## **Enquete Phonologique Et Varietes Regionales Du Francais:**

**Enquête phonologique et variétés régionales du français** Henriette Walter, 1982 *Varieties of Spoken French* Sylvain Detey, Jacques Durand, Bernard Laks, Chantal Lyche, 2016-07-14 This book examines the variation found in modern spoken French based on the research programme Phonology of Contemporary French Phonologie du Français Contemporain PFC Extensive data are drawn from all over the French speaking world including Algeria Canada Louisiana Mauritius and Switzerland Although the principal focus is on differences in pronunciation the authors also analyse the spoken language at all levels from sound to meaning The book is accompanied by a website hosting audio visual material for teaching purposes data and a variety of tools for working with corpora The first part of the book outlines some key concepts and approaches to the description of spoken French Chapters in Part II are devoted to the study of individual samples of spoken French from all over the world covering phonological and grammatical features as well as lexical and cultural aspects A class friendly ready to use multimedia version of these 17 chapters as well as a full transcription of each extract is provided with the sound files also available on the book's companion website Part III looks at inter and intra speaker variation it begins with chapters that provide the methodological background to the study of phonological variation using databases while in the second section authors present case studies of a number of PFC survey points including Paris the Central African Republic and Quebec Varieties of Spoken French will be an invaluable resource for researchers teachers and students of all aspects of French language and linguistics *Phonological Variation in French* Randall Gess, Chantal Lyche, Trudel Meisenburg, 2012-12-06 This volume presents a selection of French varieties representing the great diversity of this language along geographical social and stylistic dimensions Twelve illustrations from regions as far removed as Western Canada and Central Africa represent widely divergent social contexts of language use Each chapter is based on original surveys conducted within the framework of the Phonology of Contemporary French project described in the Introduction These surveys constitute an invaluable source of new data for researchers as many of the varieties included are otherwise undocumented in any systematic way The chapters follow a similar format presentation of the survey's and the sociolinguistic dimensions of the variety studied description of the phonological inventory of the system's principal allophonic realizations phonotactic constraints behavior of schwa behavior of liaison consonants and other notable characteristics The book opens with an informative introduction and closes with a chapter providing a synthesis of the major findings by continent *Redefining Regional French* David Hornsby, 2022-10-10 This study challenges the orthodox view that emergent regional varieties of French represent no more than an ephemeral dialect residue of little theoretical interest It follows the life cycle of an obsolescent urban Picard variety spoken in a mining town in the Pas de Calais and attempts to unravel the complex reasons behind the survival of some local variants at the expense of others Applying a sociolinguistic model developed by Peter Trudgill it shows how the processes of levelling and simplification have driven change in a dialect contact situation giving

rise to a new stable variety or koine This is compared with other new urban varieties in Sweden and the UK where different economic social and demographic conditions have produced very different linguistic outcomes The emergence of Regional French in the north it is argued may herald the start of a new diversification of French in Europe This book will therefore interest both students of French and of language variation more generally *New Methods in Dialectology* P. Th. van Reenen, M. E. H. Schouten, 2019-11-05 No detailed description available for *New Methods in Dialectology* *Anglicisms, Neologisms and Dynamic French* Michael D. Picone, 1996-01-01 This comprehensive study of Anglicisms in the context of accelerated neological activity in Contemporary Metropolitan French not only provides detailed documentation and description of a fascinating topic but opens up new vistas on issues of general linguistic interest the effects of technology on language the analyticity syntheticity controversy the lexical contribution to language vitality the study of compound word formation the interplay between cultural and linguistic affectivity By investigating the dynamics of borrowing within the larger framework of general neological productivity and by bringing to bear cognitive and pragmatic considerations a much needed fresh approach to the entire question of Anglicisms takes shape All pertinent phenomena regarding Anglicisms in French a topic which continues to command the attention of language commentators and defenders in France and elsewhere are explored integral borrowings semantic calques structural calques the generation of pseudo Anglicisms and hybrids graphological and phonological phenomena In each case the phenomenon is investigated in the proper context of its interaction with other pertinent neological phonological and sociocultural developments These include general changes in French compound word formation modified derivational dynamics the microsystem of pseudo Classical morphology historic phonological instabilities the pressure for more synthetic types of lexical production in relation to the needs of technology and society Rather than adhering rigidly to any single theoretical model there is an attempt to set up a dialog between differing models in order to arrive at a multidimensional view of the phenomena investigated *Social and Linguistic Change in European French* N. Armstrong, T. Pooley, 2010-07-30 An in depth examination of linguistic variation and change as a reflection of social convergence in the major French speaking countries of Europe France Belgium and Switzerland Considered in the context of linguistic levelling the book provides a detailed account of recent social and linguistic change in European French *The Fergusonian Impact* Joshua A. Fishman, 2021-06-08 No detailed description available for *The Fergusonian Impact* *Palatal Sound Change in the Romance Languages* André Zampaulo, 2019 This book presents a formal constraint based account of the main diachronic and synchronic patterns of variation in the palatal sounds of the Romance languages It will appeal to graduate students and researchers in historical linguistics phonetics and phonology Romance linguistics and dialectology more broadly **Modern Peoplehood** John Lie, 2011-04 A most impressive achievement by an extraordinarily intelligent courageous and that goes without saying well read mind The scope of this work is enormous it provides no less than a comprehensive historically grounded theory of modern peoplehood which is Lie s felicitous umbrella

term for everything that goes under the names race ethnicity and nationality Christian Joppke American Journal of Sociology

