Vassiliou,2009-09-24 The world as we have known it for the past century would have been very different without petroleum Petroleum particularly in the form of crude oil and its refined products has been central to all aspects of modern industrial society and has been a major strategic geopolitical objective for nations The 20th century was the age of oil and at least part of the 21st century will be as well Petroleum is used as an energy source and as a raw material for the production of an immense variety of chemicals and synthetic materials Almost all the world s food relies on petroleum for fertilizer pesticides cultivation or transport Petroleum has been particularly dominant as a source of transportation fuels an application for which cost effective substitutes will be especially difficult to find The A to Z of the Petroleum Industry presents a concise but complete one volume reference on the history of the petroleum industry from pre modern times to the present day This is done through a chronology an introductory essay and over 400 cross referenced dictionary entries on companies people places events technologies and phenomena related to the history of the world s petroleum industry Anyone interested in the history status and outlook for the petroleum industry will find this book a uniquely valuable source     **The History of Foreign Investment in the United States to 1914** Mira Wilkins,1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world s largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation s development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world s largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main attraction The construction of the American railroad system called on vast portfolio

Morris, 2017-01-30 This history of the government funded synthetic rubber research program 1942-1956 offers a rare analysis of a cooperative research program geared to the improvement of existing products and the creation of new ones The founders of the program believed the best way to further research in the new field was through collaboration among corporations universities and the federal government Morris concludes that in fact the effort was ultimately a failure and that vigorous competition proves the best way to stimulate innovation Government programs like the rubber research program are far better at improving existing products the author contends than creating wholly new ones
