C. Rump, 1996 Good environmental information is essential for effective sustainable development policy making and action planning Accurate information increases the chances for correct decisions This does not guarantee a healthier environment but its absence seriously impedes decisions which would lead to a sustainable future Ideally local sectoral corporate national regional and global reports should complement one other using for example common spatial units and databases In reality

comprehensive and integrated information is often not available for today's decision makers. The Source Book is designed to help to harmonize environmental reporting by encouraging the development of standard methods, practices and terminology. It evaluates and compares alternative approaches for the development, production and dissemination of environmental information and combines the collective experience of environmental reporting covering all aspects of reporting from user needs to data supply.

**Research to Protect, Restore, and Manage the Environment** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Environmental Research, 1993-02-01. This book assesses the strengths and weaknesses of current environmental research programs, describes the desirable characteristics of an effective program and recommends cultural and organizational changes to improve the performance of environmental research. Research areas in need of greater emphasis are identified and overall directions for environmental research are recommended. The book also comments on the proposal to establish a National Institute for the Environment and on the elevation of the Environmental Protection Agency to cabinet status. *Guide to U. S.
