Environmental Information:

Environmental Information Systems Oliver Günther, 2013-03-09 Environmental information systems EIS are concerned with the management of data about the soil the water the air and the species in the world around us This first textbook on the topic gives a conceptual framework for EIS by structuring the data flow into 4 phases data capture storage analysis and metadata management This flow corresponds to a complex aggregation process gradually transforming the incoming raw data into concise documents suitable for high level decision support All relevant concepts are covered including statistical classification data fusion uncertainty management knowledge based systems GIS spatial databases multidimensional access methods object oriented databases simulation models and Internet based information management Several case studies present EIS in practice Environmental Information Management And Analysis W K Michener, J W

Brunt, S G Stafford, 1994-08-08 Most environmental studies are based upon data collected at fine spatial scales plots sediments cores etc Furthermore temporal scales of these studies have been relatively short days weeks months and few studies have exceeded three years duration the typical funding cycle Despite this history environmental scientists are now being called **Environment, Information and Consumer Behaviour** Signe Krarup, Clifford S. Russell, 2005-01-01 Over the past decade there has been growing interest in the role of information in the promotion of environmentally friendly behaviour This book examines how and why the provision of such information can affect individual decisions concerning buying or consuming a product or valuing a policy The information can take the form of a product label or a statement in a survey questionnaire and the decision can be what product to buy what food to eat or how to answer a contingent valuation question The chapters in this volume carefully explore the explanations for consumer behaviour in different scenarios where information is provided about the public implications of individual decisions The first set of chapters examines the prospects for eco labelling as a tool of environmental policy from a variety of different perspectives They also look at how this form of information provision compares with more familiar policy instruments in achieving efficiency goals In the second and third sections the focus is on environmental and food labelling in which a combination of private and public motives for purchase decisions is found Finally the role of information in contingent valuation surveys is considered in particular the impact of information and time in altering stated value responses **Environmental Information Systems in Industry and Public**

Administration Rautenstrauch, Claus, Patig, Susanne, 2000-07-01 Environmental Information Systems in Industry and Public Administration provides an overview of worldwide research and development of environmental information systems ENVIS This book is the only topical documentation of the highly innovative approach of information systems for environmental protection Issues are covered from the global and multinational level to industrial solutions for enterprises In particular the book deals with protection of air water and soil urban and landscape developments prevention of environmental hazards and waste management **Consumer Perceptions, Understanding and Use of Product Related Environmental**

Information Nordisk Ministerråd, 2004 Product related environmental information is an important policy instrument for a shift towards more sustainable consumption patterns and such information helps consumers choose environmentally improved products While ecolabeling has had a particularly strong breakthrough in Nordic markets a number of other communication modes such as environmental product declarations and producers self declared claims have been applied in both the consumer and business to business markets This report comprises a summary of recent research on how Nordic consumers perceive understand and use product related environmental information A comprehensive literature review supplemented with expert interviews forms the foundation for this work The report highlights well researched areas and proposes areas where deeper knowledge and understanding is required The research was conducted cooperatively between the International Institute for Industrial Environmental Economics IIIEE at Lund University in Sweden the National Consumer Research Centre in Finland and Environice in Iceland with the purpose to obtain and present a comprehensive picture of the situation in the Nordic countries [Access to Environmental Information in Uganda](#) Christoph Schwarte, 2008

The Right of Access to Environmental Information Sean Whittaker, 2021-11-18 The book discusses the normative impact of the Aarhus Convention on how England America and China guarantees the right of access to environmental information Through this analysis the book identifies each of these jurisdictions unique conceptualisations of the right which in turn influences the design of their respective environmental information regimes This allows these jurisdictions potentially to act as sources of legal reforms for each other to improve how the right is guaranteed via legal transplant theory challenging the normativity of the Aarhus Convention This is not to suggest that the Aarhus Convention exerts no normative influence on how the right is guaranteed there are core substantive and core procedural elements which have to be met for the right to be effectively guaranteed and the book shows that the Aarhus Convention does exert a normative influence over the procedural elements of the right **Private Sector Environmental Information and the Law** Juliana Zuluaga

Madrid, 2023-07-28 Current advancements in civil rights and environmental activism emphasize the crucial importance of making environmental information widely available to the public regardless of whether it is in the hands of the government or of corporations especially when the information is needed to understand and prevent risks for human health and the environment In the wake of a resurgence of environmental and civil rights activism conflicts flare between the right of the people to know and the right of private actors to keep certain information hidden mostly for commercial reasons This book offers a detailed comparative analysis of how environmental information is being accessed in different countries and jurisdictions and how these issues are currently being handled by judges and governments Focusing on the right of access to environmental information held and produced by private actors and the legal issues that emerge when other values and rights are compromised this book offers an alternative framework to improve on current legal systems suggesting a more nuanced and balanced approach that takes both set of interests duly into consideration Providing an integrated approach to

public environmental law and private commercial law the book integrates the arguments from both sides to establish a common ground defining shared principles and models that provide a solid basis for a robust new system Reviewing access to private sector information at a truly international level this book will be relevant to students academics and practitioners working in these areas *Deficits in EU and US Mandatory Environmental Information Disclosure* Dirk Büniger, 2011-10-20

