Developing Active Learning in the Primary Classroom Anita Vickery, 2013-10-10 Establishing an effective learning environment in the classroom requires a clear understanding of different teaching strategies that make children active participants in their own learning This book explores a range of philosophies and strategies to develop active learning in primary education It balances theory with practice to provide evidence based guidance and suggestions for use in

the classroom Key topics include Creating a supportive learning environment Developing the questioning skills of teachers and children Learning through assessment Developing thinking skills through curriculum subjects Active learning in early years education Philosophy for Children P4C Frameworks to promote thinking This is essential reading for professional studies modules on primary initial teacher education courses including university based PGCE PGDE BA QTS BED school based SCITT School Direct and employment based routes into teaching It also serves as a handbook for schools that are developing their approaches to active learning Anitra Vickery works as senior lecturer in primary mathematics education and the Professional Studies Coordinator at Bath Spa University

Understanding Subject Knowledge for Primary

Teaching Deborah Pope, 2019-08-26 How can trainee teachers begin their careers with a clear understanding of all the curriculum subjects This book addresses the nature of subject knowledge in all foundation curriculum subjects It deconstructs the elements of each subject through an exploration of the nature of the subject a coverage of the skills a study of this subject develops and through detailed analysis of case studies from practice At a time when concerns about the lack of breadth in the primary curriculum are being voiced this book supports busy trainee teachers to truly understand and be ready to teach all curriculum areas

Teaching Primary Science Peter Loxley, Lyn Dawes, Linda Nicholls, Babs

Dore, 2014-06-17 Primary Science Promoting positive attitudes to conceptual learning is a full colour core textbook to support inform and inspire anyone training to teach Science at primary level This book is a new kind of text linking subject knowledge and pedagogy in one package rather than treating them as separate entities The text aims to encourage trainee teachers to teach scientific concepts in contexts which will inspire the children to look at the world in new and intriguing ways rather than presenting it as a list of facts and definitions Encouraging critical reflection and offering practical support this book will help trainee teachers to overcome negative attitudes to Science The two part structure of the book first presents insights into the nature of science and science education exploring issues such as the value and purpose of teaching Science in the primary school and the value of scientific enquiry It then moves on to cover subject knowledge relating it to pedagogy

Early Years Science Education Mike Watts, Alison Silby, 2020-04-28 The educational provision for early years is growing and changing across many parts of the world not least in the UK While this book leans heavily on the mounting literature on early child development in its broadest sense physically emotionally linguistically its central focus lies squarely on the growth of children's scientific thinking and activities Written by educators this book is based both on formal educational research and professional practice in action The authors describe children's science concept development their curiosity driven exploration emergent ecological literacy their learning through science play the assessment of early learning the role of parents and practitioners within early education contexts and some question the very basis of the science being taught Illustrations and examples of practice are not confined to the UK though the messages to be derived from each chapter have application way beyond the immediate context This book was originally published as a special issue of Early
