Environment And Security Discourses And Practices:

Environment and Security M. Lowi, B. Shaw, 2000-05-16 This book is based on a conference addressing the relationship between the environment and security in the post Cold War world It brings together scholars and practitioners from a variety of different disciplines and perspectives in an effort to both explore the complexities of the relationship between environmental variables and security conditions and re focus the debate within the environmental community The book combines analytical frameworks and case study material with proposals for addressing environmental challenges and enhancing the security and welfare of peoples states and regions

Environmental Change and Security Project Report, 1998 Environmental Security Simon Dalby, 2002 Since the end of the Cold War environmental matters especially the international implications of environmental degradation have figured prominently in debates about rethinking security But do the assumptions underlying such discussions hold up under close scrutiny In this first treatment of environmental security from a truly critical perspective Simon Dalby shows how attempts to explain contemporary insecurity falter over unexamined notions of both environment and security Adding environmental history aboriginal perspectives and geopolitics to the analysis explicitly suggests that the growing disruptions caused by a carbon fueled and expanding modernity are at the root of contemporary difficulties Environmental Security argues that rethinking security means revisiting the question of how we conceive identities as endangered and how we perceive threats to these identities The book clearly demonstrates that the conceptual basis for critical security studies requires an extended engagement with political theory and with the assumptions of the modern subject as progressive political agent Viewed thus on a global scale the environmental security discourse raises profoundly troubling political questions as to who we are and what kind of world we are collectively making in our efforts to be secure

Environmental Security in the Anthropocene Judith Nora Hardt, 2017-09-22 This book provides a critical assessment of the theories and practice of environmental security in the context of the Anthropocene The work analyses the intellectual foundations the evolution and different interpretations strengths and potential of the link between environment and security but also its weaknesses incoherencies and distortions To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene Furthermore the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities This book will be of great interest to students and academic scholars of Environmental Security Critical Security Studies

Green Political Theory Global Governance and International Relations in general *Security, the Environment and Emancipation* Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that

actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate *Handbook on Climate Change and International Security* Maria J.

Trombetta,2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue the threats it poses and the political and academic debates it has prompted Framing climate change as a security issue it explores the ways relevant actors states and international organizations have conceptualized climate security and its associated threats Coping with Global Environmental Change, Disasters and Security Hans Günter Brauch,Ürsula Oswald Spring,Czeslaw Mesjasz,John Grin,Patricia Kameri-Mbote,Béchir Chourou,Pál Dunay,Joern Birkmann,2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions The DISAM Journal of International Security Assistance Management ,2007

Responding to Environmental Conflicts: Implications for Theory and Practice Eileen Petzold-Bradley,Alexander Carius,Árpád Vincze,2012-12-06 A comprehensive tour d horizon of the debate on the environment and security focusing on the various policy options for building peace and preventing environmental conflict Experts from the areas survey the key environmental challenges in Eastern and Central European states and those of the former Soviet Union extending the debate to such regions as the Balkans the Black Sea and Central Europe This is the first time such extensive case study research has been reported for these regions Both practical and theoretical approaches to the debate are presented within a multidisciplinary framework the contributors ranging from academic experts involved with peace and conflict research to actual

policy makers active in the fields of environmental and security policy Readership Experts already working in the relevant disciplines both academic and governmental as well as those seeking an introduction to the various policy fields A graduate level study text excellent survey for policy makers and an academic contribution to ongoing studies **Ecological Security** Matt McDonald,2021-09-23 Climate change is increasingly recognised as a security issue Yet this recognition belies contestation over what security means and whose security is viewed as threatened Different accounts here defined as discourses of security range from those focused on national sovereignty to those emphasising the vulnerability of human populations This book examines the ethical assumptions and implications of these climate security discourses ultimately making a case for moving beyond the protection of human institutions and collectives Drawing on insights from political ecology feminism and critical theory Matt McDonald suggests the need to focus on the resilience of ecosystems themselves when approaching the climate security relationship orienting towards the most vulnerable across time space and species The book outlines the ethical assumptions and contours of ecological security before exploring how it might find purchase in contemporary political contexts A shift in this direction could not be more urgent given the current climate crisis

