writing from an internationally diverse range of well known experts in the field of global environmental governance Innovative thinking and high profile expertise come together to create a volume that is accessible to students scholars and practitioners alike The Age of Ecology Joachim Radkau,2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time Acting Locally Christopher Rootes,2013-10-18 Local campaigns are the most persistent and ubiquitous forms of environmental contention National and transnational mobilisations come and go and the attention they receive from mass media ebbs and flows but local campaigns persist The persistence or re emergence of local campaigns is also a reminder that it remain possible to mobilise people around environmental issues and they have often served as sources of innovation in and re invigoration of national organisations that have allegedly been co opted by the powerful and incorporated into the established political and administrative system But local environmental campaigns have been relatively neglected in the scientific literature Drawing on examples from Britain France Greece Ireland and Italy this book seeks to redress that neglect by examining the networks among actors and organisations that connect local mobilizations to the larger environmental movement and political systems the ways in which local disputes are framed in order to connect with national and global issues and the persistent impacts of the peculiarities of place upon environmental campaigns This book was previously published as a special issue of Environmental Politics **Environment and Politics** Timothy Doyle,Doug McEachern,2007-08-31 Concise introduction to the study of environmental politics explaining the key concepts conflicts political systems and the practices of policy making A diverse range of environmental problems and policy solutions are examined **Crucible for Survival** Timothy Doyle,Melissa Risely,2008 In this collection Timothy Doyle and Melissa Risely bring together an international group of environmentalists political scientists and international relations scholars to address key issues vital to determining the human and environmental security of the Indian Ocean Region Addressing topics that include agrifood production systems the geopolitics of water resources along the Mekong River basin oil production transportation waste disposal and climate change the contributors highlight the importance of regional
