Environmental Impacts Of Macroeconomic And Sectoral Policies:

Environmental Impacts of Macroeconomic and Sectoral Policies Mohan Munasinghe, International Society for Ecological Economics, 1996-01-01 The importance of violence as a contributory factor to urban poverty in Jamaica has gone largely unresearched This paper outlines the results of a study undertaken by the World Bank and the government of Jamaica to focus on the issue The study uses a participatory urban appraisal methodology in five poor urban areas mainly in Kingston to identify and understand local community perceptions of four different aspects of violence its causes its interrelationship with poverty its impact on employment economic and social infrastructure and local social institutions and ways in which government communities households and individuals can work to reduce it **Economic, Environmental and Health**

Consequences of Conservation Capital Ramesh Chandra Das, 2023-08-26 This book tackles the oft ignored role of conservation capital in mainstream discussions in maintaining sustainable development of a country in particular and the world economy in general A continuous increase in global temperature trends climate change and other related factors has compelled academicians from natural as well as social sciences to reorient classical thought from high growth through large resource extraction to sustainable growth through lower extraction This leads one to the important role of generation of conservation capital to satisfy long term growth and development objectives of economies This book covers studies on the related issues of conservation capital environmental crisis and health impacts from the perspectives of different countries The highlight is inclusion of some studies on the impact of environmental degradation in relation to COVID 19 pandemic The book coaxes policy makers to rethink on the optimum use of environmental resources for economic and social activities The broad coverage of studies included from different regions across the globe ensures that the book finds a wide readership among students and researchers from economics and other social sciences and natural sciences along with policy makers intent on forming policies leading to a more sustainable growth model *Macroeconomic Policies for Sustainable Growth*

Mohan Munasinghe, 2006-05-25 The state of the art studies in this volume are to be warmly welcomed The authors successfully explore the economic environmental and social consequences of policy failures and identify practical corrective measures Charles Perrings President International Society for Ecological Economics ISEE Macroeconomic policies have come under justifiable scrutiny because of their powerful and pervasive impacts throughout the economy This book examines the sustainability of growth oriented macroeconomic strategies starting from early ideas linking macroeconomic policies growth and sustainability A comprehensive and up to date literature review and theoretical framework are presented including both macroeconomic and microeconomic analyses of the linkages between the economy and the environment

Handbook of Development Policy Studies Gedeon M. Mudacumura, M. Shamsul Haque, 2004-04-23 Considering the current challenges to human progress this reference book examines recent theories policies and sectoral priorities as well as various social economic and administrative factors that impact worldwide modernization and development The book

emphasizes the fact that communities must evaluate continuously and adjust their program Sustainability in the Twenty-First Century Mohan Munasinghe, 2019-05-23 Provides a rigorous analysis of sustainable development that includes practical policy relevant global case studies explained concisely and clearly Cross-sectoral Policy Impacts Between Forestry and Other Sectors Food and Agriculture Organization of the United Nations, 2003-01-01 This publication considers the importance of developing cross sectoral links between sustainable forest management and other economic sectors in order to help establish effective national policy frameworks and implementation It includes a CD ROM which contains country case studies on Brazil Italy Mali Mexico Romania Tanzania and Thailand as well as the proceedings of a FAO technical meeting held in Rome in September 2002 **Sustainability, growth, and poverty alleviation** Stephen A. Vosti, Thomas Anthony Reardon, 2007-01-01 Developing countries are under pressure to produce more food for their growing populations conserve natural resources and reduce poverty In the short term however these goals may compete with one another This book focuses on the interactions between agricultural growth and environment and between environment and poverty The chapters analyze and illustrate these interactions with case study evidence from the developing world in general and from specific agroclimatic zones in Africa Asia and Latin America The contributors also discuss what these links mean for development policies agricultural technologies and social and economic institutions With a clearer picture of how these goals interact policymakers and researchers can design strategies for working more effectively to meet them