It is the publicity about the Pollutant Release Inventory's data which creates an incentive for firms to achieve emission reductions Accordingly public access to environmental information constitutes a core characteristic of the aforementioned inventory Here in essence two facets arise First with regard to the collection it is disputed whether such information which may comprise confidential commercial and industrial information in the EU as well as trade secrets in the US can be protected under fundamental and constitutional property rights respectively Second in the context of dissemination and utilisation it is arguable whether the information indeed impacts polluters and produces an outcome that secures a certain level of environmental protection The author responds to the first issue by taking the EU and US jurisdictions into account and strives to analyse how this novel form of Internet disclosure liberates market mechanisms in the quest for effective and efficient emission reductions *An Introduction to Scientific Research Methods in Geography and Environmental Studies* Daniel Montello, Paul Sutton, 2012-12-10 Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation From chapters on the scientific method and fundamental research concepts to experimental design sampling and statistical analysis the text offers an excellent introduction to the key concepts of geographical research The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters Joseph Mallalieu School of Geography Leeds University Montello and Sutton is one of the best texts I've used in seminars on research methodology The text offers a clear balance of quantitative vs qualitative and physical vs human which I've found particularly valuable The chapters on research ethics scientific communication information technologies and data visualization are excellent Kenneth E Foote Department of Geography University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research covering both geography and environmental studies Written for undergraduate and postgraduate students it Explains both the conceptual and the technical aspects of research as well as all phases of the research process Combines approaches in physical geography and environmental science human geography and human environment relations and geographic and environmental information techniques such as GIS cartography and remote sensing Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography environmental studies and related disciplines such as planning and earth science **Information Systems and**

the Environment National Academy of Engineering, 2001-08-27 Information technology is a powerful tool for meeting environmental objectives and promoting sustainable development This collection of papers by leaders in industry government and academia explores how information technology can improve environmental performance by individual firms collaborations among firms and collaborations among firms government agencies and academia Information systems can also be used by nonprofit organizations and the government to inform the public about broad environmental issues and environmental conditions in their neighborhoods Several papers address the challenges to information management posed by the explosive increase in information and knowledge about environmental issues and potential solutions including determining what information is environmentally relevant and how it can be used in decision making In addition case studies are described and show how industry is using information systems to ensure sustainable development and meet environmental standards The book also includes examples from the public sector showing how governments use information knowledge systems to disseminate best practices beyond big firms to small businesses and from the world of the Internet showing how knowledge is shared among environmental advocates and the general public

Environmental Law in Norway Hans Christian Bugge, 2018-03-27 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Norway A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Norway Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy

Access to Environmental Justice Andrew Harding, 2007 Although it is commonly asserted that enhanced citizen participation results in better environmental policy and improved enforcement of environmental standards this hypothesis has rarely been subject to testing on a comparative basis The contributors to this book set out to study the extent to which citizens can and do exert influence over their urban environments through the legal and extra legal gateways in eleven countries spanning several continents as well as different climates levels and type of economic development and national legal and constitutional systems as well as exhibiting a

different set of environmental problems One interviewee questioned about access to environmental justice dryly remarked that in his city there was no environment no justice and no access to either Yet this view as will be seen requires to be nuanced While few people will be surprised by the finding that legal gateways to environmental justice are largely ineffective the reasons for this are revealing but also the richness of detail and the comparisons between the different countries and also the positive aspects which surfaced in several instances were indeed both encouraging and sometimes surprising This book presents the first comparative survey of access to environmental justice and will be of considerable use to lawyers policy makers activists and scholars who are concerned with the environmental issues which so profoundly affect and afflict our habitat and conditions of social justice throughout the world

Transboundary Environmental Negotiation

Lawrence Susskind,William Moomaw,Kevin Gallagher,2002-10-08 Transboundary Environmental Negotiation is an important collection of articles generated by faculty and graduate students at MIT the Fletcher School of Law and Diplomacy at Tufts University and the Program on Negotiation at Harvard Law School The contributors emphasize the ways in which global environmental treaty making can be improved They highlight new environmental problems that pose difficult global negotiation challenges and suggest new strategies for involving a range of nongovernmental actors in ways that can overcome the obstacles to transboundary environmentalism

Enforcement of European Union Environmental Law

Martin Hedemann-Robinson,2007-03-12 Offering a detailed legal account of the various legal arrangements at EU level this book is an ideal reference tool for practitioners and legal scholars As well as examining the principle sources of EU environmental law enforcement it also contributes to the legal and political debates that surround the subject Spanning three parts the author examines and assesses the practical impact of the legal arrangements at EU level that are used for the purpose of upholding EU environmental norms Providing a comprehensive account of the current state of EU environmental law enforcement and developments affecting it Enforcing European Union Environmental Law focuses on the principal sources of EU environmental law enforcement examining the role of the European Commission the possibilities for private law enforcement the responsibilities of Member State national authorities An essential read for those studying researching and working in the areas of environmental and European Union law
