Environmental Ethics Readings In Theory And Application:

Environmental Ethics: Readings in Theory and Application Louis P. Pojman, Paul Pojman, Katie McShane, 2016-01-01 ENVIRONMENTAL ETHICS 7th Edition presents the main issues in environmental ethics using a diverse set of readings arranged in dialogue format The seventh edition of this popular anthology features selections from contemporary authors as well as readings from classic writers all chosen for their clarity and accessibility By exploring both sides of every topic this edition helps students quickly grasp each subject and move from theory to application Making this textbook even more enjoyable to read include new sections on Environmental Justice Climate Change Food Ethics Nature and Naturalness Sustainability Population and Consumption Future Generations and Holism Important Notice Media content referenced within the product description or the product text may not be available in the ebook version

Environmental Ethics Paul Pojman, Katie McShane, 2016-01-01 *Environmental Ethics* Paul Pojman, 2012 The most comprehensive introduction to environmental ethics available ENVIRONMENTAL ETHICS offers students a current look at the issues and topics that dominate the field today organized into two main parts that take students seamlessly from theory to application This Sixth Edition of the Pojmans popular anthology like its predecessors includes numerous topic areas not covered in other anthologies Featuring articles carefully selected for clarity and accessibility the text follows a dialogic pro con format presenting divergent positions on each topic ensuring that students are both exposed to and understand both sides of every topic so they can develop their own informed positions New selections include selections on Food Ethics and Climate Change and Energy Policy Most of the royalties for this book are donated to groups dedicated to protecting the environment such as the Wilderness Society and the Sierra Club

Consequentialism and Environmental Ethics Avram Hiller, Ramona Ileä, Leonard Kahn, 2013-12-04 This volume works to connect issues in environmental ethics with the best work in contemporary normative theory Environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent This book articulates and evaluates consequentialist responses to that challenge Contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues In particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation

Environmental Ethics Marion Hourdequin, 2024-01-25 What is environmental virtue Is developing good habits enough What does climate justice require Is ecological restoration just another form of the human domination of nature Exploring these questions and more this book provides an up to date and balanced introduction to environmental ethics It first examines ethical theory then ties theory to practice showing how values guide environmental policies but also how policies and institutions shape environmental values Updated and expanded to engage with the latest

scholarship scientific findings and societal challenges this 2nd edition features New sections on food ethics multispecies justice intergenerational ethics and the Anthropocene Contemporary case studies focusing on the rights of nature the use of biotechnology in ecological restoration and just climate transitions Expanded coverage of diverse philosophical traditions including Confucian Daoist and Indigenous ethical perspectives Updated discussion questions further reading sections and online resources Exploring the possibilities and limitations inherent in both classical ethical models and modern theoretical approaches to the environment this is a key resource for teaching students to think ethically about the world we live in

Environmental Ethics Robin Attfield, 2014-04-03 In this clear concise comprehensively revised and up to date introduction to environmental ethics Robin Attfield guides the student through the key issues and debates in this field in ways that will also be of interest to a wide range of scholars and researchers The book introduces environmental problems and environmental ethics and surveys theories of the sources of the problems Attfield also puts forward his own original contribution to the debates advocating biocentric consequentialism among theories of normative ethics and defending objectivism in meta ethics The possibilities of ethical consumerism and investment are discussed and the nature and basis of responsibilities for future generations in such areas as sustainable development are given detailed consideration Attfield adopts an inclusive cosmopolitan perspective in discussions of global ethics and citizenship and illustrates his argument with a discussion of global warming mitigation adaptation and global justice The revised edition features a new chapter on climate change new treatments of animal issues ecofeminism environmental aesthetics invasion biology and virtue ethics and new applications of the precautionary principle to fisheries genetic engineering and synthetic biology The glossary and bibliography have been updated to assist understanding of these themes The text uses a range of devices to aid understanding such as summaries of key issues and guides to further reading and relevant websites It has been written particularly with a view to the needs of students taking courses in environmental ethics and will be of interest to students and scholars of philosophy ethics geography religion and environmental studies

