Kostigen,2007-06-19 Ellen DeGeneres Robert Redford Will Ferrell Jennifer Aniston Faith Hill Tim McGraw Martha Stewart Tyra Banks Dale Earnhardt Jr Tiki Barber Owen Wilson and Justin Timberlake tell you how they make a difference to the environment Inside The Green Book find out how you can too Don t ask for ATM receipts If everyone in the United States

refused their receipts it would save a roll of paper more than two billion feet long or enough to circle the equator fifteen times Turn off the tap while you brush your teeth You ll conserve up to five gallons of water per day Throughout the entire United States the daily savings could add up to more water than is consumed every day in all of New York City Get a voice mail service for your home phone If all answering machines in U S homes were replaced by voice mail services the annual energy savings would total nearly two billion kilowatt hours The resulting reduction in air pollution would be equivalent to removing 250 000 cars from the road for a year With wit and authority authors Elizabeth Rogers and Thomas Kostigen provide hundreds of solutions for all areas of your life pinpointing the smallest changes that have the biggest impact on the health of our precious planet

Cows Save the Planet Judith D. Schwartz, 2013-05-20 In *Cows Save the Planet* journalist Judith D Schwartz looks at soil as a crucible for our many overlapping environmental economic and social crises Schwartz reveals that for many of these problems climate change desertification biodiversity loss droughts floods wildfires rural poverty malnutrition and obesity there are positive alternative scenarios to the degradation and devastation we face In each case our ability to turn these crises into opportunities depends on how we treat the soil Drawing on the work of thinkers and doers renegade scientists and institutional whistleblowers from around the world Schwartz challenges much of the conventional thinking about global warming and other problems For example land can suffer from undergrazing as well as overgrazing since certain landscapes such as grasslands require the disturbance from livestock to thrive Regarding climate when we focus on carbon dioxide we neglect the central role of water in soil green water in temperature regulation And much of the carbon dioxide that burdens the atmosphere is not the result of fuel emissions but from agriculture returning carbon to the soil not only reduces carbon dioxide levels but also enhances soil fertility *Cows Save the Planet* is at once a primer on soil s pivotal role in our ecology and economy a call to action and an antidote to the despair that environmental news so often leaves us with Judith Schwartz takes a fascinating look at the world right beneath our feet *Cows Save the Planet* is a surprising informative and ultimately hopeful book Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction*
