## **Ensuring Minority Success In Corporate Management:**

**Ensuring Minority Success in Corporate Management** Donna E. Thompson, Nancy DiTomaso, 2012-12-06 To be a corporate executive in America is to achieve a universally recognized measure of personal and professional success The high income privilege prestige and authority enjoyed by most corporate executives all attest to making it That is why the advancement of racial and ethnic minorities into the executive suite is one of the key barometers of the nation's progress toward full equality of opportunity But the quest for equal opportunity in corporate management has been difficult and frustrating Black Hispanic and Asian men and women are rarely found among those who run or significantly influence the direction of American corporations The wide gap between the expectation and the reality is a continuing topic of interest to business leaders and racial and ethnic minorities as well as to scholars of the business scene This book edited by Thompson and DiTomaso contributes significantly to our understanding of this problem and most importantly provides useful guidelines on what to do about it Interest in the diversity of corporate management comes at a time of unprecedented challenge to United States success in the world economy American business must now compete against aggressive producers and financiers in Western Europe and Japan More competition also has emerged from some of the rapidly developing countries in Latin America and the Pacific Rim Our ability to design manufacture sell and export goods and services in a global marketplace will increasingly determine our standard of living and prominence on the world stage

**Issues, Theory, and Research in Industrial/Organizational Psychology** Louise Kelley, 1992-03-13 Industrial Organizational psychologists are a rather diverse group of people with a common interest in applying psychology to work settings This is the conclusion reached by George Alliger in the opening chapter of this volume setting the tone for the rest of the book which attempts to expand our view of what can be considered as I O psychology The authors of the individual chapters are from a variety of backgrounds not all of them directly associated with I O psychology and they discuss topics such as managerial success and training as well as topics much more on the edge of I O such as team building and organizational theory Thus this volume makes an important statement about the potential diversity of our field At the same time it will help move us towards that diversity by providing insights and information in areas that should be and are becoming part of the realm of I O psychology These insights into non traditional topics as well as particularly interesting approaches to more traditional areas make this volume worthwhile and useful to almost anyone concerned with I O psychology

Women and Minorities in American Professions Joyce Tang, Earl Smith, 1996-10-10 By asking how and with what measure of success women and minorities fare in comparison to whites in American professions this book provides original up to date analyses of the fame and fortune of newcomers in professional fields Each chapter examines gender and or racial differences in patterns of segregation and discrimination career paths and labor market outcomes in particular professions from a comparative historical perspective In so doing the experiences of educated women and minorities are linked to the broader field of sociology of occupations and

professions Women and Minorities in American Professions unravels complexities in the process of career advancement in white collar professions and offers comprehensive and interdisciplinary coverage of career achievements and issues for women and minority professionals including theories of inequality analyses of the impact of demographic shifts deindustrialization and policy changes      **Ethnic Women** Vasilikie Demos,1994 This book introduces the study of ethnic women and contributes to our understanding of the relationships among gender race ethnicity and social class The social scientific study of gender has grown exponentially for more than two decades Until recently however little attention has been paid to the diversity among women The social scientific literature on ethnicity has experienced a revival in the same decades yet women have frequently been overlooked or misrepresented in that literature When ethnic women do appear they are typically depicted as selfless wives and mothers or passive victims Theses twenty original essays challenge myths and stereotypes The authors social scientists social service professionals and other scholars explore a broad range of racial ethnic and social class circumstances Communities represented include the Hmong in Wisconsin Cuban Jews in Florida and Samoans in Hawaii Patterns of immigration and social mobility communal institutions and maintenance of ethnic traditions are among the topics which reflect the multiple status reality of ethnic women      **The Myth of Black Corporate Mobility** Ulwyn L. Pierre,2021-11-18 First Published in 1999 This book addresses one such needed change in the corporate arena the continuing inequality of opportunities for success that blacks experience relative to their similarly qualified white peers in the U S Through interviews and research the author tries to find the answers that still need explanation due to the the stereotypes of blacks and other minorities that were kept alive through various media      Hearing on Workforce 2000 and on H.R. 2235 United States. Congress. House. Committee on Education and Labor,1989      **Facing Up to the American Dream** Jennifer L. Hochschild,1996-08-05 The ideology of the American dream the faith that an individual can attain success and virtue through strenuous effort is the very soul of the American nation According to Jennifer Hochschild we have failed to face up to what that dream requires of our society and yet we possess no other central belief that can save the United States from chaos In this compassionate but frightening book Hochschild attributes our national distress to the ways in which whites and African Americans have come to view their own and each other's opportunities By examining the hopes and fears of whites and especially of blacks of various social classes Hochschild demonstrates that America's only unifying vision may soon vanish in the face of racial conflict and discontent Hochschild combines survey data and vivid anecdote to clarify several paradoxes Since the 1960s white Americans have seen African Americans as having better and better chances to achieve the dream At the same time middle class blacks by now one third of the African American population have become increasingly frustrated personally and anxious about the progress of their race Most poor blacks however cling with astonishing strength to the notion that they and their families can succeed despite their terrible perhaps worsening living conditions Meanwhile a tiny number of the estranged poor who have completely given up on the American dream or any other faith threaten the

social fabric of the black community and the very lives of their fellow blacks Hochschild probes these patterns and gives them historical depth by comparing the experience of today's African Americans to that of white ethnic immigrants at the turn of the century She concludes by claiming that America's only alternative to the social disaster of intensified racial conflict lies in the inclusiveness optimism discipline and high mindedness of the American dream at its best **The New CEOs** Richard L. Zweigenhaft, G. William Domhoff, 2011-07-16 The New CEOs looks at the women and people of color leading Fortune 500 companies exploring the factors that have helped them achieve success and their impact on the business world and society more broadly As recently as fifteen years ago there had only been three women CEOs of Fortune 500 companies and no African Americans By now there have been more than 100 women African American Latino and Asian American CEOs of Fortune 500 companies Richard L Zweigenhaft and G William Domhoff look at these new CEOs closely Weaving compelling interview excerpts with new research the book traces how these new CEOs came to power questions whether they differ from white male Fortune 500 CEOs in meaningful ways asks whether the companies that hired them differ from other companies and discusses what we can learn about power in America from the emergence of these new CEOs As Americans continue to debate corporate compensation glass ceilings and colorblind relationships The New CEOs shares information critical to understanding our current situation and looks toward the future in our increasingly globalized world The paperback edition of The New CEOs features a new Introduction and an updated comprehensive list of new CEOs to date

Crosby, 2025-10-01 *Justice Gender and Affirmative Action* by Susan D Clayton and Faye J Crosby offers a deep dive into the complex debates surrounding affirmative action through the lens of gender and social psychology Addressing the persistent gender disparities in the workplace the authors argue for the necessity of affirmative action to combat ingrained biases and structural inequalities that permeate both economic and sociological dimensions They use the theory of relative deprivation to illustrate

how societal injustices can be overlooked by both victims and society underscoring the importance of proactive measures like affirmative action The book analyzes various judicial precedents shaping the discourse and application of affirmative action highlighting their impact on women s progress particularly white women who have benefited significantly from these programs With insights drawn from numerous studies the authors argue that affirmative action is essential and propose strategies for its effective implementation emphasizing that these policies should address systemic biases rather than attempt to compensate for perceived deficiencies within marginalized groups Through a meticulous examination of the controversies and criticisms of affirmative action Clayton and Crosby guide readers towards a nuanced understanding of its necessity in promoting justice and equity in contemporary society **Human Resource Strategy** Peter A.
