**Natural Resource Regulation in China** Tao Ding, Malin Song, 2023-08-27 This book makes an in depth study of China s natural resource regulatory system including theoretical basis development process asset accounting ownership reform system structure legal safeguard and policy implications China is a big country with vast natural resource Improving the supervision system of natural resources and enhancing the supervision capacity of natural

resources have become the top priority of China's economic and social development. This book focuses on how to establish an optimized coordinated and efficient natural resource regulatory system in China and aims to improve China's natural resource regulatory system. By combing through the process of historical change, analyzing resource accounting and pricing methods, and studying the realization and reform of property rights, this book discusses China's current problems in the process of natural resource regulation and then proposes solutions and implementation paths as a reference for the construction of the Chinese natural resource regulatory system. People who are interested in natural resource regulation could find something useful in this book.

**Natural Resource Degradation and Human-Nature Wellbeing** Rashed Al Mahmud Titumir, Tanjila Afrin, Mohammad Saeed Islam, 2023-03-09. The book addresses the gaps in the body of knowledge from two grounds. Firstly, it adds value through explaining the dynamics of natural resource governance by focusing on the particular arenas of biodiversity, resources, water resources, and climate change in developing country context. Secondly, it critically scrutinizes the market-centric perspectives on one hand and combines political economy questions that are generally overlooked in discussions of current resource governance framework on the other. It develops a new framework to examine the reasons behind the degradations of natural resources to offer sustainable solutions to the problems. It shows that the natural resources have been exploited beyond sustainable limits due to the structural rigidities embedded in and reproduced by fragile institutions and unequal power sharing arrangements under the market-centric economic system. The book formulates a new understanding of sustainability in case of usage and management of natural resources by incorporating the idea of human sociality. It highlights the importance of the well-being of nature and human beings must go side by side; one without the other is not a sustainable option. The book contains key learnings for scholars and researchers working in the field of development studies who wish to gain a deeper understanding on the sustainable natural resource governance specifically in the contexts of developing countries. For policymakers and policy advocates, the book serves as the groundwork on policies regarding biodiversity, resources, water resources, and climate change specific to the context of developing countries, providing more relevant contents in terms of laying out justification for policy objectives.

**Saving Small Island Developing States** Shyam Nath, John L. Roberts, Yeti Nisha Madhoo, 2010. Small island states have a big problem: the environmental consequences of climate change. This text introduces and explains the key environmental policy challenges and suggested responses to them.

*Globalization* Ashish Vaidya, 2005-12-19. This work is a comprehensive collection of cutting edge scholarship on the economic, international, business, political, legal, and environmental ramifications of globalization, one of the hottest topics of the day. International trade is as old as nations. During the last five decades, however,

advances in technology and transportation have changed the scope and method of international trade Disputes rage about the effects of these changes advocates for different positions offer argument but little factual or theoretical analysis Globalization offers all the information readers need to sort out the arguments Written with the highest degree of scholarship intended for college students or working professionals the encyclopedia provides both introductory material to broad economic legal political and environmental theory and in depth analysis of how theory interacts with practice in the framework of global trade A trader in New York can in a matter of seconds execute a billion dollar currency transaction in Hong Kong What does this transaction mean to New Yorkers to residents of Hong Kong and to the rest of the world This book gives readers the tools to answer those questions

**Sacred Sustainability, Polyhedral Christianity and Cosmic Challenges** Jojo M. Fung, 2025-03-31 This book explores the concept of Polyhedral Christianity that has the capacity to embrace the inter multicultural religious complexities of our contemporary world taking inspiration from Pope Francis use of the image of a polyhedron The author suggests that Polyhedral Christianity calls for an Enspirited Leadership This spirit driven leadership is grounded in creational pneumatology and cosmicism to promote resilient religiocultural communities that enjoy a more relational harmony of all life forms on Earth conscious of an interdependent interconnected oneness in the sacred web of life in the cosmos creation The chapters engage with indigenous notions of sacred sustainability from the primal as well as the Buddhist Hindu and Islamic religious traditions This innovative corpus will be of particular interest to the scholars of theology theologians of the world Christianity and interreligious relations