Macroeconomics and the Environment Mr. Ved P. Gandhi, 1996-06-14 Microeconomic policies dealing with individual industries and economic sectors have traditionally addressed environmental concerns but increasingly the environment is being viewed in terms of the macro economy To improve its understanding of the interrelationship between macroeconomics and the environment the IMF held a seminar in May 1995 at which recognized experts from academic and research institutions nongovernmental organizations and staff from the World Bank and the IMF shared their views on how macroeconomic policies affect the environment and how environmental policies affect the macro economy The present volume edited by Ved P Gandhi contains the papers and proceedings of this seminar **The Economics of Soil Productivity in Sub-Saharan Africa** Food and Agriculture Organization of the United Nations, 2001-01-01 This study examines the current and potential role of economics in soil productivity in sub Saharan Africa After examining the status of soil productivity and the contribution of conventional economic analyses it considers more innovative approaches that enable economics to play a greater role in the planning and evaluation of soil productivity enhancing measures at farm national and global level In the past economics has tended to focus on one factor at a time but many factors affect soil productivity Decisions policies and their impact call for a more integrative participatory analytical approaches capable of weighing various aspects simultaneously This study highlights how economics can respond to this challenge through the application of fresh concepts e g natural capital and specific techniques e g multi criteria analysis green accounting *Economic*

Development and Environmental Sustainability Ramón López, Michael A. Toman, 2006-06-29 Economic growth as we know it today cannot persist indefinitely if it entails continuous degradation of natural resources and the environment While in a few countries around the world it appears that environmental degradation has been the result of rapid economic growth in the vast majority of the developing countries the environment has been equally spoiled despite slow or even negative economic growth This book provides new insights on the common roots of economic stagnation poverty and environmental degradation which unfortunately generally reside in misguided government policies and priorities By doing this the volume seeks to provide a broader policy option framework than those found in conventional policy analyses mainly dominated by the Washington Consensus It shows that a major omission of the conventional view is that governments tend to allocate government expenditures in a biased way favouring subsidies to the economic elites to the detriment of investments in public goods including human capital R D as well as the development of institutions environmental and otherwise which are vital for long run growth poverty reduction and environmental sustainability

Environmental Economics and Sustainable Development Mohan Munasinghe, 1993-01-01 The Discount Rate Freer Trade, Sustainability, and the Primary Production Sector in the Southern EU: Unraveling the Evidence from Greece J. Lekakis, 2013-03-09 Freer Trade Sustainability and the Primary Production Sector in the Southern European Union is the first full scale academic work to capture the primary production sector policy aspects of trade liberalization and sustainability with a detailed focus on a typical southern EU country Greece Many efforts were pooled together in making this book In May 1996 the Department of Economics of the University of Crete organized an international conference on European Agriculture in the light of the recent WTO agreement and the need for sustainable development The conference was sponsored by the European Commission DG XII contract no ENV4 CT 96 6514 the Economic and Social Research Council ESRC contract no L320263049 the Hellenic Ministries for Agriculture and for the Environment and the University of Crete While summarizing the conclusions of the conference several speakers felt that the issues relating to the Southern EU would deserve separate coverage The conference directors judged that coverage of the issues for a single Southern EU country might have an advantage regarding detail over a cross country analysis which would certainly be welcome at a later stage Responding to this call the University of Crete generously reallocated all of its infrastructural costs covered by DG XII ESRC and the other sponsors above in the form of a new grant to host a follow up conference aiming to explore the issues for Greece

Indonesia, 1994-01-01 Indonesia has been remarkably successful in achieving its development objectives over the past 25 years Although it is still a low income country its tradition of sound economic management has laid the foundations for continued progress in the decades ahead As the Indonesian government formulates its second long term development plan issues of environmental quality and sustainability raise new concerns This report examines environmental issues assesses their implications for the achievement of development goals and suggests an action plan that would help to ensure that those

goals will be met The analysis of current environmental conditions and trends and of the likely impact of future growth leads to three main conclusions Future growth will depend increasingly on Indonesia s stock of key natural resources and the sustainability of critical ecosystems The industrial sector will continue to expand in urban areas where growing congestion and industrial pollution pose an immediate threat to health and human welfare This will eventually lead to negative effects on the economy As a result of rapid growth environment related issues of equity among the population will become increasingly important

Environmental Health James A. Listorti, Fadi M. Doumani, 2001-01-01 Environmental health remains at the periphery of sustainable development because it is inadequately defined and institutionally fragmented This publication aims to provide ways of addressing this multisectoral problem It is in three parts The first looks at harmonising sectoral priorities and shows that environmental health can target at least as much disease as the health sector The second part provides environmental health assessment guidelines The third part looks at the results of a pilot project to put theory into practice in Ghana

