Remedial English A Case Study Viney Kirpal The Testing of Language Skills Shridhar B Gokhale English for Professional Purposes Writing Emails Viney Kirpal English for Specific Purposes *Creating Word-Consciousness at the Intermediate Level: A Study* Dr. Shirin R. Shaikh,2017-06-30 The main aim of this book is to connect in a straightforward way the growing body of second language vocabulary research with teacher actions in classrooms Words are pervasive in our life The words that we use express and shape our identity Our vocabulary gives away our social and educational background It is a major factor in determining what we understand It opens or closes access to sources of information that will impact our future Today vocabulary acquisition is considered an integral area of language teaching by linguists teachers and researchers They have come to understand the role of lexicon in language learning and communication Therefore during the past three decades the field of second language acquisition has seen renewed interest in vocabulary learning But the scene was different few decades ago For many years vocabulary was considered unimportant in language teaching Its neglect in part may be due to specialisation in linguistic research on syntax and phonology This may have fostered a climate in which vocabulary was considered an unimportant element in the learning of a second or foreign language This view largely dominated the 1940 s 1950 s and 1960 s The period between 1940 60 was an uncertain period for vocabulary as an aspect of language teaching In this period vocabulary was seen mainly as a problem of selection and gradation for the target learners It was only in 1970 s that vocabulary was given some place of importance in language teaching but still it was considered less important when compared with syntax and phonology For years second language learners have complained about their lack of vocabulary in their new language During this time experts in our field did not give much importance to vocabulary However since the mid 1990s there has been a renewed interest in research on second language vocabulary issues such as student needs teaching techniques learner strategies incidental learning and vocabulary for specific purpose Today lexical knowledge is acknowledged to be central to communicative competence and the acquisition and development of second language This study is probably the first systematic attempt to expand the students active vocabulary and to create word consciousness in the classroom The aim of the present study is to examine students knowledge of vocabulary at the college level and note the problem areas and follow the eclectic method to increase the students word power in order to enable them to use more precise words instead of general ones The students are taught words in lexical sets for quick expansion of vocabulary and they are also made to consider the paradigmatic and syntagmatic relations of words for better understanding of word meanings Chapter I of this book deals with English as an international language and its position in India today It also highlights the importance of vocabulary aspects of vocabulary and the principles of selection and gradation of vocabulary Chapter II reviews the work already done in the field of vocabulary Chapter III focuses on the aims and procedure adopted in the present study It also highlights techniques of teaching new words and expanding vocabulary Chapter IV presents an analysis of the data collected The relative difficulty level of different questions in the pre test and the post test the students

progress in the use of vocabulary and the conclusions of the study are presented in this chapter I sincerely hope that the present study and the discussions will have an impact on the way teachers and learners view the teaching and learning of vocabulary in a second language **Language Acquisition in Study Abroad and Formal Instruction Contexts** Carmen Pérez-Vidal,2014-07-15 This publication constitutes essential reading for academics teachers and language policy makers wanting to understand plan and implement an educational language program involving learner mobility The book provides data and analyses from a long term program of research on study abroad the SALA Project which looked into the short and long term effects of instructional and mobility contexts on language and cultural development from two perspectives the participants language acquisition development over 2 5 years and the practitioners perspective in relation to the design and implementation of a mobility program The book is innovative in the longitudinal data it offers the light it sheds on i an array of language skills both productive and receptive oral and written tapping into phonology lexis grammar and discourse ii the role of individual differences including attitudes motivation beliefs and intercultural awareness and iii the insights on the effects of length of stay In sum this book represents a welcome addition to previous research on the outcomes of mobility policies to promote L2 learners linguistic development and the individual and educational conditions that appear to facilitate success in study abroad programs Developing Intercultural Competence through English Anna Niżegorodcew ,Yakiv Bystrov ,Marcin Kleban ,2011 The volume Developing Intercultural Competence through English Focus on Ukrainian and Polish Cultures edited by Anna Ni egorodcew Yakiv Bystrov and Marcin Kleban offers a valuable result of a joint intercultural project between two universities from the neighbouring countries of Poland and Ukraine Among the mass of books on intercultural communication the proposed volume distinguishes itself by three features unusual format combining the work of both scholars and students the focus on the intercultural approach and practical designation It also stresses the increasing awareness in the modern world that teaching learning English serves the purpose of developing general intercultural competence and not building the knowledge about the English speaking world The choice of topics indicates an interesting cultural difference Ukrainian inclination to focus on the characteristic and attractive aspects of their own culture and Polish on the problematic and the difficult Professor Lucyna Aleksandrowicz P dich Department of English Warsaw School of Social Sciences and Humanities Z recenzji prof dr hab Miros awa J Szyma skiego English in Medical Education Peih-ying Lu,John Corbett,2012-08-13 This book addresses recent developments in medical and language education In both fields there have been methodological shifts towards task based and problem based learning In addition both fields have broadened their focus on clinical expertise and linguistic skills to address issues of cultural competence English in Medical Education responds to these changes by re imagining the language classroom in medical settings as an arena for the exploration of values and professional identity The chapters cover topics such as the nature of cultural competence how to understand spoken discourse in a range of medical settings the use of tasks and problems in language education for medics the