Environmental Ethics and Forestry Peter C. List, 2000 During the past twenty five years North American forestry has received increasingly vigorous scrutiny Critics including the environmentalists environmental scientists representatives of public interest groups and many individual citizens have expressed concerns about forestry's basic assumptions and methods as well as its practical outcomes Criticism has centered on such issues as the exploitation of forests for timber production the reduction and fragmentation of old growth habitats the destruction of biodiversity the degradation of grasslands through grazing practices lack of government attention to recreation facilities silvicultural methods like clearcutting and the use of herbicides and pesticides the exportation of industrial forestry techniques to other parts of the world and the use of public monies to provide services for private resource companies as in the creation of logging roads This rising tide of public scrutiny has led many foresters to suspect that their contract with society to manage forests using their best professional judgment had been undermined Some

of these professionals as well as some of their critics have begun to reexamine their old beliefs and to look for new ways of practicing forestry Part of this reflective process has entailed new directions in environmental ethics and environmental philosophy This reader brings together some of the new thinking in this area Here students of the applied environmental and natural resource sciences as well as the interested general reader will discover a rich sampling of writings in environmental ethics and philosophy as they apply to forestry Readings focus on basic ethical systems in forestry and forest management philosophical issues in forestry ethics codes of ethics in forestry and related natural resource sciences such as fisheries science and wildlife biology Aldo Leopold s land ethic in forestry ethical advocacy and whistleblowing in government resource agencies the ethics of new forestry ecoforestry and public debate in forestry as well as ethical issues in global forestry such as the responsibilities of forest corporations environmentalists and individual wood consumers This volume contains materials from the founders of forestry ethics such as Bernhard Fernow Gifford Pinchot John Muir and Aldo Leopold from such organizations as the Society of American Foresters the Wildlife Society the American Fisheries Society Forest Service Employees for Environmental Ethics and the Ecoforesters group in addition to writings by a variety of well known environmental philosophers and foresters including Holmes Rolston Robin Attfield Lawrence Johnson Michael McDonald Paul Wood James E Coufal Raymond Craig Kristin Shrader Frechette Jeff DeBonis Jim L Bowyer Alasdair Gunn Goug Gaigle Alan G McQuillan Stephanie Kaza Alan Dregson Duncan Taylor and Kathleen Dean Moore Author note Peter C List is Professor of Philosophy at Oregon State University where he teaches courses on environmental ethics ethical issues in the natural resource sciences and sustainable forestry He is the author of articles on Aldo Leopold s land ethic and co author of several articles on public attitudes about federal forests and forest management published in the Journal of Forestry and Society and Natural Resources

A New Environmental Ethics Holmes Rolston III, 2020-04-28 This Second Edition of A New Environmental Ethics The Next Millennium for Life on Earth offers clear powerful and often moving thoughts from Holmes Rolston III one of the first and most respected philosophers to write on the environment and often called the father of environmental ethics Rolston surveys the full spectrum of approaches in the field of environmental ethics and offers critical assessments of contemporary academic accounts He draws on a lifetime of research and experience to suggest an outlook and even hope for the future This forward looking analysis focused on the new millennium will be a necessary complement to any balanced textbook or anthology in environmental ethics The First Edition guaranteed to put you in your place Beyond that the Second Edition asks whether you want to live a de natured life on a de natured planet Key Updates in the Second Edition Covers the worsening environmental situation due to actions of the Trump administration including withdrawal from the Paris Agreement and from the U N Framework Convention on Climate Change Includes information on legislation in key U S states e g California and New York aimed to ameliorate the damage done at the federal level Increases coverage of group knowledge group agreement and disagreement and group action in collective environmental ethics as distinguished from

individual knowledge and action Examines the deleterious effects of online consumer behavior Explains how a loss of solidarity among a nation s citizens and even a larger solidarity among humanity leads to environmental degradation Offers new analysis of the effects of epistemic bubbles echo chambers and fake news on the behavior of voters and consumers Provides an extended critique of the Anthropocene Epoch and the prospect of geo engineering Earth to become a synthetic environment *Zen Buddhism and Environmental Ethics* Simon P. James,2017-03-02 Zen Buddhism and Environmental Ethics explores the implications of Zen Buddhist teachings and practices for our moral relations with the natural world At once an accessible introduction to Zen and an important contribution to the debate concerning the environmental implications of the tradition this book will appeal both to readers unfamiliar with East Asian thought and to those well versed in the field In elucidating the philosophical implications of Zen the author draws upon both Eastern and Western philosophy situating the Zen understanding of nature within the Buddhist tradition as well as relating it to the ideas of key Western philosophers such as Aristotle Kant and Heidegger These philosophical reflections on Zen are used to shed light on some prominent debates in contemporary environmental ethics concerning such issues as the intrinsic value of nature

