Environment And Society In Eastern Europe:

Environment and Society in Eastern Europe Andrew Tickle, Ian Welsh, 1998 Providing a detailed examination of the role of environmental movements that marked the end of state socialism in Eastern Europe this text identifies major trends and issues and suggests possible solutions *Environmental Problems in East-Central Europe* Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described *Environmental Problems of East Central Europe* looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States *Environmental Problems in East Central Europe* provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the basis of fair share of the earth's resources *Politics and the Environment in Eastern Europe* Eszter Krasznai Kovacs, 2021-07-28 Europe remains divided between east and west with differences caused and worsened by uneven economic and political development Amid these divisions the environment has become a key battleground The condition and sustainability of environmental resources are interlinked with systems of governance and power from local to EU levels Key challenges in the eastern European region today include increasingly authoritarian forms of government that threaten the operations and very existence of civil society groups the importation of locally contested conservation and environmental programmes that were designed elsewhere and a resurgence in cultural nationalism that prescribes and normalises exclusionary nation building myths This volume draws together essays by early career academic researchers from across eastern Europe Engaging with the critical tools of political ecology its contributors provide a hitherto overlooked perspective on the current fate and reception of environmentalism in the region It asks how emergent forms of environmentalism have been received how these movements and perspectives have redefined landscapes and what the subtler effects of new regulatory regimes on communities and environment dependent

communist countries of Eastern Europe have gained international prominence The continuing socio economic transition and the instability evident in areas like the Caucasus and Former Yugoslavia have drawn the western world into uneasy interactions with the region At the same time closer commercial and cultural contacts are providing opportunities for rewarding relationships which have now resulted in many of these countries joining the EU This book provides detailed coverage of the transition from communism to a market economy Covering the whole range of East Central European and former Soviet Union countries it charts the diversity within the region offering in depth coverage of specific areas as well as a broad view of development across the region The book is organised into three comprehensive sections the historical socio economic and environmental The socio economic section considers the critical issues of restructuring to effect the transition from central planning to a market economy while the historical material provides an essential context for the constraints and opportunities affecting the region The environmental section places emphasis on results of environmental neglect inherited from communism as well as looking to the future implications of EU directives on the problems of biodiversity and pollution in the region

Civil Society in Central and Eastern Europe Sabine,2014-04-15 As well as promoting debates about liberal democracy the dramatic events of 1989 also bought forth a powerful revival in the interest of the notion of civil society This revival was reflected mainly in two broad tracts of literature The first was primarily focused on the events surrounding the Solidarity movement in Poland and the tumultuous events of 1980 81 The second was concerned with the Velvet Revolutions more broadly Following the events of 1989 there appeared a number of works sharing the common central argument that civil society played a key role in the overthrow of these Communist regimes in 1989 Challenging the centrally accepted wisdom that dissent in totalitarian regimes was representative of civil society Civil Society and Communism posits the argument that the totalitarian public sphere a new theoretical typology presents a more robust and rigorous way by which to understand dissent and opposition in totalitarian Czechoslovakia Poland and the GDR

nationalism that prescribes and normalises exclusionary nation building myths This volume draws together essays by early career academic researchers from across eastern Europe Engaging with the critical tools of political ecology its contributors provide a hitherto overlooked perspective on the current fate and reception of environmentalism in the region It asks how emergent forms of environmentalism have been received how these movements and perspectives have redefined landscapes and what the subtler effects of new regulatory regimes on communities and environment dependent livelihoods have been Arranged in three sections with case studies from Czechia Hungary Lithuania Poland Romania and Serbia this collection develops anthropological views on the processes and consequences of the politicisation of the environment It is valuable reading for human geographers social and cultural historians political ecologists social movement and government scholars political scientists and specialists on Europe and European Union politics

Urban Grassroots Movements in Central and Eastern Europe Kerstin Jacobsson, 2016-03-09 What can we learn about collective action across Central and Eastern Europe by focusing on activism within urban spaces This volume argues that the recent resurgence of urban grassroots mobilisation represents a new phase in the development of post socialist civil societies and that these civil societies have significantly more vitality than is commonly perceived The case studies here reflect the diversity and complexity of post socialist urban movements capturing also the extent to which the laboratory of urban politics is richly illustrative of the complex nexus of state society market relations within post socialism The grassroots campaigns and actions reflect the new social cleavages and increased polarisation as a consequence of neoliberal urbanisation and global integration as well as the transformation of state power and authority in the region Studying urban activism in Central and Eastern Europe is instructive for urban movements scholars generally as it forces us to acknowledge the variety of forms that contention can take and the usefulness of embedding the study of urban movements within a larger understanding of civil society
