reformation of British society it particularly affected the working classes As each chapter reveals in detail this form of environmental inequality or classism drew sharply critical reactions from figures as diverse as Thomas Carlyle Friedrich Engels Charles Dickens and John Ruskin and from within the Chartist movement as working class writers themselves reacted to the hazardous realities of a divided society But as this book also reveals these writers recognised that a truly just society respects the needs of the nonhuman and takes account of the material world in all its own aliveness even if only tentatively they reached for a more inclusive emergent form of justice that might address the social and ecological impacts of industrial modernity an idea which is no less relevant today This book represents an indispensable resource for scholars and students working in the fields of Victorian literature environmental justice and ecocriticism An Integrated Approach to Environmental Management Dibyendu Sarkar, Rupali Datta, Avinandan Mukherjee, Robyn Hannigan, 2015-09-30 Covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management Provides an up to date survey of the field from the perspective of different disciplines Covers the topic of environmental management from multiple perspectives namely natural sciences engineering business social sciences and methods and tools perspectives Combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains Explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process Chapter contents are appropriately demonstrated with numerous pictures charts graphs and tables and accompanied by a detailed reference list for further readings Environmental Justice in Ethnic American Literature Petr Kopecký, Jan Beneš, 2024-12-15 Environmental Justice in Ethnic American Literature focuses on a wide range of conceptions depictions and issues of environmental in justice found in African American Latinx Asian American and American Indian literature to provide a panorama of ethnic peoples regions and cultures affected by disproportionate exposure to environmental hazards and racial discrimination now exacerbated by the effects of climate change Specifically the volume highlights the capacity of literature and literary criticism to help uncover the causes and consequences of instances of environmental injustice and their impact The chapters analyze a diverse selection of voices and texts which underscore how the literary imagination of ethnic American writers captures in contrast with official statistics impersonal data and the reports compiled from them the tangible and often inescapable problems of communities struggling against environmental racism The issues addressed in the volume range from slow violence transcorporeality food and reproductive justice to agrarianism while utilizing theoretical lenses such as ecofeminist paradigms or innovative applications of ecolinguistic methods to poetry Overall the monograph brings to the fore a diversity of literary responses to environmental racism and calls for environmental justice New Perspectives on Environmental Justice Rachel Stein, 2004-06-25 Women make up the vast majority of activists and organizers of grassroots movements fighting against environmental ills that

Douglas Vakoch, Sam Mickey, 2017-07-06 Women and Nature Beyond Dualism in Gender Body and Environment provides a historical context for understanding the contested relationships between women and nature and it articulates strategies for moving beyond the dualistic theories and practices that often frame those relationships In 1974 Fran oise d Eaubonne coined the term ecofeminism to raise awareness about interconnections between women s oppression and nature s domination in an attempt to liberate women and nature from subordination Since then ecofeminism has attracted scholars and activists from various disciplines and positions to assess the relationship between the cultural human and the natural non human through gender reconsiderations. The contributors to this volume present critical and constructive perspectives on ecofeminism throughout its history from the beginnings of ecofeminism in the 1970s through to contemporary and emerging developments in the field drawing on animal studies postcolonialism film studies transgender studies and political ecology This interdisciplinary and international collection of essays demonstrates the ongoing relevance of ecofeminism as a way of understanding and responding to the complex interactions between genders bodies and the natural environment It will be of great interest to students and scholars of ecofeminism as well as those involved in environmental studies and gender studies Beyond Nature's Housekeepers Nancy C. V. Reed, 2019-01-22 A second edition of the classic introduction to arts in social movements fully updated and now including Black Lives Matter Occupy Wall Street and new

digital and social media forms of cultural resistance The Art of Protest first published in 2006 was hailed as an essential introduction to progressive social movements in the United States and praised for its fluid writing style and well informed and insightful contribution Choice Magazine Now thoroughly revised and updated this new edition of TV Reed's acclaimed work offers engaging accounts of ten key progressive movements in postwar America from the African American struggle for civil rights beginning in the 1950s to Occupy Wall Street and Black Lives Matter in the twenty first century Reed focuses on the artistic activities of these movements as a lively way to frame progressive social change and its cultural legacies civil rights freedom songs the street drama of the Black Panthers revolutionary murals of the Chicano movement poetry in women s movements the American Indian Movement s use of film and video anti apartheid rock music ACT UP s visual art digital arts in Occupy Black Lives Matter rap videos and more Through the kaleidoscopic lens of artistic expression Reed reveals how activism profoundly shapes popular cultural forms For students and scholars of social change and those seeking to counter reactionary efforts to turn back the clock on social equality and justice the new edition of The Art of Protest will be both informative and inspiring Critical Realism, Environmental Learning and Social-Ecological Change Leigh Price, Heila Lotz-Sistka, 2015-12-14 Southern Africa where most of these book chapters originate has been identified as one of regions of the world most at risk of the consequences of environmental degradation and climate change At the same time it is still seeking ways to overcome the century long ravages of colonial and apartheid impositions of structural and epistemic violence Research deliberations and applied research case studies in environmental education and activism from this region provide an emerging contextualized engagement that is related to a wider internationally articulated quest to achieve social ecological justice resilience and sustainability through educational interventions. This book introduces a decade of mainly southern African critical realist environmental education research and thinking that asks the question How can we facilitate learning processes that will lead to the flourishing of the Earth's people and ecosystems in more socially just ways The environmental education research topics represented in this book are wide ranging However they all exhibit the common theme of social justice and wanting to create change towards a better future All the authors have used critical realist or critical realist influenced research methodologies Offering contributions from a small but growing community of researchers working with critical realism in the global South this book will be of interest to students scholars and practitioners in the areas of environmental education sustainability development and the philosophy of critical realism in general