Sustainable food production and ethics Werner Zollitsch,Christoph Winckler,Susanne Waiblinger,Alexander Haslberger,2023-08-28 Sustainability has become an issue widely debated in many countries Given the central role of food supply and the emotional relationship that modern mankind still has to its food sustainability is seen as a value which has to be maintained throughout food supply chains The complexity of modern food systems invokes a variety of ethical implications which emerge from contrasts between ideals perceptions and the conditions of technical processes within food systems and the concerns connected to this This book covers a broad range of aspects within the general issue of sustainable food production and ethics Linking different academic disciplines topics range from reflections about the roots of sustainability and the development of concepts and approaches to globalisation and resilience of food systems as well as specific ethical aspects of organic farming and animal welfare Modern technologies which are intensely advocated by certain stakeholder groups and their societal challenges are addressed as are many other specific cases of food production and processing consumer perception and marketing *Duties Regarding Nature* Toby Svoboda,2015-06-26 In this book Toby Svoboda develops and defends a Kantian environmental virtue ethic challenging the widely held view that Kant s moral philosophy has little to offer environmental ethics On the contrary Svoboda contends that on Kantian grounds there is good moral reason to care about non human organisms in their own right and to value their flourishing independently of human interests since doing so is constitutive of certain environmental virtues Svoboda argues that Kant s account of indirect duties regarding nature can ground a compelling environmental ethic the Kantian duty to develop morally virtuous dispositions strictly proscribes unnecessarily harming organisms and it also gives us moral reason to act in ways that benefit such organisms Svoboda s account engages the recent literature on environmental virtue including Rosalind Hursthouse Philip Cafaro Ronald

Sandler Thomas Hill and Louke van Wensveen and provides an original argument for an environmental ethic firmly rooted in Kant's moral philosophy

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity's place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues

Rachel Carson , Highwood N P presents a profile of American biologist and author Rachel Louise Carson 1907 1964 as part of the GirlSite resource The resource also offers access to additional information

African Environmental Ethics Munamoto Chemhuru, 2019-05-30 This book focuses on under explored and often neglected issues in contemporary African environmental philosophy and ethics Critical issues such as the moral status of nature African conceptions of animal moral status and rights African conceptions of environmental justice African relational Environmentalism ubuntu African theocentric and teleological environmentalism are addressed in this book It is unique in so far as it goes beyond the generalized focus on African metaphysics and African ethics by exploring how these views might be understood differently in order to conceptualize African environmental ethics Against the background where environmental problems such as pollution climate change extinction of flora and fauna and global warming are plain to see it becomes useful to examine how African conceptions of environmental ethics could be understood in order to confront some of these problems facing the whole world This book will be of value to undergraduate students graduate students and academics working in the area of African Philosophy African Environmental Ethics and Global Ethics in general

True North Mark Liederbach, Seth Bible, 2012-11-01 Because the Bible describes the second person of the Trinity as the key agent in creation redemption and the restoration of all things it is imperative that Christians seeking conformity to the image of Christ root their understanding of and motivation for creation care in a theology and ethic that seeks to maximize the worship of Christ throughout all creation Discussions related to creation care and environmental ethics have become both politically charged and highly controversial Unfortunately while a growing number of Christian books address various aspects of creation care that either support or deny the reality of global warming or perhaps advocate various policies and practices there is very little work available seeking to focus on clarify and establish the biblical and theological foundations upon which Christians

ought to care for God's world. Even more specifically, there seems to be almost a complete dearth of accessible works in theology or ethics that offers a Christology of creation care. Thus the purpose of *True North* is to explore the person and work of Christ in creation, redemption, and the restoration of all things, so as to establish the idea that caring for God's creation depends not upon prognostications for or against a global warming crisis. Rather, the motivation for Christians to care for creation flows from the created purposes established in the very fabric of the universe: faithful discipleship in Christ and the inherent goal to return to God all the glory he is due from every corner and aspect of creation.

