Agyapong, Gideon Maas, 2020-12-30 *Enterprising Africa* explores the future opportunities, challenges, growth areas and key themes that will shape entrepreneurship in the African continent over the next decade. Entrepreneurship can be the key to unlock resilient growth but only if it is driven by both socially productive and growth-oriented new businesses. The book considers entrepreneurship as an enabler for socio-economic growth and development in Africa, especially in the context of youth unemployment and increasing youth population for which the traditional and indeed emerging industrial sectors will not be able to produce sufficient jobs to meet demand. Organised around three thematic parts, Part I covers the notion of inclusive growth and the role that entrepreneurs can play supporting this. Part II considers the dynamic between entrepreneurs and the environment since social, economic and environmental concerns need to build upon each other rather than vie for recognition. Finally, Part III offers chapters exploring policy contexts and the wider institutional ecosystems that need to be developed and enhanced to ensure a strong and vibrant environment for the future entrepreneurs of Africa to thrive. Edited and authored by leading experts in the field, this fascinating text will be of interest to academics as well as students of International Transformational and Social Entrepreneurship and International and African Business.

Agriculture, peasantry and poverty in Turkey in the neo-liberal age Murat Öztürk, 2023-09-04 This book investigates recent policies introduced into Turkey which are designed to reduce state activities and open up the country to international investment and trade. This is done in the context of the UN's Millennium Development Goals continuing to stretch into the distant future amid the ongoing instability of the global financial system and economic pressures on the West. The focus is on agriculture and the major effects of a deliberate restructuring of an agrarian economy as seen through the lens of the peasant, the village and poverty. This unique socioeconomic review of Turkey, which is generally thought to be a contemporary success story of the neo-liberal paradigm, argues for a new understanding of the destructive effects of global capitalism. Some issues addressed are the effects on Turkey's countryside as its agricultural sector has been catapulted onto the world market, how farming has changed and what this has meant for small-scale enterprises. Also discussed is how rural communities have fared, capital relations have been transformed in the process and the impact this has had on the nation's poor. Finally, the ways in which neo-liberalism has guided government's response to the new social needs is discussed along with how Turkey's experience parallels similar developments worldwide. This serves as a window to the reality of development at a time when the philosophy for growth underpinning development is facing an increasingly profound crisis of confidence worldwide.
