Environment Society And International Relations Towards More Effective International Environmental Agreements:

Environment, Society and International Relations Gabriela Kütting, 2013-02-01 Written in an accessible and lively style this ground breaking text marries a critique of current remedies towards environmental problems to original and viable alternatives This text adopts an eco centric rather than a traditional environmental management perspective to focuses on the key issues such as The effectiveness of international agreements in solving environmental problems the role of the structures and constraints within which these agreements operate Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries *The Environmental Element in Space Law*, 2008 While decades of space ventures have led to significant technological advances space activities have also brought increasing environmental problems This book examines the current international legal regimes in space law and environmental law in order to ascertain their applicability and efficacy in addressing environmental threats in the space sector The research suggests mechanisms which could improve environmental protection in the sector and strengthen the environmental element in space law These mechanisms include a variety of norm setting strategies used in international environmental management Special attention is drawn to the potential of environmental impact assessment in the space sector and to dispute resolution procedures Like other areas of human activities the space sector should accommodate both economic interests and environmental protection in line with the principle of sustainable development *Security and Environment in the Mediterranean* Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century The State and the Global Ecological Crisis John Barry, Robyn Eckersley, 2005 Explores the prospects for reinstating the state as the facilitator of environmental protection

through analyses and case studies of the green democratic potential of the state and the state system Lex Ad Astra Matthew Gillett, Katja Grunfeld, Iva Ramuš Cvetković, 2025-03-13 Outer space has long been considered the last untouched wilderness. However, non-State actors are increasingly active in space, heightening the risk of space pollution. Space law, designed during the Cold War, is State-centric and makes inadequate provision for non-State actors. In the face of this emerging threat, this book examines potential avenues of redress in space law, including the Outer Space Treaty along with international environmental law, international criminal law, international humanitarian law, and international human rights law. It also reviews the national legislation adopted by space-faring States at the domestic level. In parallel, the book examines the deeper theoretical implications addressing non-State actor conduct under international law. Ultimately, it proposes a ground-breaking new international law instrument to hold non-State actors responsible for space pollution. **Conflicts in Environmental Regulation and the Internationalisation of the State** Ulrich Brand, Christoph Görg, Joachim Hirsch, Markus Wissen, 2008-04-24 Examines the global regulation of biodiversity politics through international treaties, assessing how the discourse and politics of sustainable development have contributed to the internationalization of the state. *Palgrave Advances in International Environmental Politics* M. Betsill, K. Hochstetler, D. Stevis, 2005-10-31 *Palgrave Advances in International Environmental Politics* provides a state-of-the-art review of the major theoretical approaches and substantive debates of the field. The first section reviews the historical development of international environmental politics, as well as the theoretical and methodological approaches used in its study. The following chapters each review the trajectory of a key research area within international environmental politics and elaborate on current approaches and debates. Case studies in each chapter illuminate the main theoretical questions that emerge from the review. Feeling the Heat Ian Bailey, Hugh Compston, 2012-02-17 To avoid uncontrolled climate change, greenhouse gas emissions will have to be brought under control by major emitters outside the affluent West. The authors investigate the political obstacles in BRIC countries and what their governments could do to strengthen climate policies without incurring serious political damage. *Sovereignty and Territorial Temptation* Christopher R. Rossi, 2017-04-27 This powerful book stands on its head the most venerated tradition in international law and discusses the challenges of scarcity, sovereignty, and territorial temptation. Newly emergent resources accessible through global climate change, discovery, or technological advancement highlight time-tested problems of sovereignty and challenge liberal internationalism's promise of beneficial or shared solutions. From the High Arctic to the hyper-arid reaches of the Atacama Desert, from the South China Sea to the history of the law of the sea, from doctrinal and scholarly treatments to institutional forms of global governance, the historically recurring problem of territorial temptation in the ageless age of scarcity calls into question the future of the global commons and illuminates the tendency among states to share resources but only when necessary. *The Geographies of Garbage Governance* Anna R. Davies, 2016-03-03 Previously perceived as a local technical issue, for governments waste management is now also a global

