The First Year of College Robert S. Feldman, 2017-12-28 This book is premised on a very powerful social educational concern about college retention rates: one third of first year students seriously consider leaving college during their first term and only half of all students who start college ultimately graduate. This book examines the first year of college from a variety of perspectives to paint a comprehensive picture of the intersecting challenges facing today's students and higher education institutions. Technological advances, increases in college attendance costs and increasing political pressure on colleges to prove their value have changed the landscape of the first year of college but researchers have identified new approaches to improve student and institutional success that have shown considerable success and promise. In this comprehensive volume top educational researchers explore topics of student success, persistence and retention in the first year of college. **A Clash of Transitions** Olga Strietska-Ilina, 2007 In March 2000 at the European Council meeting in Lisbon the European Union heads of states set an ambitious goal to become the most competitive and dynamic knowledge based economy in the world. Such a goal requires major reforms of the societies and economies of the EU member states. This book explores the effects of these reforms on the eight Central and Eastern European countries that entered the EU in May 2004. Since 1989 these countries have been going through a major transformation to the market economy and democratic society. *A Clash of Transitions* attempts to answer how the societies and people can cope with multiple transitions. This volume is useful for courses on education, Central and Eastern Europe and European studies. **Report of the Missouri State Horticultural Society for the Year ...**, 1892
