Entropy And Art An Essay On Disorder And Order:

Entropy and Art Rudolf Arnheim, 1971 This essay is an attempt to reconcile the disturbing contradiction between the striving for order in nature and in man and the principle of entropy implicit in the second law of thermodynamics between the tendency toward greater organization and the general trend of the material universe toward death and disorder

Axelrod, 1999-09-17 The Poetics of Novels deals with the fundamentals of novel writing and the execution of such and though it engages specific notions of literary and cultural theory it privileges the architectonics of the texts themselves as it crosses boundaries of both time and culture Novels include Austen's Northanger Abbey Beckett's Company Brontë's Wuthering Heights Cervantes Don Quixote Flaubert's Madame Bovary Hamsun's Hunger Hardy's Tess of the D'Urbervilles Lispector's Hour of the Star and Smart's By Grand Central Station I Sat Down and Wept **Frank O'Hara and the Poetics of Saying 'I'** Micah Mattix, 2011-03-03 While recent works of criticism on Frank O'Hara have focused on the technical similarities between his poetry and painting or between his use of language and poststructuralism Frank O'Hara and the Poetics of Saying 'I' argues that what is most significant in O'Hara's work is not such much his borrowing from painters or his proto-Derridean use of language but his preoccupation with self exploration and the temporal effects of his work as artifacts Following Pasternak's understanding of artistic inspiration as an act of love for the material world O'Hara explores moments of experience in an effort to both complicate and enrich our experience of the material world On the one hand in poems such as Second Avenue for example O'Hara works to muddy language through which experience is in part mediated with the use of parataxis allusions and absurd metaphors and similes On the other in his I do this I do that poems he names the events of his lunch hour in an effort among other things to experience time as a moment of fullness rather than as a moment of loss The book argues furthermore that O'Hara's view of the self as both an expression of the creative force at work in the world and as the temporal aggregate of finite experiences places him between so-called Romantic and postmodern theories of the lyric While it is often argued that O'Hara is a forerunner of a new critically informed materialist poetics this study concludes that O'Hara's work is somewhat less radical in its understanding of poetic meaning than is often claimed Moreover while O'Hara is preoccupied with his experience in his poems the book argues that he espouses in some respects a rather traditional view of love In addition to being a metaphor for the creative act love for O'Hara is the chance coming together of two entities

Yet one of the ironies of this is that while love is for O Hara a feeling that is the result of movement or the unexpected coming together of two otherwise separ

Arnheim for Film and Media Studies Scott Higgins, 2010-10-18 Rudolf Arnheim 1904-2007 was a pioneering figure in film studies best known for his landmark book on silent cinema *Film as Art* He ultimately became more famous as a scholar in the fields of art and art history largely abandoning his theoretical work on cinema However his later aesthetic theories on form perception and emotion should play an important role in contemporary film and media studies In this enlightening new volume in the AFI Film Readers series an international group of leading scholars revisits Arnheim's legacy for film and media studies In fourteen essays the contributors bring Arnheim's later work on the visual arts to bear on film and media while also reassessing the implications of his film theory to help refine our grasp of *Film as Art* and related texts The contributors discuss a broad range of topics including Arnheim's film writings in relation to modernism his antipathy to sound as well as color in film the formation of his early ideas on film against the social and political backdrop of the day the wider uses of his methodology and the implications of his work for digital media This is essential reading for any film and media student or scholar seeking to understand the meaning and contemporary impact of Arnheim's foundational work in film theory and aesthetics

A Companion to The Crying of Lot 49 J. Kerry Grant, 1994 *The Crying of Lot 49* is Pynchon's most accessible work consequently it is the one most widely read and taught Nonetheless the novel poses many challenges owing especially to its impressive range of references to contemporary popular and material culture history and geography and slang and technical jargon In addition as J Kerry Grant notes in his introduction *Lot 49* like all of Pynchon's work is so receptive to endless interpretations that it ultimately defies any unified comprehensive accounting of its major preoccupations much less its overall meaning The more than 480 notes comprising the guide are keyed to the 1986 Harper Perennial and 1967 Bantam editions of *Lot 49* The majority of notes are interpretive although some are designed to provide a historical context to what Pynchon has written or to recover the meaning of a reference that over time has proved to be ephemeral An entree into Pynchon's complex fictional world this guide is also a tribute to his imposing genius With the companion in hand curious apprehensive newcomers to Pynchon's work and seasoned scholars alike will approach *Lot 49* with an enhanced appreciation of the book's richness and inventiveness Publisher