Lie's objective is to treat a series of large topics that he sees as related but that are usually treated separately the social construction of identities the origins and nature of modern nationalism the explanation of genocide and racism These multiple themes are for him aspects of something he calls modern peoplehood His mode of demonstration is to review all the alternative explanations for each phenomenon and to show why each successively is inadequate His own theses are controversial but he makes a strong case for them This book should renew debate Immanuel Wallerstein Yale University and author of The Decline of American Power The U S in a Chaotic World

Sociolinguistic Variation in Contemporary French Kate Beeching, Nigel Armstrong, Françoise Gadet, 2009-10-14 Divided into three main sections on Phonology Syntax and Semantics this new volume on variation in French aims to provide a snapshot of the state of sociolinguistic research inside and outside metropolitan France From a diatopic perspective varieties in France Belgium Switzerland Africa and Canada are considered mainly with respect to phonological features but also focusing on syntactic and lexical evolutions the relative clause in Ivorian French and discourse markers in Canadian French The acquisition of stylistic features of French figures in chapters on both first and second language learners and variation across different genres is addressed with respect to non standard non finite forms Finally a section on semantic change traces the way that interactional and other socio historical factors affect word meaning The volume will appeal to socio linguists with an interest in contemporary French as well as to advanced undergraduates and post graduate students of French and specialists in the field

**Historical Linguistics, 1987** Henning Andersen, E. F. K. Koerner, 1990 The volume contains 37 papers originally presented at the 8th International Conference on Historical Linguistics in Lille France The papers bring historical data to bear on issues in theoretical linguistics both descriptive and diachronic or deal with specific questions in the history of individual languages The theoretical issues range from phonology over morphology and syntax to the lexicon as well as questions of historical dialectology language contact the theory of linguistic change and problems of comparative reconstruction The languages discussed are Finno Ugric and Indo European most of the papers dealing with Germanic and Romance languages especially English and French but some being devoted to Greek Celtic Slavic and Hittite

Historical and Sociolinguistic Approaches to French Janice Carruthers, Mairi McLaughlin, Olivia Walsh, 2024-06-24 This volume brings together two particularly dynamic areas of contemporary research on the French language The chapters showcase the most innovative current scholarship in historical linguistics sociolinguistics and in the burgeoning field of historical sociolinguistics which lies at their intersection The research across the volume is strongly data centred drawing on a wide range of both well established and more novel theoretical and methodological approaches in order to open up new perspectives on the study of the French language in the

twenty first century Although it is written in English the work presented here is underpinned by a range of different approaches from across the Francophone and Anglophone worlds Particular emphasis is placed on combining quantitative and qualitative approaches on diversifying tools methods and objects of inquiry and on adopting comparative and multilingual perspectives where these shed new light on important questions relating to French In these ways Historical and Sociolinguistic Approaches to French highlights some of the most exciting new directions for linguistic research on the French language

**The Representation of Parisian Speech in the Cinema of the 1930s** Michaël Abecassis, 2005 This study is based on an analysis of videos and transcripts of five films *Fric frac* *Circonstances* *att nuantes* *Le Jour se lève* *La Règle du jeu* and *H tel du Nord* These films are examples of planned and artificial language The book looks at the evidential value of these data and assesses the extent to which stereotyped and scripted language can contribute to an understanding of spoken Parisian usage by looking at phonetics syntax discourse lexis and pragmatics By comparing traditional research carried out by scholars in the nineteenth century and earlier with Parisian data collected and analysed by twentieth century researchers the work attempts to identify the salient features that both script writers and actors in these films considered to be characteristic of social group differences at that time *Corpus et variation en phonologie du français* Elisabeth Delais-Roussarie, Jacques Durand, 2003

*La Phonologie du schwa français* S. Paul Verluyten, 1988-01-01 Ce livre présente quatre études sur la phonologie du schwa français Sur l'identité phonologique du schwa français dans l'accentuation et dans la syllabation par Hans Basbøl La syllabification et les règles de changement de syllabe en français par Roland Noske A propos de l'ajustement de e en français par Bernard Tranel De l'ajustement du schwa en syllabe fermée dans la phonologie du français par Yves Charles Morin

**Social and Stylistic Variation in Spoken French** Nigel Armstrong, 2001-01-01 Many of the assumptions of Labovian sociolinguistics are based on results drawn from US and UK English Latin American Spanish and Canadian French Sociolinguistic variation in the French of France has been rather little studied compared to these languages This volume is the first examination and exploration of variation in French that studies in a unified way the levels of phonology grammar and lexis using quantitative methods One of its aims is to establish whether the patterns of variation that have been reported in French conform to those reported in other languages A second important theme of this volume is the study of variation across speech styles in French through a comparison with some of the best known English results The book is therefore also the first to examine current theories of social stylistic variation by using fresh quantitative data These data throw new light on the influence of methodology on results on why certain linguistic variables have more stylistic value and on how the strong normative tradition in France moulds interactions between social and stylistic variation **FoL**, 1989
