*The European Guilds* Sheilagh Ogilvie, 2021-06-15 Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution and have always attracted debate and controversy They were sometimes viewed as efficient institutions that guaranteed quality and skills But they also excluded competitors manipulated markets and blocked innovations Did the benefits of guilds outweigh their costs Analyzing thousands of guilds that dominated European economies from 1000 to 1880 *The European Guilds* uses vivid examples and clear economic reasoning to answer that question Sheilagh Ogilvie's book features the voices of honorable guild masters underpaid journeymen exploited apprentices shady officials and outraged customers and follows the stories of the vile encroachers Women migrants Jews gypsies bastards and many others desperate to work but hunted down by the guilds as illicit competitors She investigates the benefits of guilds but also shines a light on their dark side Guilds sometimes provided important services but they also manipulated markets to profit their members They regulated quality but prevented poor consumers from buying goods cheaply They fostered work skills but denied apprenticeships to outsiders They transmitted useful techniques but blocked innovations that posed a threat Guilds existed widely not because they corrected market failures or served the common good but because they benefited two powerful groups guild members and political elites

**Early Modern Overseas Trade and Entrepreneurship** Kaarle Wirta, 2020-05-19 Drawing on an impressive range of archival material this monograph delves into the careers of two businessmen who worked for Nordic chartered monopoly trading companies to illuminate individual entrepreneurship in the context of seventeenth century long distance trade The study spans the Caribbean to the Indian Ocean examining global entanglements through personal

interactions and daily trading activities between Europeans Asian merchants and African brokers It makes an important contribution to our understanding of the role of individuals and their networks within the great European trading companies of the early modern period This unique book will be of interest to advanced students and researchers of economic history business history early modern global history and entrepreneurship      Guilds, Innovation and the European Economy, 1400-1800 S. R. Epstein, Maarten Prak, 2008-03-31 For a long time guilds have been condemned as a major obstacle to economic progress in the pre industrial era This re examination of the role of guilds in the early modern European economy challenges that view by taking into account fresh research on innovation technological change and entrepreneurship Leading economic historians argue that industry before the Industrial Revolution was much more innovative than previous studies have allowed for and explore the different products and production techniques that were launched and developed in this period Much of this innovation was fostered by the craft guilds that formed the backbone of industrial production before the rise of the steam engine The book traces the manifold ways in which guilds in a variety of industries in Italy Austria Germany Switzerland France Belgium the Netherlands and Britain helped to create an institutional environment conducive to technological and marketing innovations      *Islamic Entrepreneurship* Rasem N. Kayed, M. Kabir Hassan, 2013-12-16 This book discusses the idea that there is a specific Islamic form of entrepreneurship Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia it shows how businesses are started and how they grow in the context of an Islamic economy and society It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented there is indeed a particular Islamic approach to entrepreneurship Examining the relationship between Islamic values and entrepreneurial activity the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship and also to promote alternatives to development in the contemporary business environment The book analyses the nature of entrepreneurship and the special qualities of Islamic entrepreneurship and discusses how the Islamic approach to entrepreneurship can be encouraged and developed further still      **International Merchant Shipping in the Nineteenth and Twentieth Centuries** Lewis R. Fischer, Even Lange, 2017-10-18 This book compiles seven essays concerning changes to merchant shipping over the hundred and fifty years between 1850 and 2000 and spanning a range of countries with particular focus on Norway Greece Japan and England The essays are linked by the theme of change from traditional to modern shipping in fluctuating cargo demands from sail to steam wood to iron in improvements in communication technologies in political natures and affiliations in seafaring skillsets in the advent of containerisation and advent of globalisation The overall aim is to construct a solid international context for the merchant shipping industry in the nineteenth and twentieth centuries primarily to aid a major Norwegian deep sea merchant marine project The book contains an introduction that sets out these aims and seven essays by maritime historians which form part of the international contextual whole though all can be approached individually      *Merchant Colonies in the*

*Early Modern Period* Victor N Zakharov, Gelina Harlaftis, Olga Katsiardi-Hering, 2015-10-06 Merchant colonies were a significant factor for economic growth in Europe during the early modern period The essays in this collection look at merchant colonies across Europe assessing their function legal status interaction with local traders and assimilation into their host countries

**Bondage** Alessandro Stanziani, 2015-11 For the first time this book provides the global history of labor in Central Eurasia Russia Europe and the Indian Ocean between the sixteenth and the twentieth centuries It contests common views on free and unfree labor and compares the latter to many Western countries where wage conditions resembled those of domestic servants This gave rise to extreme forms of dependency in the colonies not only under slavery but also afterwards in form of indentured labor in the Indian Ocean and obligatory labor in Africa Stanziani shows that unfree labor and forms of economic coercion were perfectly compatible with market development and capitalism proven by the consistent economic growth that took place all over Eurasia between the seventeenth and the nineteenth centuries This growth was labor intensive commercial expansion transformations in agriculture and the first industrial revolution required more labor not less Finally Stanziani demonstrates that this world did not collapse after the French Revolution or the British industrial revolution as is commonly assumed but instead between 1870 and 1914 with the second industrial revolution and the rise of the welfare state