socio political process involving complex patterns of multi level governance Yet these geographical complexities have not previously been considered in any detail This book examines the neglected geographies of waste management in particular the integral processes of trans localization and politicization that are emerging in waste networks Illustrated by in depth case studies from New Zealand and Ireland it critically analyzes the interaction between political scales of governing waste from the local to the supra national level It also looks at the impact of wider systems of governance civil society and the private sector on waste management policy and practices In doing so the book provides a better understanding of waste governance and recommendations for better management of the waste sector in the future

Turning Down the Heat H. Compston,I. Bailey,2008-11-05 This study analyses the politics of climate policy in a range of affluent democracies and at EU level in order to identify political strategies that would make it easier for governments to make major cuts in greenhouse gas emissions without sustaining significant political damage

Energy, Governance and Security in Thailand and Myanmar (Burma) Adam Simpson,2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South s natural resources

Global Citizenship Nigel Dower,John Williams,2016-04-22 The idea of global citizenship is that human beings are citizens of the world Whether or not we are global citizens is a topic of great dispute however those who take part in the debate agree that a global citizen is a member of the wider community of humanity the world or a similar whole which is wider than that of a nation state or other political community of which we are normally thought to be citizens Through four main sections the contributors to Global Citizenship discuss global challenges and attempt to define the ways in which globalization is changing the world in which we live Offering a breadth of coverage to the core theme of the individual in a global world Global Citizenship combines two factors the idea of global responsibility and the development of institutional structures through which this responsibility can be exercised

Globalization, Governmentality and Global Politics Ronnie Lipschutz,James K. Rowe,2006-03-07 Globalization is

moving fast impacting on the life of all nations with accelerating force In this new study Ronnie Lipschutz shows how it is being handled by specific groups seeking positive outcomes for the people and causes they represent Globalization Governmentality and Global Politics details how the widespread failure of states and corporations to regulate the impact of increased globalization has given rise to non governmental organizations and movements aiming to influence corporations regarding social responsibilities and address key issues such as human rights environmental destruction unhealthy working conditions and child labour Assessing the effectiveness of these efforts it examines both the new movements and the issues they are tackling With three key case studies on the clothing industry sustainable forestry and corporate social responsibility it explores the tensions between politics and management examining the theoretical implications of regulation for politics citizenship and the state Finally it takes a fresh look at what is to be done calling for a return to politics centred on the direct participation of the individual in the social choices that affect quality of life working conditions and the global future *Civil Society Activism Under Authoritarian Rule* Francesco Cavatorta, 2013 This volume examines theoretical and comparative perspectives on civil society activism under authoritarian constraints to offer a better understanding of its relationship with regime change Rejecting a normative approach the authors focus on the whole range of civic activism under authoritarianism

Advances in International Environmental Politics M. Betsill, K. Hochstetler, D. Stevis, 2014-07-16 This book provides authoritative and up to date research for anyone interested in the study of international environmental politics It demonstrates how the field of international environmental politics has evolved and identifies key questions topics and approaches to guide future research **Sustainable Development** Anne E. Egelston, 2012-09-14 This book documents the influence of nongovernmental organizations on the rise of the sustainable development movement in international politics It adds to the body of scholarly research on non governmental organizations by examining their political influence during the first two decades of international environmental politics from the Stockholm Conference on the Human Environment in 1972 to the establishment of the World Conference on Environment and Development in 1982 NGOs wielded their rational moral authority to achieve their goals in attending environmental mega conferences In turn these successes gave rise to a symbiotic relationship with the United Nations Environment Program and secured a seemingly permanent position at not only the negotiating table but also the inner hallways and back rooms of the United Nations **Interest Mediation and Policy Formulation in the European Union** Olga Schenk, 2013 International Environmental Law Gerry Nagtzaam, Evan van Hook, Douglas Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and

corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law
