Environmental Health Risk IV C. A. Brebbia, 2007

Health problems related to the environment have become a major source of concern all over the world The health of the population depends upon good quality air water soil food and many other factors The aim of society is to establish measures that can eliminate or considerably reduce factors hazardous to the human environment to minimize the associated health risks The ability to achieve these objectives is greatly dependant on the development of suitable experimental modelling and interpretive techniques which allow a balanced assessment of the risk involved as well as suggesting ways in which the situation can be improved The interaction between environmental risk and health is often complex and can involve a variety of social occupational and lifestyle factors This emphasizes the importance of considering an interdisciplinary approach Containing papers presented at the Fourth International Conference on The Impact of Environmental Factors on Health The topics discussed will be of interest to a wide readership including health specialists in government and industry as well as researchers involved within the broad area of environmental health risk Featured topics include Risk Analysis Air Pollution Water quality issues Electromagnetic Fields Food contamination Occupational Health Remediation Social and Economic Issues Housing and Health Radiation Fields Education and Training Accident and man made risks

Islam, Oil, and Geopolitics Elizabeth Van Wie Davis, Rouben Azizian, 2007 Since the tragic events of September 11 Central Asia has been

drawn into the intense struggle of the international community against the forces of religious extremism and transnational crime. The great powers were able to put aside their geopolitical differences in order to crush al Qaeda and the Taliban. With the marginalization of the Taliban and the eviction of al Qaeda from Afghanistan, however, the tension between the great powers is notably increasing, as is the discomfort of Central Asian states who find themselves their political development and their oil reserves in the middle of a renewed Great Game. Islam, Oil, and Geopolitics is a truly international volume including chapters written by senior scholars, upcoming students in the field, prominent diplomats, and renowned academics from Russia, China, the United States, and the Central Asian republics. They collaborate to focus on three important issues that are usually and unfortunately analyzed separately: Islamic political issues, energy security, and geopolitical maneuvering. Once an obscure and little known region, Central Asia has become an important test of America's ability to consistently promote global liberal change, of Russia's true foreign policy agenda, and of China's readiness to translate economic power into political influence. Terrorism, economics, and politics all converge in this strategic region with important implications for Asia and the world. This significant and timely volume helps readers understand current events in Central Asia and how those events affect the rest of the world.

Contributions by Kamoludin Abdullaev, Rouben Azizian, Gaye Christoffersen, Elizabeth Van Wie Davis, Feng Shaolei, Pan Guang, Shireen Hunter, Alisher Khamidov, Mikhail A. Konarovskiy, Najibullah Lafraie, Murat Laumulin, Sergey I. Lounev, Aleksei V. Malashenko, Orhon Myadar, Manabu Shimizu, Thomas W. Simons Jr., Robert Smith, Sergei Trough, Kang Wu, and Shi Yinhong.

The Aral Sea, Philip Micklin, N.V. Aladin, Igor Plotnikov, 2013-11-22. The book is structured into six core parts. The first part sets the scene and explains how the use of Aral basin water resources, primarily used for irrigation, have destroyed the Aral Sea. The team explains how spheres and events interact and the related problems. Part 2 examines the social consequences of the ecological catastrophe and the affect of the Aral Sea desiccation on cultural and economic conditions of the near Aral region. Part 3 explores the scientific causes of the destruction using detailed analyses and data, plus some of their own research spanning aquatic biology, terrestrial biology, hydrology, water management, and biodiversity. They also share some of the latest archaeological discoveries and paleobotanical analysis to delineate past levels and characteristics of the Aral Sea. There is particular focus on modern remote sensing and GIS techniques and how they can monitor the Aral Sea and the environment. Part 4 discusses regional and international initiatives to mitigate human and ecological problems of the Aral Sea and the wider political and economic consequences. With thorough insight of the total environment cost, the final chapters of the book will provide lessons for the future. There are insightful case studies throughout. Multidisciplinary by nature, all titles in our new reference book series will explore significant changes within the Earth's ecosystems and to some extent, and will tackle ways to think about our changing environment.

A Survey of Health Reform in Central Asia, Jeni Klugman, George Schieber, Timothy E. Heleniak, 1996-01-01. World Bank Technical Paper No. 352. Six years into the transition from planned to market economies in Central and Eastern Europe, high

unemployment rates including a growing proportion of the long term unemployed represent a serious challenge to social welfare systems and policymakers This paper analyzes labor market development in nine transition countries of the region by focusing on the dynamics of labor force behavior employment and unemployment The countries include Bulgaria Croatia the Czech Republic the Former Yugoslav Republic of Macedonia Hungary Poland Romania the Slovak Republic and Slovenia

Disposal of Hazardous Waste in Underground Mines V. Popov,Viktor Popov,Roland Pusch,2006 This book contains the results of a three year research programme by a joint team of experts from four different EU countries The main focus of this research was on investigating the possibility of using abandoned underground mines for the disposal of hazardous chemical waste with negligible pollution of the environment The contributors address many aspects that are common to underground disposal of nuclear waste such as the properties and behaviour of waste isolating clay materials and practical ways of preparing and applying them development of tools software to assess the stability performance transport of contaminants inside and outside the repository and risks associated with different repository concepts considering the long term safety of the biosphere Information is also included on the selection of site location design and construction of repositories predicting degrees of contamination of groundwater in the surroundings estimation of isolating capacity of reference repositories cost estimation of this approach in comparison with some other approaches and many other relevant issues Invaluable to researchers and engineers working in the field of hazardous chemical waste disposal this title will also significantly aid experts dealing with nuclear waste