**Scandinavia in the Age of Revolution** Michael Bregnsbo, Patrik Winton, 2016-12-05 The Age of Revolution is a term seldom used in Scandinavian historiography despite the fact that Scandinavia was far from untouched by the late eighteenth century revolutions in Europe and America Scandinavia did experience its outbursts of radical thought its assassinations and radical reforms but these occurred within reasonably stable political structures practices and ways of thinking As recent research on the political cultures of the Nordic countries clearly demonstrates the Danish Finnish Icelandic Norwegian and Swedish experiences of the late eighteenth and early nineteenth centuries offer a more differentiated look at what constitutes revolutionary change in this period compared with other regions in Europe They provide an alternative story of an incipient transition towards modernity a Nordic model in which radical change takes place within an apparent continuity of the established order The long term products of the processes of change that began in the Age of Revolution were some of the most progressive and stable political systems in the modern world At the same time the Scandinavian countries provide a number of instances which are directly relevant to comparisons particularly within the northwest European cultural area Presenting the latest research on political culture in Scandinavia this volume with twenty seven contributions focuses on four key aspects the crisis of monarchy the transformation in political debate the emerging influence of commercial interest in politics and the shifting boundaries of political participation Each section is preceded by an introduction that draws out the main themes of the chapters and how they contribute to the broader themes of the volume and to overall European history Generously illustrated throughout this book will introduce non Scandinavian readers to developments in the Nordic countries during the late eighteenth and early nineteenth centuries and both complement and

challenge research into the political cultures of Europe and America      The Business of Politics and Ethnicity Sikko Visscher, 2007 This book describes the Singapore Chinese Chamber of Commerce's changing relationship with the state and with businesses in the region. Some of the wealthiest and most influential businessmen in Singapore and Malaysia have served as leaders of the Chamber. Drawing on archival materials and extensive interviews, Visscher provides lively biographical sketches that highlight the circumstances and personal values that propelled these and other leading Chinese businessmen to success and to prominence. He also examines Chinese business practices considering cultural elements as well as state and market forces and highlights unique features of the Chinese experience in Singapore. By viewing Singapore from the perspective of a well-established non-governmental organisation as it struggled, negotiated and cooperated with the state, this book offers an alternative to conventional political histories.

Scandinavia in the Age of Revolution Pasi Ihalainen, Dr Karin Sennefelt, Mr Michael Bregnsbo, Mr Patrik Winton, 2013-07-28 The Age of Revolution is a term seldom used in Scandinavian historiography despite the fact that Scandinavia was far from untouched by the late eighteenth century revolutions in Europe and America. Scandinavia did experience its outbursts of radical thought, its assassinations and radical reforms, but these occurred within reasonably stable political structures, practices and ways of thinking. As recent research on the political cultures of the Nordic countries clearly demonstrates, the Danish, Finnish, Icelandic, Norwegian and Swedish experiences of the late eighteenth and early nineteenth centuries offer a more differentiated look at what constitutes revolutionary change in this period compared with other regions in Europe. They provide an alternative story of an incipient transition towards modernity, a Nordic model in which radical change takes place within an apparent continuity of the established order. The long-term products of the processes of change that began in the Age of Revolution were some of the most progressive and stable political systems in the modern world. At the same time, the Scandinavian countries provide a number of instances which are directly relevant to comparisons, particularly within the northwest European cultural area. Presenting the latest research on political culture in Scandinavia, this volume with twenty-seven contributions focuses on four key aspects: the crisis of monarchy, the transformation in political debate, the emerging influence of commercial interest in politics and the shifting boundaries of political participation. Each section is preceded by an introduction that draws out the main themes of the chapters and how they contribute to the broader themes of the volume and to overall European history. Generously illustrated throughout, this book will introduce non-Scandinavian readers to developments in the Nordic countries during the late eighteenth and early nineteenth centuries and both complement and challenge research into the political cultures of Europe and America.

