Environmental Groups In Politics The Resource Management Series:

Environmental Groups in Politics Philip Lowe, Jane Goyder, 1983 *New Models In Geography* Richard Peet, Nigel Thrift, 2013-10-11 First published in 1989 It seems such a long time ago another age yet it is a mere twenty odd years since the original *Models in Geography* was published It is an even shorter time since the first tentative steps were taken towards an alternative formulation of what might constitute a geographical perspective within the social sciences What came to be called the political economy perspective has progressed with remarkable speed and energy to generate its own framework of conceptualization and analysis its own questions and debates The papers in these two volumes are witness to the richness and range of the work which has developed over this relatively short period within the political economy approach Moreover from being a debate within an institutionally defined discipline of geography to introducing into that discipline ideas and discussions from the wider fields of philosophy and social science and the humanities more generally it has now flowered into a consistent part of enquiries that span the entire realm of social studies **Natural Resources** Judith Rees, 2017-10-19 In this book first published in 1990 Judith Rees considers the spatial distribution of resource availability development and consumption and the distribution of resource generated wealth and welfare Showing that there are no simple answers she analyses the complex interactions between economic forces administrative structures and political institutions This well structured text is essential reading for upper level students in geography environmental planning economics and resource management *The Greening of British Party Politics* Mike Robinson, 1992 This work based on over 60 interviews between 1986 and 1990 with politicians from each of the major British political parties is concerned with an examination of the environmentalism politics interface and how the major parties are responding in real terms to the environmental challenge

Planning and the Political Market Mark Pennington, 2000-09-01 Planning and the Political Market argues that the enthusiasm for planning as an essential component of environmental protection is misplaced Drawing on the experience of Britain and other Western democracies the author uses public choice theory to explore the practical experience of land use planning as an example of government failure The book opens by outlining the institutional focus of public choice theory examining the central questions of market and government failure and the theoretical case for government intervention in the environment Having explored the principal impacts of planning the book goes on to analyse the institutional structures which have produced these policy outcomes The analysis suggests that institutional incentives within the political market have frequently led to policies which favour special interest groups and public sector bureaucracy The book concludes with an assessment of the potential for a private property rights free market alternative to increase community involvement and access *The Everyday Politics of Resources* Nga Dao, 2025-05-15 The Everyday Politics of Resources explores the impact of development processes on the lives livelihoods and landscapes of the people of Northwest Vietnam Over the past two decades the homes and farms of hundreds of thousands of people have been appropriated to make way for dams rubber

plantations and mining operations While this development has enriched the state and private enterprises it has also resulted in widespread hardship impoverishment and long term environmental destruction Nga Dao draws on more than twenty years of on the ground research in the region to show how these developments have affected people in vastly uneven ways creating wealth and stability for some while dispossessing others Filled with poignant and sometimes angry narratives by those who have lost their land and traditional livelihoods as well as more triumphant stories from those who have prospered under the capitalist transformation of the region *The Everyday Politics of Resources* is a timely urgent examination of modernization s benefits and costs *Countryside Recreation, Access and Land Use Planning* Dr N R Curry,N. Curry,2005-07-28 In this book Nigel Curry gives a full critical appraisal of policies and plans for countryside recreation and proposes in the context of rural restructuring as a whole a range of new directions for policy that will better serve the needs of both the public and the countryside to the turn of the century *Environmental Politics in Japan, Germany, and the United States* Miranda A. Schreurs,2003-03-13 A decade of climate change negotiations almost ended in failure because of the different policy approaches of the industrialized states Japan Germany and the United States exemplify the deep divisions that exist among states in their approaches to environmental protection Germany is following what could be called the green social welfare state approach to environmental protection which is increasingly guided by what is known as the precautionary principle In contrast the US is increasingly leaning away from the use of environmental regulations towards the use of market based mechanisms to control pollution and cost benefit analysis to determine when environmental protection should take precedence over economic activities Internal political divisions mean that Japan sits uneasily between these two approaches Miranda A Schreurs uses a variety of case studies to explore why these different policy approaches emerged and what their implications are examining the differing ideas actors and institutions in each state **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles *Comparative Environmental Politics* Paul F. Steinberg, Stacy D. Vandever,2012-02-17 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems How do different societies respond politically to environmental problems around the globe Answering this question requires systematic cross national comparisons of political institutions regulatory styles and state society relations The field of comparative environmental politics approaches this task by bringing the theoretical tools of comparative politics to bear on the substantive concerns of environmental policy This book outlines a comparative environmental politics framework and applies it to concrete real world problems of politics and environmental management After a comprehensive review of the literature exploring domestic environmental politics around the world the book provides a sample of major currents within the field showing how environmental politics intersects with such topics as the greening of the state the rise of social movements and green parties European Union expansion corporate social responsibility federalism political instability

management of local commons and policymaking under democratic and authoritarian regimes It offers fresh insights into environmental problems ranging from climate change to water scarcity and the disappearance of tropical forests and it examines actions by state and nonstate actors at levels from the local to the continental The book will help scholars and policymakers make sense of how environmental issues and politics are connected around the globe and is ideal for use in upper level undergraduate and graduate courses
