Environment And History

Daniel R. Headrick

Environment And History:

The Environment in World History Stephen Mosley, 2010-02-25 Covering the last five hundred years of global history this title examines the processes that have transformed the Earth and put growing pressure on natural resources **What is Environmental History?** J. Donald Hughes, 2015-11-30 What is environmental history It is a kind of history that seeks understanding of human beings as they have lived worked and thought in relationship to the rest of nature through the changes brought by time In this new edition of his seminal student textbook J Donald Hughes provides a masterful overview of the thinkers topics and perspectives that have come to constitute the exciting discipline that is environmental history He does so on a global scale drawing together disparate trends from a rich variety of countries into a unified whole illuminating trends and key themes in the process Those already familiar with the discipline will find themselves invited to think about the subject in a new way This new edition has been updated to reflect recent developments trends and new work in environmental history as well as a brand new note on its possible future Students and scholars new to environmental history will find the book both an indispensable guide and a rich source of inspiration for future work **Nature and the English Diaspora** Thomas R. Dunlap, 1999-09-28 First published in 1999 this book is a comparative history of the development of ideas about nature particularly of the importance of native nature as a part of the culture in the Anglo settler countries of the United States Canada Australia and New Zealand It examines the development of natural history in the great nineteenth century expansion of settlement It explores settlers adaptations to the end of expansion and scientists shift from natural history to ecology Finally it analyzes the diffusion of ecology through the Anglo world and to the general population as well as the rise of environmentalism Addressing not only scientific knowledge but also popular issues such as hunting common names for plants and animals landscape painting and nature stories this book explores the ways in which English speaking settlers looked at nature in their new lands and at the place they gave it in their societies *The Environment and World History* Edmund Burke, Kenneth Pomeranz, 2009-04-08 In 11 essays the contributors examine the connections between environmental change and other major topics of early modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more Environment and History William Beinart, Peter Coates, 2002-01-08 The influence of human economies and cultures on ecosystems is particularly striking in the new worlds into which Europeans have expanded over the past five hundred years Using a comparative and multidisciplinary approach Beinart and Coates examine this neglected aspect of the history of settler incursion and dominance in two frontier nations the USA and South Africa They also seek to explain change in indigenous ideas and practices towards the environment and discuss the rise of popular environmentalism up to the present day **An Environmental History of the World** Johnson Donald Hughes, 2001 This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history each also has three case

studies which illustrate the significant patterns occurring at that time **Environment and History** William Beinart, Peter Coates, 2002-01-08 The influence of human economies and cultures on ecosystems is particularly striking in the new worlds into which Europeans have expanded over the past five hundred years Using a comparative and multidisciplinary approach Beinart and Coates examine this neglected aspect of the history of settler incursion and dominance in two frontier nations the USA and South Africa They also seek to explain change in indigenous ideas and practices towards the environment and discuss the rise of popular environmentalism up to the present day **The Ends of the Earth** Donald Worster, 1988 A unifying discussion of our increasingly integrated global economy higher population levels and greater resource demands

A Field on Fire Mark D. Hersey, Ted Steinberg, 2019-01-29 A frank and engaging exploration of the burgeoning academic field of environmental history Inspired by the pioneering work of preeminent environmental historian Donald Worster the contributors to A Field on Fire The Future of Environmental History reflect on the past and future of this discipline Featuring wide ranging essays by leading environmental historians from the United States Europe and China the collection challenges scholars to rethink some of their orthodoxies inviting them to approach familiar stories from new angles to integrate new methodologies and to think creatively about the questions this field is well positioned to answer Worster's groundbreaking research serves as the organizational framework for the collection Editors Mark D Hersey and Ted Steinberg have arranged the book into three sections corresponding to the primary concerns of Worster's influential scholarship the problem of natural limits the transnational nature of environmental issues and the question of method Under the heading Facing Limits five essays explore the inherent tensions between democracy technology capitalism and the environment The Crossing Borders section underscores the ways in which environmental history moves easily across national and disciplinary boundaries Finally Doing Environmental History invokes Worster's work as an essayist by offering self-conscious reflections about the practice and purpose of environmental history The essays aim to provoke a discussion on the future of the field pointing to untapped and underdeveloped avenues ripe for further exploration A forward thinker like Worster presents bold challenges to a new generation of environmental historians on everything from capitalism and the Anthropocene to war and wilderness This engaging volume includes a very special afterword by one of Worster's oldest friends the eminent intellectual historian Daniel Rodgers who has known Worster for close to fifty years **A Companion to Global Environmental**

History J. R. McNeill, Erin Stewart Mauldin, 2012-11-05 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil

Germany and China

The Environment in American History Jeff Crane, 2014-11-27 From pre European contact to the present day people living in what is now the United States have constantly manipulated their environment The use of natural resources animals plants minerals water and land has produced both prosperity and destruction reshaping the land and human responses to it The Environment in American History is a clear and comprehensive account that vividly shows students how the environment played a defining role in the development of American society Organized in thirteen chronological chapters and extensively illustrated the book covers themes including Native peoples manipulation of the environment across various regions The role of Old World livestock and diseases in European conquests Plantation agriculture and slavery Westward expansion and the exploitation of natural resources Environmental influences on the Civil War and World War II The emergence and development of environmental activism Industrialization and the growth of cities and suburbs Ecological restoration and climate change Each chapter includes a selection of primary documents and the book is supported by a robust companion website that provides further resources for students and instructors Drawing on current scholarship Jeff Crane has created a vibrant and engaging survey that is a key resource for all students of American environmental history

