dial ectical logic the basic preparation needed for successful project management including how to use unified principles to manage projects with different characteristics how to create company wide project governance infrastructure to make project managers to be able to take their management responsibilities and how to establish effective relationships among project stakeholders to make unique projects to be manageable structured partner social networks etc This book explains how to deal with the key contradictions existing in each phase of a project from project decision making to close out This book is basically for both top managers of companies and project managers so it addresses many challenges companies and project managers will have to face in the changing society and provides essential strategies and methods for overcoming them This book is not an another book to talk about project management knowledge or successful project management stories it is about basic project thinking and corresponding insights to deal with key common issues in projects which are essential to manage projects and even companies reliably in the changing and unreliable society
