enterprises cannot be understood without taking into account certain factors local social capital networking and entrepreneurial culture within a given area are all crucial to entrepreneurial growth Expanding upon this theory the book demonstrates how entrepreneurship can be fostered in order to support collective development Various forms of partnership among socioeconomic actors are then analysed to highlight the social conventions and entrepreneurial culture that connect and intensify the energies at the root of local dynamism This highly original book represents a departure from entrepreneurship literature that is largely limited to the study of entrepreneurs behaviour Its dynamic presentation of holistic theory will prove an extremely absorbing read for those with an academic or professional interest in business and management entrepreneurship and regional development