Rethinking Environmental History Alf Hornborg, John Robert McNeill, Juan Martínez Alier, 2007 This exciting new reader in environmental history provides a framework for understanding the relations between ecosystems and world systems over time Alf Hornborg has brought together a group of the foremost writers from the social historical and geographical sciences to provide an overview of the ecological dimension of global economic processes with a long term historical perspective Readers are challenged to integrate studies of the Earth system with studies of the World system and to reconceptualize human environmental relations and the challenges of global sustainability Immanuel Wallerstein renowned Yale sociologist and originator of the world system concept closes the volume with his reflections on the intellectual moral and political implications of global environmental change

Technology and the Environment in History Sara B. Pritchard, Carl A. Zimring, 2020-10-13 New perspectives on how envirotech can help us engage with the surrounding world in ways that are more sustainable for humanity and the planet Today's scientists policymakers and citizens are all confronted by numerous dilemmas at the nexus of technology and the environment Every day seems to bring new worries about the dangers posed by carcinogens superbugs energy crises invasive species genetically modified organisms groundwater contamination failing infrastructure and other troubling issues In Technology and the Environment in History Sara B Pritchard and Carl A Zimring adopt an analytical approach to explore current research at the intersection of environmental history and the history of technology an emerging field known as envirotech Technology and the Environment in History They discuss the important topics historical processes and scholarly concerns that have emerged from recent work in thinking about envirotech Each chapter focuses on a different urgent topic Food and Food Systems How humans have manipulated organisms and ecosystems to produce nutrients for societies throughout history Industrialization

How environmental processes have constrained industrialization and required shifts in the relationships between human and nonhuman nature Discards What we can learn from the multifaceted forms complex histories and unexpected possibilities of waste Disasters How disaster which the authors argue is common in the industrialized world exposes the fallacy of tidy divisions among nature technology and society Body How bodies reveal the porous boundaries among technology the environment and the human Sensescape How environmental and technological change have reshaped humans and potentially nonhumans sensory experiences over time Using five concepts to understand the historical relationships between technology and the environment porosity systems hybridity biopolitics and environmental justice Pritchard and Zimring propose a chronology of key processes moments and periodization in the history of technology and the environment Ultimately they assert envirotechnical perspectives help us engage with the surrounding world in ways that are we hope more sustainable and just for both humanity and the planet Aimed at students and scholars new to environmental history the history of technology and their nexus this impressive synthesis looks outward and forward identifying promising areas in more formative stages of intellectual development and current synergies with related areas that have emerged in the past few years including environmental anthropology discard studies and posthumanism **Environment, Health and History**

V. Berridge, M. Gorsky, 2011-12-02 The environment is currently a matter of international public and academic concern but is often considered separately from health issues This book brings together work from environmental and health historians to conceptualise the connection between environment and health at different times and in different geographical locations

The Environment in World History Stephen Mosley, 2023-11-03 Now in its second edition and refreshed by a decade of new research The Environment in World History uncovers the deep rooted causes of interconnected climate biodiversity and ecological crises that have brought the environment to the top of the global political agenda in the twenty first century Its expanded chapters and case studies explore a wide range of issues including the following the hunting of wildlife and the loss of biodiversity across the globe deforestation and the development of strategies to protect the world's forests soil degradation caused by worldwide agricultural expansion one of the most profound ways that humans have altered the planet the widening impact of urban industrial growth and the deepening ecological footprints of the world's cities and the rising levels of air land and water pollution as the trade off for continued economic growth worldwide Covering the last five hundred years it offers an essential environmental perspective on well known world history narratives of imperialism and colonialism trade and commerce technological progress and the advance of civilisation Clearly written and fully up to date it is an invaluable resource for all students of world history and environmental studies *Inescapable Ecologies* Linda Lorraine Nash, 2006 Publisher description *Ecology and Empire* Tom Griffiths, Libby Robin, 1997 Ecology and Empire forged a historical partnership of great power and one which particularly in the last 500 years radically changed human and natural history across the globe This book scrutinizes European expansion from the perspectives of the so called colonized

peripheries the settler societies It begins with Australia as a prism through which to consider the relations between settlers and their lands but moves well beyond this to a range of lands of empire It uses their distinctive ecologies and histories to shed new light on both the imperial and the settler environmental experience Ecology and Empire also explores the way in which the science of ecology itself was an artifact of empire drawing together the fields of imperial history and the history of science

Oral History and the Environment Stephen M. Sloan, Mark Cave, 2022 As uncontrolled development forces crises in the natural world deeply ingrained human connections with the earth are changing Oral history's proven ability to explore issues of race ethnicity class gender and sexuality make it a uniquely effective methodology for bringing in new perspectives to our understanding of environments This book brings together interviews with a global range of activists farmers water system managers victims of catastrophe tribal trustees wilderness rangers reindeer herders and foresters among others whose life experience gives them special insights into human environmental interaction and adaption Commentary by oral historians examines how these stories can be used to better understand our relationship with the natural world Oral History and the Environment takes what could seem broad and impersonal forces such as climate change and environmentalism and crystalizes their meaning through personal stories It overturns narrow historical frameworks bounded artificially by national borders and instead portrays the issues facing our common ecosystems

Humans Versus Nature Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

History of Ecology and Environment in India Mr. Rohit Manglik, 2023-08-23 In this book we will study about India's environmental history traditional ecological knowledge forest policies environmental movements and challenges in conservation
