enforcement mechanisms and environmental management in energy and tourism sectors **Integrated Transport** Moshe Givoni, David Banister, 2010-07-02 Travel is an essential part of everyday life and today most journeys are multimodal It is the total travel experience that counts and integrated transport must reduce the inconvenience of transfers between modes Most research and many publications on transport policy advocate sustainable transport but the priority given to integration has been negligible Yet integration is one of the most important means to advance sustainable transport and sustainability more generally While integrated transport systems are seen to be an ideal there is a failure to make the transition from policy to practice The authors argue that the achievement of sustainable transport is still a dream as an integrated transport policy is

a prerequisite for a sustainable transport system It is only when the two concepts of sustainability and integration operate in the same direction and in a positive way that real progress can be made In this book transportation experts from across the world have addressed the questions about what is integration why is it so important and why is it so hard to achieve The book provides an in depth analysis of these issues and it aims to provide a better understanding of the subject about what should be strived for about what is realistic to expect and about how to move forward towards a more integrated provision of transport infrastructure services and management *Transition Report 2005* European Bank for Reconstruction and Development,2005 This annual report assesses recent economic developments in 27 countries in central eastern Europe and the Baltic states CEB south eastern Europe SEE and the Commonwealth of Independent States CIS and examines progress made in their transition from central planning to market economies It includes country by country assessments looking at key areas of reform as well giving the latest macroeconomic data The 2005 report draws on the findings of a survey of over 9 500 companies for the latest Business Environment and Enterprise Performance Survey BEEPS *Transition Report 2004* European Bank for Reconstruction and Development,2004 The Transition Report is a unique source of information on developments in central and eastern Europe and the Commonwealth of Independent States Drawing on the EBRD s extensive experience in the region the Report offers comprehensive analysis of progress in the transition to market economies
