working methods new and old extol values and model ethical behaviours that are fluid and dynamic steadfast and unyielding and that contribute to the ebb and flow of people and their agency that remains under researched Insights are provided on variously functioning ensembles throughout the world showing how myriad instrumental music communities act as drivers complex environments and apparatus for musical and social expression that accommodates the musical aspirations of their members Taken as a whole this book explores community music as local glocal global phenomena critically discussing the redefinition of community music and what music making means to people in the twenty first century

**Nation, Society and the State** Dr. Abraham Weizfeld, 2012-03-09 This work treats the European political philosophy that has engendered the Nation State concept considered to be the logical evolution of human history as a linear periodization into the Modern State This Modern State concept is treated as the end of history in liberal democratic theory in spite of it remaining a European phenomenon Where it has been imposed beyond the European political culture it has provoked a plague of civil wars and occupations such as in Palestine In Europe itself it has also resulted in such features as the Spanish Inquisition the latter day Spanish civil war and the fascist dictatorship that followed as well as the Nazi regime and its Holocaust in alliance with the various fascist allies seeking their own Nation State Various attempts have followed in Europe itself to overcome the Nation State itself by means of the European Union which sought to unite the Nation States with a federated effort to bring some stability to the economy and life of the region in light of the disastrous wars of the twentieth century The contradictions of the Nation State and Federalism become ever more apparent as the EU now descends into economic chaos This sub title invites a comparison and a contrast between the Jewish political culture and the Zionist movement One may consider political culture as encompassing Civil Society history religious theology and law comprising a collective consciousness this historical heritage forms a national identity which is currently oriented into nationalism by the State The endurance of national identity apart from the State and with the extinction of the State is projected as the basis of an independent Civil Society

Internet-ontologies-Things Sungyong Ahn, 2023-09-21 Internet ontologies Things explores how power mobilizes algorithmic and ontological objects for example smartwatches and smart buildings to uncover hidden

problems within the physical domains of the IoT One popular approach of software studies in recent times is to think of algorithmic objects like the things in what is known as the Internet of Things IoT as ontological agents to the same extent as the humans who use them While post humanist philosophies such as speculative realism and object oriented ontology have provided a theoretical foundation for this methodological elevation of objects to autonomous and sentient beings the complicity between this philosophical discourse and the material transformation of our everyday lives which are embedded with these smart objects remains relatively underexplored Within this constantly changing infrastructure Internet ontologies Things Smart Objects Hidden Problems and their Symmetries reveals a new form of economic and political power whose algorithmic governance finds its legitimacy in our newly cultivated paranoia about unknown and perhaps unknowable computational problems In its examination of our smart world this book illuminates the mechanisms by which this power mobilizes various algorithmic and ontological objects from smart wearables to smart buildings to identify a greater number of hidden problems within the physical domains of the IoT from city sidewalks to the nerves and organs of our very own bodies

Library, 1918 Virtual Nation Gerard Goggin, 2004 The first comprehensive book on the Australian Internet Virtual Nation offers a surprising thought provoking and rigorous introduction to a technology that we now can't do without *A Certain Emancipation of Women* Tracey Rizzo, 2004 Best selling court cases in eighteenth century France provide ample evidence of a certain emancipation of women Certain in the sense of tentative qualified women won their cases in surprising numbers yet were represented by their lawyers via limiting stereotypes Certain also in the sense of sure lawyers and editors contributed to a liberatory moment particularly in the two decades leading up to the radical phase of the French Revolution in which late eighteenth century

constructions of female citizenship offered virtuous women regardless of rank or even race strategic possibilities for establishing modern identities defined as self creating autonomous and capable of moral judgment and reason Few scholars have attempted to demonstrate the means by which representations both reflect and transform the lives of historical actors This study offers a rare opportunity to glimpse that intersection as the causes celebres contain representations and lived experience fact and fiction Lawyers and editors called for the liberation of women from tyrannical fathers abusive husbands public opinion and even oppressive laws like that maintaining the stigma of illegitimacy in the dozens of seductions separations rapes and infanticides on which this study is based Jacket