Securitizing Global Warming Delf Rothe,2015-11-19 This book explores the reasons for a recent securitization of climate change and reveals how the understanding of climate change as a security threat fuels resilience as a contemporary political paradigm Since 2007 political and public discourse has portrayed climate change in terms of international or national security This increasing attention to the security implications of climate change is puzzling however given the fact that linkages between climate change and conflict or violence are heavily disputed in the empirical literature This book explains this trend of a securitization of global warming and discusses its political implications It traces the actor coalition that promoted the idea of climate change as a security issue and reveals the symbols narratives and storylines that make up this discourse Drawing on three detailed case studies at the international level of the United Nations the regional level of the Euro Mediterranean and the national level of the UK the book reveals how climate change is turned into a non linear and unpredictable threat The resulting complexity discourse prevents the adoption of any exceptional measures and instead presents resilience as the only way to cope with the climate threat This book shows that we can only grasp the complexity of the securitization process and its implications in the climate change case by comparing it at different political levels over a longer period By developing a securitization framework the book makes an important contribution to the ongoing debate on security and resilience in critical security studies This book will be of much interest to students of critical security studies resilience environmental studies global governance and IR in general **UGC NET Political Science Paper II Chapter Wise Note Book | Complete Preparation Guide** EduGorilla Prep Experts,2022-09-15 Best Selling Book in English Edition for UGC NET Political Science Paper II Exam with objective type questions as per the latest syllabus given by the NTA Increase your chances of selection by 16X UGC NET Political Science Paper II Kit comes with well structured Content

Simpson,2023-05-20 The speed and scale of climate change presents unique and potentially monumental security implications for individuals future generations international institutions and states Long dominant security paradigms and policies may no longer be appropriate for dealing with these new security risks of the Anthropocene In response to this phenomenon this book investigates how states have reacted to these new challenges and how their different understandings of the climate security nexus might shape global actions on climate change It focuses on the perceptions framings and policies of climate security by members of the United Nations Security Council UNSC the world s highest ranking multilateral security forum Empirically the book presents detailed bottom up case studies from local authors of every UNSC member state in 2020 It combines this with an innovative theoretical approach spanning national human and ecological security that helps to capture the complex dynamics of state led approaches to dealing with security in the Anthropocene This book therefore offers readers a compelling picture of climate security politics in the UNSC beyond Council debates and resolutions By comparing and contrasting how different framings of climate security impact various policy sectors of members states the authors are able to assess the barriers and opportunities for addressing climate security

locally and globally This timely contribution to the literature on climate security examines the under analysed relationship between the policy approaches of key countries at the national and at the international level Policy alignment at multiple levels of governance will be critical if we are to respond adequately to the ubiquitous challenges posed by climate change and variability Shirley Scott Head of School and Professor School of Humanities and Social Sciences UNSW Canberra at the Australian Defence Force Academy Australia Climate change is increasingly considered a problem of security yet what that means remains deeply contested Behind the rhetoric of climate crisis threats and emergencies UN Security Council members offer profoundly different ideas about what climate change and security mean and what should be done about it This book brilliantly lays out the hidden or overlooked divergences of interests and perspectives on climate security that are playing out in the world s most central security institution as it grapples with securing a climate unstable world Olaf Corry Professor of Global Security Challenges Faculty of Social Sciences School of Politics and International Studies University of Leeds United Kingdom Security is a contested concept whose scope and direction are subject to change The prime value of this volume is the systematic documentation of the dynamics in defining what security is about in reaction to ever dramatic climate change The book s focus on a somewhat representative sample of states the members of the Security Council provides robust evidence that even though many governments remain reluctant to retreat from traditional perceptions of security there is a large and growing acceptance of the need to adjust priorities in providing security in response to climate change and its consequences Michael Brzoska Professor and Senior Research Fellow IFSH Institute for Peace Research and Security Policy Universit t Hamburg Germany The climate security literature has often been labelled as West centric with little recognition of knowledge production processes and different historical socio economic and political experiences of various societies in the Global South This book goes beyond the conventional approaches to provide a whole range of perspectives on climate security reflective of diverse contextual realities covering factors such as development imperatives conflict dynamics postcolonial legacies institutional actor complexities and geopolitical contestations among others By focusing on the climate security approaches of various countries case studies at the domestic and international levels the applicability of existing climate security frameworks or lack thereof in the context of these case studies is brilliantly brought out by the chapters This book weaves together these diverse perspectives by providing a comprehensive overview of climate security related policies of countries from both Global South and Global North and their positions on climate change and security in the UNSC They reflect the varying norms interests priorities and challenges that continue to shape the climate security agenda within the UNSC as well as non UNSC platforms This book is a must read for anyone interested in gaining an in depth and invigorating understanding of the evolution of distinct climate security discourses and practices in varying contexts Dhanasree Jayaram Assistant Professor Department of Geopolitics and International Relations Manipal Academy of Higher Education MAHE India Research Fellow Centre Marc Bloch Climate Security in the Anthropocene provides a timely and compelling account of