Two Spheres Leonard Bachman, 2012-06-14 Explaining the connection between physical and strategic design this book proposes an aesthetic connection between two equal aspects of architectural design the Real and the Ideal Addressing architectural thinkers from the broad realms of academia and practice it is suitable either as a seminar text a guide to contemporary design issues or as a theoretical work Beginning with a historical perspective the book looks at some of the key conflicts in architectural thought that were brought about by postindustrial change The discussion shifts to clearly describe the forms of complexity how these have interacted with architecture and the possibilities in fully embracing complexity in architectural practice Although there are many books focusing on complexity science there are few that focus on the relationship between complexity and design

and none which take such a comprehensive approach

The Second Law of Life John E.J. Schmitz, 2007-01-22 In this compelling and important book John Schmitz brings order to the world of chaos that surrounds us The Second Law of Life refers to the second law of thermodynamics entropy which is an omnipresent force that quietly and crucially determines every aspect of our society culture and daily lives Unless we come to understand entropy future generations will face consequences of the unstoppable laws of physics Entropy explains the amount of energy no longer capable of doing work in other words wasted energy or heat loss Each moment of every day we lose irreplaceable energy and modern technology is not helping In fact it is accelerating the problem at a catastrophic rate And we will ultimately face a heat death crisis and utter destruction of the Earth Even actions we take to improve the environment may actually do more damage than good For example recycling is considered environmentally socially and politically correct Under the influence of entropy however it is a prolific waster of energy we must look at entire systems not just parts It is critical that we find ways to reduce energy loss Seeing the problems with greater clarity will lead to solutions This fascinating and accessible journey through the second law of thermodynamics is a step in the right direction

The Geometries of Afro Asia Joan Kee, 2023-04-18 How do we embark on a history of art that proceeds from the assumption of a global majority Taking as a rhetorical departure the construct of Afro Asia which doubles as both an ontological reference and an epistemological intervention this book centers the worlds Black and Asian artists initiate through their work Afro Asia breaks down delineated time into points trajectories angles magnitudes and relative positions so that temporality and chronology figure primarily as questions of geometry it asks if and how we can we be something other than what biology politics culture and economics tells us we are or must become Spanning North America Europe Asia and Africa this book challenges the institutionalization of contemporary art as a global enterprise increasingly governed by the judgments of a self selecting minority

Staging the Savage God Ralf Remshardt, 2016-08-16 In this broadly conceived study Ralf Remshardt delineates the theatre s deep connection with the grotesque and traces the historically extensive and theoretically intensive relationship between performance and its other the grotesque Staging the Savage God The Grotesque in Performance examines the aesthetic complicity shared by the two in both art and theatre and presents a general theory of the grotesque Performing the grotesque is both a challenge to a culture s order and the affirmation of certain ethical principles that it recognizes as its own Remshardt investigates the aesthetics and ideology of grotesque theatre from antiquity in works such as The Bacchae and Thyestes to modernity in Ubu Roi and Hamletmachine and opens up new critical possibilities for the analysis of both classical

and avant garde theatre Divided into three sections *Staging the Savage God* first interrogates the grotesque as primarily a visual artistic and theatrical mode and then inventories various critical approaches to the grotesque establishing the outlines of a theory with regard to drama In the most extensive part of the study Remshardt shifts his emphasis to the theatre of the grotesque from self consuming tragedies and the modernist trope of the artificial human figure to the characterology of the grotesque Remshardt's conclusion takes bold steps toward unraveling the paradox inherent in the grotesque theatre Written in an engaging style and aided by nine illustrations *Staging the Savage God* is a comprehensive and rigorous study that incorporates critical approaches from disciplines such as philosophy psychoanalysis art history literature and theatre to fully investigate the historical function of the grotesque in performance