Macroeconomics and the Environment Mohan Munasinghe, 2002 Sustainable development is a concept that is receiving increasing attention from world decision makers This timely volume contains a selection of both the seminal papers and a cross section of current thinking It will be invaluable to researchers students and practitioners interested in this important topic Part I presents early articles linking the macroeconomy with the environment Part II contains general surveys of the relationship between economic growth and environmental degradation Included in Part III are papers with mathematical models seeking to incorporate environmental variables into macroeconomic frameworks Part IV focuses on the linkages between international trade and the environment The final section examines progress on the greening of the system of national accounts an important prerequisite for environmental macroeconomic policy making

The Earthscan Reader in Environmental Economics Anil Markandya, 2017-10-03 Environmental economics may hold the key to the successful management of the world s accelerating environmental problems from transport and pollution to the wholesale degradation of much of the Third World climate change and loss of the ozone layer Increasingly a range of professionals and policy makers as well as environmentalists and the economists themselves are turning to it to show how to arrive at decisions on these complicated and vital issues This reader brings together the most important contributions to the subject Sections of it cover the theoretical issues the different ways of valuing the environment economic instruments of environmental policy environment and development and global environmental problems An extensive introduction by the editors maps out the area and the development of the arguments within it As a whole the volume makes an indispensable sourcebook for those in any way involved with these questions Anil markandya is one of the authors of *Blueprint for a Green Economy* and *Blueprint 2 Greening the Global Economy*

The Greening of Economic Policy Reform Jeremy J. Warford, Mohan Munasinghe, Wilfredo Cruz, 1997 This report in two volumes addresses environmental impacts stemming from economy wide policy reforms and seeks to clarify the nature of the economic physical institutional and cultural aspects of their relationship Volume 1

summarizes the case studies and synthesizes their key principles Volume 2 explores the case studies in full length They reflect a wide range of country situations and environmental problems Pollution issues are addressed such as air quality and energy use in Poland and Sri Lanka while a variety of natural resource related issues are covered in the other studies deforestation and land degradation in Costa Rica migration and deforestation in the Philippines agricultural land degradation due to overgrazing in Tunisia fertility losses due to extension of cultivation areas in Ghana water resource depletion in Morocco and wildlife management in Zimbabwe The case studies also use a variety of analytical methods to illustrate the different approaches to identifying the environmental implications of economy wide reforms These methods range from tracing the links between economic incentives and resource use through direct observation to relying on more complex economic modeling of policies and their environmental effects In all the studies however the analytical approach uniformly requires identifying key environmental concerns and relating them to the agenda of priority sectoral and macroeconomic reforms

Twenty-first Century Macroeconomics Jonathan M. Harris, Neva R. Goodwin, 2009 The likely economic effects of climate change and the cost of action to avert it are important public policy issues but according to the editors both of the Global Development and Environment Institute Tufts U they also raise fundamental questions about economic analysis and move issues of environmental policy from the microeconomic to the macroeconomic level They therefore present 13 papers addressing the connections between climate change and macroeconomics Opening chapters address fundamental issues of the likely global economic impact of climate change the debate over the economics of climate change as presented in a special 2006 issue of the Stern Review that was commissioned by the government of the UK the place of the climate change debate in the context of broader issues of equitable and sustainable development and a proposed system for allocating carbon emissions reduction requirements The next four chapters present macroeconomic theory perspectives that address issues of energy productivity labor productivity sustainable development consumption and investment Remaining contributions explore policy options including the new European emissions trading scheme

The Economics of Nature and the Nature of Economics Cutler J. Cleveland, David I. Stern, Robert Costanza, 2001-01-01 The writing style is clear and sophisticated and the quality of production high Steve Harrison Economic Analysis and Policy what we have in this anthropology is a very readable collection of well written articles which explore the limits of both conventional economic theory and new approaches For a general reader involved in sustainable development the book is a good compilation of current approaches The style and technical level in the articles makes this book usable at levels from undergraduate university through the governmental sectors Its broad range and readable style makes the collection a good working reference volume Edward J Linky Natural Resources Forum This book discusses important recent developments in the theory concepts and empirical applications of ecological economics and sustainable development The editors have assembled a fascinating collection of papers from some of the leading scholars in the field of ecological economics Topics covered include

the contribution of classical economics to ecological economics alternatives to the growth paradigm and Gross Domestic Product valuation in ecological economics and indicators of natural resource scarcity case studies of sustainable development critical reviews of the environmental Kuznets curve green national accounting This will be an invaluable text for scholars policy analysts and students interested in sustainable development and ecological environmental and resource economics