**Strands of Modernization** David B. Sicilia, David G. Wittner, 2021-11-01 The late nineteenth and early twentieth centuries saw extraordinary transfer and diffusion of industry and transportation-related technology and business methods. While most scholarship on nineteenth-century technology transfer beyond Europe and North America has focused on the West-to-East movement of artifacts, skills and knowledge, *Strands of Modernization*

considers the transfer of technology and business methods within East Asia in the period between approximately 1850 and 1920 Highlighting currents moving in multiple directions contributors expand upon conventional notions of what qualifies as a technology or a business practice looking more broadly at skills systems of technology tacit knowledge and the ideologies and other belief systems with which they interact The core ambition driving Strands of Modernization is to illuminate processes of adaption versus adoption that occur when technology and business practices cross sociocultural boundaries

The Restoration of Paintings in Paris, 1750-1815 Noémie Étienne, 2017-02-21 The decades following the 1973 publication of Alessandro Conti's *Storia del Restauro* have seen considerable scholarly interest in the development of restoration in France in the second half of the eighteenth century A number of technical treatises and biographies of restorers have offered insight into restoration practice *The Restoration of Paintings in Paris 1750 1815* however is the first book to situate this work within the broader historical and philosophical contexts of the time Drawing on previously unpublished primary material from archives in Paris Berlin Rome and Venice Noémie Étienne combines art history with anthropology and sociology to survey the waning decades of the Ancien Régime and early post Revolution France Initial chapters present the diversity of restoration practice encompassing not only royal institutions and the Louvre museum but also private art dealers artists and craftsmen and examine questions of trade secrecy and the changing role of the restorer Following chapters address the influence of restoration and exhibition on the aesthetic understanding of paintings as material objects The book closes with a discussion of the institutional and political uses of restoration along with an art historical consideration of such key concepts as authenticity originality and stability of artworks emphasizing the multilayered dimension of paintings by such important artists as Titian and Raphael There is also a useful dictionary of the main restorers active in France between 1750 and 1815

*The War Within* Joël Félix, Anne Dubet, 2018-10-03 The international financial crisis of 2007-08 and the ensuing scandals continue to raise important debates about the role of institutions in maintaining trust and fighting corruption as well as in sustaining economic growth and political stability in a globalized world This book proposes to historicize these problems by looking at the ways in which early modern Europe responded to similar challenges brought about by the rising costs of international warfare in a period marked by the development of commercial capitalism and the rise of fiscal states Building upon the expertise of a group of fiscal historians who are leaders in their respective fields ten chapters successively examine how Spain Britain France the Southern Low Countries the Netherlands Sweden and Prussia dealt with domestic conflicts arising from the business of war especially issues of financial profit fraud and corruption Through a series of case studies this volume explores how the various European polities engaged with the transformative effects of warfare on the relationship between private and public interests paving the way for institutional reforms and transformed ethics

**The Rise and Decline of Dutch Technological Leadership (2 Vols)** Karel Davids, 2008-09-17 This book provides a wide ranging overview of Dutch technological leadership in the early modern Europe it explains whence this leadership came about and

why it ended and it explores to what extent the Dutch case illuminates the evolution of technological leadership in general

The Republic of Skill ,2022-08-15 Artisans travelled all over Europe in the pre modern period and they were responsible for many technical innovations and new consumer products This volume moves away from the model of knowledge transfer and drawing on new understandings of artisan work considers the links between artisan creativity and mobility Through case studies of different industries it emphasizes traditions of migration the experience of moving and the stimulus provided by new economic and work environments For both male and female artisans the weight of these factors varied from one trade to another and from place to place **The Self-Perception of Early Modern Capitalists** M. Jacob,C. Secretan,2016-04-30 A

collection of essays by leading historians of early modern Europe and the U S this books explores how merchants entrepreneurs and other early modern capitalists viewed themselves A Deus ex Machina Revisited ,2006-04-01 The effects of the expansion of Europe have fascinated historians and economists as well as the public at large for centuries One of the most intriguing and controversial effects of Europe s expansion has been the trade that resulted from this movement out of Europe and into other regions of the world The role of foreign trade in Europe s economic growth and especially in its industrialization has long been hotly contested This volume has as its point of departure the idea that the link between colonial trade and the development of Europe was much more complex than hitherto believed Because this link is so complex this volume contains essays by various specialists to assess the new directions in the historiography Moreover this volume examines the debate on the impact of colonial trade on countries such as Spain Portugal the Netherlands Denmark and Sweden which are usually ignored in favor of discussion about Britain Contributors include D H Andersen G Le Bou dec M Bustos Rodr guez F Crouzet G Daudin P C Emmer B Etemad M Morineau L M ller P O Brien O P tr Grenouilleau H Pietschmann P Pourchasse J V Roitman P Verley and N Wiecker **Science, Technology and Innovation Culture**

Marianne Chouteau,Joelle Forest,Céline Nguyen,2018-12-18 We are facing unprecedented challenges today For many of us innovation would be our last hope But how can it be done Is it enough to bet on the scientific culture How can technical culture contribute to innovation How is technical culture situated with regards to what we name collectively the culture of innovation It is these questions that this book intends to address
