material was scarce haphazardly scattered and mostly referring to the traditional therapies That was not helpful and was even more confusing With time I managed to amass my own systemized data based on regular observations practical cases reflections and exchanges with the colleagues This material helped me to approach each case individually while respecting the cultural environment of a patient Eventually the book was published This is the kind of book that I have always wanted to find and I had to write it eventually by myself The work contains the systematized knowledge on the evolution of scientific psychology in the Islamic world which starts with the prophetic times and continues until now The book reveals the signifiers which form a structure of a Muslim psyche It also exposes the recurrent mental health complaints of the Arab patients and investigates their unconscious roots The book is intended first of all for professionals who are directly related to the Muslim mental health care system Secondly it is for anyone who is considering undergoing a personal analysis And certainly the edition is for everyone interested in the subject This book does not intend to bring the answers It rather continues the dialogue regarding the necessity of creating the psychological counseling culture in the Muslim world