Environmental Crises in Central Asia Eric Freedman,Mark Neuzil,2015-10-23 Environmental conditions do not exist in a vacuum They are influenced by science politics history public policy culture economics public attitudes and competing priorities as well as past human decisions In the case of Central Asia such Soviet era decisions include irrigation systems and physical infrastructure that are now crumbling mine tailings that leach pollutants into soil and groundwater and abandoned factories that are physically decrepit and contaminated with toxic chemicals Environmental Crises in Central Asia highlights major environmental challenges confronting the region s former Soviet republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan They include threats to the Caspian and Aral seas the impact of climate change on glaciers desertification deforestation destruction of habitat and biodiversity radioactive and hazardous wastes water quality and supply energy exploration and development pesticides and food security and environmental health The ramifications of these challenges cross national borders and may affect economic political and cultural relationships on a vast geographic scale At the same time the region s five governments have demonstrated little resolve to address these complex challenges This book is a valuable multi disciplinary resource for academics scholars and policymakers in environmental sciences geography political science natural resources mass communications public health and economics

Europe and Central Asia Regional Overview of Food Security and Nutrition 2024 Food and Agriculture Organization of the United Nations,IFAD; UNECE; UNICEF; WHO and WMO,2025-04-01 This report provides the

latest updates on hunger food insecurity and malnutrition in Europe and Central Asia including the cost and affordability of healthy diets It also explores the central theme of water security highlighting its critical connections to agriculture food security and nutrition While the region has made progress in reducing hunger and food insecurity SDG Target 2.1 challenges remain in eliminating all forms of malnutrition SDG Target 2.2 Food insecurity and malnutrition persist in some countries influenced by income levels socioeconomic factors and climate risks In 2023 global undernourishment remained at 9.1 percent whereas the region has stayed below 2.5 percent since 2005 except in Central Asia 3 percent in 2023 and marginally higher in 2022 Food insecurity affected 11.5 percent of the population in 2023 well below the global average 28.9 percent Many countries have reduced child stunting wasting and low birthweight but childhood overweight anaemia in women aged 15-49 and adult obesity remain concerns In 2022 64.3 million people in the region couldn't afford a healthy diet though numbers have declined after the pandemic At 16.3 percent Central Asia had the highest unaffordability rate Water security challenges including scarcity ageing infrastructure pollution and weak governance affect Central Asia the Caucasus and the Western Balkans Poor water sanitation and hygiene infrastructure in some areas impacts nutrition and health The report recommends improving water conservation and recycling and exploring the use of alternative sources such as desalination and groundwater Strengthening transboundary cooperation and promoting sustainable water management are crucial Reducing agriculture's water footprint through efficient crop choices can enhance climate resilience and long term water sustainability

contribution to social science scholarship on climate change and decarbonization in Central Asia Topics include decarbonization opportunities carbon pricing instruments the geo economics of the energy transition the relationship between human mobility and climate change The book thus offers valuable insights for both academics and policymakers

Implementing Health Sector Reform in Central Asia Zuzana Feachem, Martin Hensher, Laura Rose, 1999 It is easy for reformers and their overseas advisers to develop conceptually strong plans for health sector reform that appeal to governments donors and academics Transforming these plans into successful action has proved to be extremely difficult Toward the goal of improving assistance to this sector the Economic Development Institute EDI of the World Bank held a seminar in Ashgabat Turkmenistan in June 1996 This publication provides a summary of the proceedings and papers presented at that seminar It was attended by delegations from five countries in Central Asia and from Azerbaijan and Mongolia The content of this volume emphasizes topics central to the restructuring of health sector financing and health care delivery systems at a time of transition to market economies and to democracy Maintaining and improving the health status of the population while preventing rapid escalation of health care expenditure were the recurrent themes throughout the seminar

Environmental Problems in East-Central Europe Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth's resources

Water and Security in Central Asia Virpi Stucki, Kai Wegerich, Muhammad Mizanur Rahaman, Olli Varis, 2016-04-08 Examining the water development and security linkages in Central Asia can feel a bit like solving a Rubik's cube The Rubik's cube starts to usually find structure and the

different pieces find their places when its solver adopts a systematic approach Still solving the whole cube takes time and perseverance This is also the case with water and security in Central Asia as demonstrated by the chapters in this book In the case of water and security in Central Asia there are many faces including not only the Central Asian states but also the neighbouring countries and other players of global geopolitics stickers such as policies practices causes and impacts and colours such as the different stakeholders ranging from the micro and meso levels to the macro level Understanding all these or getting clarity on the nexus can seem extremely challenging Even though none of the chapters alone answers the question of what constitutes water and security in Central Asia each of them gives thoughtful ideas and information on the complexity of the issue This book was published as a special issue of the International Journal of Water Resources Development