The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07. Set at the intersection of political theory and environmental politics, yet with broad engagement across the environmental social sciences and humanities, *The Oxford Handbook of Environmental Political Theory* defines, illustrates, and challenges the field of environmental political theory (EPT). Featuring contributions from distinguished political scientists working in this field, this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches. The initial volume focuses on EPT as a field of inquiry, engaging both traditions of political thought and the academy. In the second section, the handbook explores conceptualizations of nature and the environment, as well as the nature of political subjects, communities, and boundaries within our environments. A third section addresses the values that motivate environmental theorists, including justice, responsibility, rights, limits, and flourishing, and the potential conflicts that can emerge within, between, and against these ideals. The final section examines the primary structures that constrain or enable the achievement of environmental ends, as well as theorizations of environmental movements, citizenship, and the potential for on-going environmental action and change.

Handbook of Environmental Political Theory in the Anthropocene Amanda Machin, Marcel Wissenburg, 2025-03-12. This Handbook provides a comprehensive overview of the transforming landscape of environmental political theory. Embracing both classical and marginalised approaches in the field, it demonstrates the central role of political theory in rethinking the strategies, discourses, and imaginaries of the Anthropocene epoch. This title contains one or more Open Access chapters.

The Oxford Handbook of Environmental Ethics Stephen Mark Gardiner, Allen Thompson, 2017. We live during a crucial period of human history on Earth. Anthropogenic environmental changes are occurring on global scales at unprecedented rates. Despite a long history of environmental intervention, never before has the collective impact of human behaviors threatened all of the major bio-systems on the planet. Decisions we make today will have significant consequences for the basic conditions of all life into the indefinite future. What should we do? How should we behave? In what ways ought we to organize and respond? The future of the world as we know it depends on our actions today. A cutting-edge introduction to environmental ethics in a time of dramatic global environmental change, this collection contains forty-five newly commissioned articles with contributions from well-established experts and emerging voices in the field. Chapters are arranged in topical sections: social contexts, history, science, economics, law, and the Anthropocene, who or

what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future **A Case for**

Environmental Justice Edwin Etieyibo, 2022-11-28 Issues of the environment and its sustainability are linked to those of global warming climate change and loss of biodiversity This is so because there is a general consensus in the scientific community that the long term shift or alteration of temperature and weather patterns both locally and globally are the result of human activities not the least those of burning of fossil fuels deforestation agricultural practices land use changes pollution Accordingly questions of environmental justice arise because of the threat that anthropogenic climate change pose to our planet This book examines these issues using as its point of departure environmental justice where environmental justice is concerned with environmental sustainability and the equitable treatment and involvement of people of all races cultures incomes and educational levels in the development implementation and enforcement of environmental programs laws rules and policies The book discusses among other things the population and consumption debate with regard to resource depletion and loss of biodiversity problems of global policing of environmental pollution and greenhouse gas emissions by nation states in the context of the tragedy of the commons and possible solutions to some of these problems from African and Native American philosophies and worldviews **Environmental Ethics and Behavioural Change**

Benjamin Franks, Stuart Hanscomb, Sean Johnston, 2017-12-14 Environmental Ethics and Behavioural Change takes a practical approach to environmental ethics with a focus on its transformative potential for students professionals policy makers activists and concerned citizens Proposed solutions to issues such as climate change resource depletion and accelerating extinctions have included technological fixes national and international regulation and social marketing This volume examines the ethical features of a range of communication strategies and technological political and economic methods for promoting ecologically responsible practice in the face of these crises The central concern of the book is environmental behaviour change inspiring informing and catalysing reflective change in the reader and in their ability to influence others By making clear the forms of environmental ethics that exist and what each implies in terms of individual and social change the reader will be better able to formulate commit to articulate and promote a coherent position on how to understand and engage with environmental issues This is an essential companion to environmental ethics and philosophy courses as well as a great resource for professionals interested in practical approaches to environmental ethics It is also

excellent supplementary reading for environmental studies environmental politics and sustainable consumption courses

Environmental Ethics Readings In Theory And Application Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Environmental Ethics Readings In Theory And Application free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Environmental Ethics Readings In Theory And Application free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Environmental Ethics Readings In Theory And Application free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Environmental Ethics Readings In Theory And Application. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg,

Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Environmental Ethics Readings In Theory And Application any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Environmental Ethics Readings In Theory And Application Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Environmental Ethics Readings In Theory And Application is one of the best book in our library for free trial. We provide copy of Environmental Ethics Readings In Theory And Application in digital format, so the resources that you find are reliable.
