Staff,1997-04-02 **Sourcebook on Environmental Funds in Economies in Transition** Patrick Francis,Jürg Klarer,Nelly

Petkova,1999 *OECD Studies on Water Facilitating the Reform of Economic Instruments for Water Management in*

Georgia OECD,2018-03-15 This study assesses the use of economic instruments for water resources management in Georgia

and considers options for reform following the 2014 signature of an Association Agreement with the EU committing to

alignment with the EU s Water Framework Directive *Instruments of Change* Theodore Panayotou,2013-11-05

Instruments of Change examines the use of incentive systems and improved institutional arrangements to protect the

environment and conserve natural resources as a means towards sustainable development *Transnational Politics of the*

Environment Liliana B. Andonova,2003-11-21 A study of the effect of EU membership on Central and Eastern European

environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational*

Politics of the Environment Liliana Andonova examines the effect of the European Union EU on the environmental policies of

Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and

Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But

Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong

influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution

policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit

from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily

serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments

to implement environmental protection measures These differences in domestic interests greatly influence the course of

reforms and the adoption of EU standards *Transnational Politics of the Environment* challenges the current focus on

intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and

domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding

the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of

domestic and international environmental politics *OECD Environmental Performance Reviews: Denmark 2019*

OECD,2019-11-14 This is the third Environmental Performance Review of Denmark It evaluates progress towards sustainable

development and green growth with special features on waste materials management and the circular economy and

chemicals management Environmental Financing in Economies in Transition Jim McNicholas,2001 **Towards a**

National Circular Economy Strategy for Hungary OECD,2023-04-28 The growing demand for raw materials in the

Hungarian economy projected up to 2050 is expected to exert significant additional pressure on the environment putting the country at risk of missing important environmental goals and opportunities to strengthen the competitiveness and resilience of its economy Despite the notable progress in decoupling environmental pressures from economic activities over the past 20 years several challenges remain

Environmental Assessment in Developing and Transitional Countries Norman Lee, Clive George, 2013-06-10 Since the 1980s and especially since the Rio Earth Summit in 1992 there has been a substantial extension in the adoption and use of Environmental Assessment EA procedures in developing countries and countries in transition low and middle income countries However few existing texts in environmental assessment or development studies have reflected this trend sufficiently until this publication Divided into two main parts EA Principles Processes and Practice Country and Institutional Studies of EA Procedures and Practice This book explains the essentials of environmental impact association in the context of developing countries and assesses its importance to both developed and developing countries

Public Economics and the Environment in an Imperfect World Lans Bovenberg, Sijbren Cnossen, 2012-12-06 Growing populations and economies have increased the public's awareness that the world's environmental resources are finite The issues of global warming and the depletion of the ozone layer have given universal significance to what were once local and regional pollution problems What is evident from *Public Economics and the Environment in an Imperfect World* is that Coasian negotiations fail to internalize the costs of environmental degradation often calling for public intervention through the market mechanism In its consideration of such issues the book includes contributions on assessment problems institutional aspects the need for coordination and efficiency and distribution issues
