For more than twenty years, oral history has been an accepted part of the work of African historians. In large measure this has been through the understanding and use of oral traditions, which Daniel McCall has called "the heritage of the ears,"<sup>1</sup> in preparing historical studies of Africa's precolonial past. Although often forgotten in the rush to capture the traditions of the farther past, personal recollection and reminiscence have also been valued dimensions in the reconstruction of the continent's more recent history, as evidenced by the pioneering work of George Shepperson and Thomas Price on the rebellion of John Chilembwe.<sup>2</sup> In the latter approach, particularly, historians of Africa share their techniques and methods with growing numbers of scholars working on oral history in Britain, the United States, and other areas of the Western world. But more generally, the difference between the oral tradition of the Africanists and the oral history of their European and Americanist counterparts has tended to separate more than unite the two groups of historians.

That this may be a more artificial than real division is recognized by Ronald Grele who observes that, "in a very real sense all oral history is recent history" (p. 153). His point, of course, is that even oral traditions of many past generations tell us perhaps as much about the current holders of those traditions as about the distant past. African historians have long understood this idea, although far too often have seen it more as a touchstone for analysis than as a source of information

*A Motorcycle on Hell Run* Seth M. Markle, 2017-08-01 Between 1964 and 1974 Tanzania came to be regarded as a model nation and a leading frontline state in the struggle for African liberation on the continent and beyond During this time a number of African American and Caribbean nationalists leftists and pan Africanists traveled to and settled in Tanzania to join the country that many believed to be leading Africa's liberation struggle This historical study examines the political landscape of that crucial moment when African American Caribbean and Tanzanian histories overlapped shedding light on the challenges of creating a new nation

and the nature of African American and Caribbean participation in Tanzania's nationalist project. In examining the pragmatic partnerships and exchanges between socialist Tanzania and activists and organizations associated with the Black Power movements in the United States and the Caribbean, this study argues that the Tanzanian one-party government actively engaged with the diaspora and sought to utilize its political, cultural, labor, and intellectual capital to further its national building agenda but on its own terms, creating tension within the pan-Africanism movement. An excellent resource for academics and nonacademics alike, this work is the first of its kind, revealing the significance of the radical political and social movements of Tanzania and what it means for us today. *Rethinking Oral History and Tradition* Nepia Mahuika, 2019. For many indigenous peoples, oral history is a living intergenerational phenomenon that is crucial to the transmission of our languages, cultural knowledge, politics, and identities. Indigenous oral histories are not merely traditions, myths, chants, or superstitions but are valid historical accounts passed on vocally in various forms, forums, and practices. *Rethinking Oral History and Tradition: An Indigenous Perspective* provides a specific native and tribal account of the meaning, form, politics, and practice of oral history. It is a rethinking and critique of the popular and powerful ideas that now populate and define the fields of oral history and tradition, which have in the process displaced indigenous perspectives. This book, drawing on indigenous voices, explores the overlaps and differences between the studies of oral history and oral tradition and urges scholars in both disciplines to revisit the way their fields think about orality, oral history methods, transmission, narrative, power, ethics, oral history theories, and politics. Indigenous knowledge and experience holds important contributions that have the potential to expand and develop robust academic thinking in the study of both oral history and tradition. **Rethinking Oral History and Tradition** Nepia Mahuika, 2019-10-09. Indigenous Oral History explores a specific indigenous community approach to oral history. It compares and contrasts popular definitions and practices used by both oral historians and oral traditionalists, examining whether or not each resonates with indigenous perspectives regarding the form, methods, theories, and politics of oral history. **The Spoken Word and the Work of Interpretation** Dennis Tedlock, 2011-06-03. Dennis Tedlock presents startling new methods for transcribing, translating, and interpreting oral performance that carry wide implications for all areas of the spoken arts. Moreover, he reveals how the categories and concepts of poetics and hermeneutics based in Western literary traditions cannot be carried over in their entirety to the spoken arts of other cultures but require extensive reevaluation. *Your Family History* Allan J.