the conceptualizations of the climate security nexus and their implications By considering climate security through the lenses of national human and ecological security it provides a sophisticated account of the different dimensions involved in the UNSC debates and beyond The collection of chapters illustrating the positions of the members of the UN Security Council in 2020 not only provide an informative account but also sheds light on the challenges that the UNSC faces in dealing with climate change Maria Julia Trombetta Associate Professor in Politics and Environment School of International Studies Institute of Asia and Pacific Studies University of Nottingham Ningbo China China The book *Climate Security in the Anthropocene* is the first systematic assessment of climate security decision making and governance of the UN Security Council It is groundbreaking as it combines empirical bottom up case studies of perceptions and policies of different ministries and governmental agencies of UNSC member states with a novel theoretical framework contrasting different security framings and conceptions in the Anthropocene Discussing various policy sectors the study assesses barriers and opportunities and provides novel insights on multi scale responses and interactions in the climate security nexus from local to global levels connecting individuals future generations international institutions and states The book is highly recommendable for everyone interested in the emerging field of policy oriented climate security research J rgen Scheffran Professor for Integrative Geography Head of the Research Group Climate Change and Security CLISEC Center for Earth System Research and Sustainability Universit t Hamburg Germany This volume provides multifocal insights into the climate security nexus combining critical security studies and international relations theories in the age of the Anthropocene Analyzing the perceptions policies and positions of 15 UN Security Council member states this thought provoking piece demonstrates how national security human security and ecological security have advanced as conceptual innovations Offering a rich and diverse range of empirical case studies this piece is a strong contribution to academic discourse and teaching alike Franziska M ller Junior Professor for Political Science Faculty of Business Economics and Social Sciences Universit t Hamburg Germany *The Securitisation of Climate Change and the Governmentalisation of Security* Franziskus von Lucke, 2020-10-01 This book provides an in depth analysis of the securitisation of climate change in the US Germany and Mexico and offers a rethinking of securitisation theory Resting on a Foucauldian governmentality approach it discusses how different climate security discourses have transformed the political handling of climate change and affected policies practices and institutions Going beyond the literature s predominant focus on the global level it gives a fine grained examination of the political and institutional changes in different national contexts Drawing on the governmentalisation of security the book develops a new understanding of securitisation that focuses on the role of power In doing so it provides new insights into the transformative potential of linking climate change to security but also highlights the political and normative pitfalls of securitisation In this important book Franziskus von Lucke provides a theoretically sophisticated and empirically rich account of the relationship between security and climate change Developing a Foucauldian inspired account of securitization the

book rejects blanket or universal claims about the climate change security relationship instead insisting on the need to critically examine how the securitization of climate change plays out in particular empirical contexts Exploring the cases of the US Germany and Mexico von Lucke points to distinctive dynamics of securitization in these settings with different implications for the practices these in turn encourage Ultimately this book constitutes an important addition to literature on the relationship between climate change and security while developing a distinct and nuanced account of securitization that will be of interest to a wide range of scholars of security in international relations Associate Professor Matt McDonald is a Reader in International Relations at the University of Queensland Australia In 2019 a number of states and other actors notably the European Union have made climate emergency declarations It is therefore more important than ever to understand what the securitization of the climate means That is Who can securitize What security measures are likely deemed legitimate by relevant audiences How does securitization affect the population within and outside a securitizing state And perhaps most importantly of all will it succeed Franziskus von Lucke s carefully researched book offers answers to all of these questions and many others besides von Lucke proceeds by examining with the US Mexico and Germany three real life empirical cases of climate securitization Each one provides unique insights that enable a fuller understanding of climate security Accessibly written this is a must read for scholars and practitioners alike Dr Rita Floyd University of Birmingham UK author of *The Morality of Security A theory of just Securitization* CUP 2019 With great empirical detail and conceptual clarity the book compares discourses and practices of climate security in different contexts An essential reading for anyone interested in international climate politics securitization theory governmentality and the notion of power in International Relations Dr Delf Rothe Institute for Peace Research and Security Policy Hamburg at the University of Hamburg Germany
