American Entomological Society, 1928 **The Extended Organism** J. Scott Turner, 2009-06-01 Can the structures that animals build from the humble burrows of earthworms to towering termite mounds to the Great Barrier Reef be said to live? However counterintuitive the idea might first seem, physiological ecologist Scott Turner demonstrates in this book that many animals construct and use structures to harness and control the flow of energy from their environment to their own advantage. Building on Richard Dawkins's classic *The Extended Phenotype*, Turner shows why drawing the boundary of an organism's physiology at the skin of the animal is arbitrary. Since the structures animals build undoubtedly do physiological work capturing and channeling chemical and physical energy, Turner argues that such structures are more properly regarded not as frozen behaviors but as external organs of physiology and even extensions of the animal's phenotype. By challenging dearly held assumptions, a fascinating new view of the living world is opened to us with implications for our understanding of physiology, the environment, and the remarkable structures animals build. *Report of the National Research Council, 1927/28-1931/32 | publ. 1929-33*, 1929 Report on the Progress and Condition of the U.S. National Museum for the Year Ending June 30 ... United States National Museum, 1928 Psychidae (Lepidoptera) Thomas Sobczyk, 2013-01-21 Comprises about 1 324 species. This is 300 more than any figure given for Psychidae so far. *The Forest Worker*, 1927 The Proceedings of the Entomological Society of London Royal Entomological Society of London, 1929 American Beetles, Volume II JR, Ross H. Arnett, Michael C. Thomas, Paul E. Skelley, J. Howard Frank, 2002-06-19 Experts offer the most sweeping reference available on the subject of North American beetles. Their rigorous standards for the presentation of data create a concise, useful format that is consistent throughout the book. This is the resource of choice for quick, accurate and easily accessible information. *Catalog of the Heteroptera or True Bugs, of Canada and the Continental United States* Thomas J. Henry, 2019-07-22 A primary aim of this catalog is to offer an accounting for each species as originally proposed and for the first usage only of all its name combinations including valid names, synonymies and misspellings that have been published for our area. We follow the policy outlined by the 1985 Code of Zoological Nomenclature for nonnomenclatorial proposals that a dissertation for an advanced educational degree is not published unless it satisfies the criteria present in Articles 8 and 9. *The Protection of Corn, November 1984-April 1988* Charles N. Bebee, 1985 *Culiclopedia* Ralph E. Harbach, 2018-10-17 This unique volume is a comprehensive compilation of all scientific names introduced at all levels of classification within the Culiclopedia family since the official start of zoological nomenclature. The work is largely a lexicon aimed at being historical and informative as well as nomenclatural and bibliographic. Unlike catalogues, it contains sections devoted separately to the groups of names regulated by the International Code of Zoological Nomenclature, the species, genus and family groups as well as sections concerned with names derived from personal and geographical names and other sources. In addition to insights into the history of mosquito classification, attention given to the formation, Latinization and derivation of names makes the work a crucial contribution to mosquito science. **General Technical Report PNW-GTR**, 2002 *A Bibliography for*