**Liability and Environment** Lucas Bergkamp, 2021-12-06 Liability and Environment analyzes the role of law in particular civil liability in controlling environmental pollution and risk In modern environmental policy liability has become a popular instrument In this book Prof Bergkamp takes a fresh look at civil liability for environmental harm in an inter and transnational context Over the last decade industry's liability exposure for environmental harm has expanded significantly At the international EC and national level proposals for onerous strict environmental liability regimes are pending The polluter pays principle which is an articulation of the cost internalization theory in the environmental area is believed to justify such liability regimes Applying an instrumental approach to legal instruments Prof Bergkamp aims to redefine the role of liability in the heavily regulated environmental area He shows that liability for environmental harm is not justified by the polluter pays principle is an uncertain and unreliable instrument for achieving prevention results in an inefficient insurance scheme and plays a dubious role in adjusting activity levels Based on an analysis of the basic characteristics of alternative legal instruments Prof Bergkamp concludes that civil liability should play a more modest limited role in an environmental law system dominated by public law Where deterrence is not the objective first party insurance compensation funds or other public law regimes should be preferred over liability rules In addition to civil liability of private parties Liability and Environment discusses State liability under international EC and national law Under international law breach of a primary obligation triggers a State's

liability Prof Bergkamp argues that this rule should be applied also to liability of private parties In the environmental area a business primary obligations are spelled out in detailed permit conditions regulations and statutes According to Prof Bergkamp only if a primary obligation is breached a private person should be liable for environmental harm The system that Bergkamp advocates is an objective fault liability regime in which public environmental law defines the standard of care for both government and industry In rebuilding our civil liability system we should keep in mind that what is good for industry should be good for everyone or it is not good for anyone we should keep in mind that what is good for private parties should be good for the state or it is not good for either In rebuilding our civil liability system the international law of State responsibility which is unpolluted by risk spreading and activity level considerations will guide us a long way This book is aimed at advanced law students academic scholars and practitioners In addition it will be of interest to policy and legislative analysts legislators and government officials Professor Bergkamp s book cannot be described as solving the problems of legal and regulatory control of environmental harm whether within a nation or internationally As suggested before however the very idea of a solution is illusory All legal and regulatory regimes around the world are today and will remain for the future in a state of perpetually continuing development The virtue of this fine book is that it moves the process of that development forward by a very substantial measure from the Foreword by George L Priest      *Green Politics* Dustin Mulvaney,2011-06-28 Colorful bracelets funky brooches and beautiful handmade beads young crafters learn to make all these and much more with this fantastic step by step guide In 12 exciting projects with simple steps and detailed instructions budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble Following the successful Art Smart series Craft Smart presents a fresh fun approach to four creative skills knitting jewelry making papercrafting and crafting with recycled objects Each book contains 12 original projects to make using a range of readily available materials There are projects for boys and girls carefully chosen to appeal to readers of all abilities A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills      *Entrepreneurship as Empowerment* Vanessa Ratten,2020-08-14 Entrepreneurship empowers individuals to bring ideas to life Entrepreneurs utilise their creative skills to develop business ventures making use of knowledge spillovers that occur in entrepreneurial ecosystems and the connections between businesses individuals and other entities that allow collaboration on joint projects

**Climate Change, Forests and Federalism** Evgeny Guglyuvatyy,2022-03-15 Climate change is one of the most serious global challenges facing humankind Climate change has enormous environmental and economic implications and finding a solution is a daunting task The purpose of this book is to look at the global problem of climate change through the prism of an individual country s attempt to tackle this problem This book begins with a discussion of the origins of climate change and the evolution of the international response to climate change Key climate change mitigation actions and policies are considered to provide the necessary framework for analysing Australia s approach to climate change Australia s climate

change policy development is considered from a historical perspective The book traces the evolution of the response to climate change focusing on Australia as one of the Federal countries unable to adequately reduce greenhouse gas emissions due to the systematic failure of the Australian government to develop a common and effective approach to the problem of climate change The book will be of interest to scholars and students of environmental law and the contemporary International and Australian climate change law      **Ecosystem Services in Agricultural and Urban Landscapes** Stephen Wratten, Harpinder Sandhu, Ross Cullen, Robert Costanza, 2013-01-14 Ecosystem services are the resources and processes supplied by natural ecosystems which benefit humankind for example pollination of crops by insects or water filtration by wetlands They underpin life on earth provide major inputs to many economic sectors and support our lifestyles Agricultural and urban areas are by far the largest users of ecosystems and their services and for the first time this book explores the role that ecosystem services play in these managed environments The book also explores methods of evaluating ecosystem services and discusses how these services can be maintained and enhanced in our farmlands and cities This book will be useful to students and researchers from a variety of fields including applied ecology environmental economics agriculture and forestry and also to local and regional planners and policy makers      *The Emerald Handbook of ICT in Tourism and Hospitality* Azizul Hassan, Anukrati Sharma, 2020-11-30 The Emerald Handbook of ICT in Tourism and Hospitality incorporates key research findings in depth case studies and discussion of the future implications stemming from technologies changes and developments across a number of core themes
