

An aerial photograph of a winding asphalt road that curves through a hilly, grassy landscape. The road is dark and contrasts with the lighter, textured ground. The hills are covered in low-lying vegetation, and the overall scene is captured from a high angle, showing the road's path as it disappears into the distance.

Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues **The Incomplete Eco-Philosopher**

Anthony Weston, 2009-01-15 Collected essays present Weston s pragmatic environmental philosophy calling for reconstruction and imagination rather than deconstruction and analysis *Environmental Ethics* Bob Jickling, Heila Lotz-Sisitka, Lausanne Olvitt, Rob O'Donoghue, Ingrid Schudel, Dylan McGarry, Blair Niblett, 2021-12-07 This well constructed and highly original sourcebook integrates educational materials for teaching environmental ethics with theoretical reflections The book is set to contribute immensely to its aim of taking ethics out of philosophy departments and putting it into the streets into villages and on the Earth to make ethics an everyday activity not something left to experts and specialists

Context based activities are presented in almost every chapter While it acknowledges foundational theories in environmental ethics and the work that they continue to do it wholeheartedly embraces a growing body of literature that emphasises contextual process oriented and place based approaches to ethical reflection deliberation and action It walks on the ground and isn't afraid to get a little dirty or to seek joy in earthly relationships And it ultimately breaks with much Western academic tradition by framing ethics in a storied world thus making room to move beyond Euro American perspectives in environmental issues This work will be of interest to school teachers and other non formal and informal educators teacher educators college instructors university professors and other professionals who wish to bring environmental ethics to the forefront of their pedagogical practices
