John Locke as well as in those of several of their influences including Francis Bacon and the early Royal Society virtuosi She argues that their experimental programs of inquiry fulfill the role of regimens for curing ordering and educating the mind toward an ethical purpose an idea she tracks back to the ancient tradition of cultura animi Corneanu traces this idea through its early modern revival and illustrates how it organizes the experimental philosophers reflections on the discipline of judgment the study of nature and the study of Scripture It is through this lens the author suggests that the core features of the early modern English experimental philosophy including its defense of experience its epistemic modesty its communal nature and its pursuit of objectivity are best understood

**Philosophy of Mind in the Early Modern and Modern Ages** Rebecca Copenhaver,2018-07-06 The early modern period is arguably the most pivotal of all in the study of the mind teeming with a variety of conceptions of mind Some of these posed serious questions for assumptions about the nature of the mind many of which still depended on notions of the soul and God It is an era that witnessed the emergence of theories and arguments that continue to animate the study

Felicitas Munzel,2012-08-31 Although Kant was involved in the education debates of his time it is widely held that in his mature philosophical writings he remained silent on the subject In her groundbreaking *Kant's Conception of Pedagogy* G Felicitas Munzel finds extant in Kant's writings the so called missing critical treatise on education It appears in the *Doctrines of Method* with which he concludes each of his major works In it Kant identifies the fundamental principles for the cultivation of reason's judgment when it comes to cognition beauty nature and the exercise of morality while subject to the passions and inclinations that characterize the human experience From her analysis Munzel extrapolates principles for a cosmopolitan education that parallels the structure of Kant's republican constitution for perpetual peace With the formal principles in place the argument concludes with a query of the material principles that would fulfill the formal conditions required for an education for freedom     *The Propriety of Liberty* Duncan Kelly,2010-10-18 In this book Duncan Kelly excavates from the history of modern political thought a largely forgotten claim about liberty as a form of propriety By rethinking the intellectual and historical foundations of modern accounts of freedom he brings into focus how this major vision of liberty developed between the seventeenth and the nineteenth centuries In his framework celebrated political writers including John Locke Montesquieu Adam Smith John Stuart Mill and Thomas Hill Green pursue the claim that freedom is best understood as a form of responsible agency or propriety and they do so by reconciling key moral and philosophical claims with classical and contemporary political theory Their approach broadly assumes that only those persons who appropriately regulate their conduct can be thought of as free and responsible At the same time however they recognize that such internal forms of self propriety must be judged within the wider context of social and political life Kelly shows how the intellectual and practical demands of such a synthesis require these great writers to consider freedom as part of a broader set of arguments about the nature of personhood the potentially irrational impact of the passions and the obstinate problems of individual and political judgement By exploring these relationships *The Propriety of Liberty* not only revises the intellectual history of modern political thought but also sheds light on contemporary debates about freedom and agency     Leibniz's Metaphysics and Adoption of Substantial Forms Adrian

Nita,2015-07-01 This anthology is about the signal change in Leibniz's metaphysics with his explicit adoption of substantial forms in 1678-79. This change can either be seen as a moment of discontinuity with his metaphysics of maturity or as a moment of continuity such as a passage to the metaphysics from his last years. Between the end of his sejour at Paris November 1676 and the first part of the Hanover period Leibniz reformed his dynamics and began to use the theory of corporeal substance. This book explores a very important part of the philosophical work of the young Leibniz. Expertise from around the globe is collated here including Daniel Garber's work based on the recent publication of Leibniz's correspondence from the late 1690s examining how the theory of monads developed during these crucial years. Richard Arthur argues that the introduction of substantial forms reinterpreted as enduring primitive forces of action in each corporeal substance allows Leibniz to found the reality of the phenomena of motion in force and thus avoid reducing motion to a mere appearance. Amongst other themes covered in this book Pauline Phemister's paper investigates Leibniz's views on animals and plants highlighting changes, modifications and elaborations over time of Leibniz's views and supporting arguments and paying particular attention to his claim that the future is already contained in the seeds of living things. The editor Adrian Nita contributes a paper on the continuity or discontinuity of Leibniz's work on the question of the unity and identity of substance from the perspective of the relation with soul, anima and mind.

**Fire and Light** James MacGregor Burns,2013-10-29 The Pulitzer Prize winning historian explores history's most daring and transformational intellectual movement: the European and American Enlightenment. In this engaging, provocative history James MacGregor Burns illuminates the two hundred year conflagration of the Enlightenment when audacious questions and astonishing ideas tore across Europe and the New World. They transformed thought, overturned governments and inspired visionary political experiments. **Fire and Light** brings to life the revolutionary leaders who, armed with a new sense of human possibility, created the modern world. Burns traces the origins of a distinctive American Enlightenment to men like Benjamin Franklin, John Adams, Thomas Jefferson and James Madison and their early encounters with incendiary European ideas about liberty and equality. It was these thinker-activists who framed the United States as a grand and continuing experiment in Enlightenment principles. Today the same principles have taken on new urgency around the world in the turmoil of the Arab world, in the former Soviet Union and in China as well as in the United States itself. What should a nation be? What should citizens expect from their government? Who should lead and how can leadership be made both effective and accountable? What is happiness and what can the state contribute to it? Burns's exploration of the ideals and arguments that formed the bedrock of our modern world shines a new light on these ever-important questions. Praise for **Fire and Light** With this profound and magnificent book Burns takes us into the fire's center. Essential for deciphering the challenges of the world we will live in tomorrow. Michael Beschloss, New York Times bestselling author of *Presidential Courage* James MacGregor Burns is a national treasure and **Fire and Light** is the elegiac capstone to a career devoted to understanding the seminal ideas that made America for better and for worse what it is.
