Environmental Philosophy:

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues

Environmental Philosophy Christopher Belshaw, 2001-10-01 Beginning with an overview of current concerns Belshaw locates our attitudes toward the environment within their cultural and historical milieu He then examines the various positions in detail ranging from the moderate view that we ought to consider not only ourselves but also other animals to the seemingly more extravagant contention that non sentient life rocks deserts B indeed all of the processes of nature B should be considered intrinsically valuable In later chapters Belshaw explores the importance of an aesthetic response to the environment opening the way for a human centred position that is both more generous and more flexible than those often advanced elsewhere In contrast to many of its competitors Environmental Philosophy challenges accepted dichotomies B man nature instrumental intrinsic green non green B and advocates conciliation rather than confrontation Although the arguments are rigorous the writing is clear and non technical making Environmental Philosophy an excellent survey for those engaging with these issues for the first time as well as offering much to challenge the more advanced student

A World Not Made for Us Keith R. Peterson, 2020-09-01 In A World Not Made for Us Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity

Thinking Like a Mall Steven Vogel, 2015-05 A provocative argument

that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature as Bill McKibben and other environmental thinkers have declared what is there left to protect In Thinking like a Mall Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it

A Companion to Environmental Philosophy Dale Jamieson, 2008-04-15 A Companion to Environmental Philosophy is a pioneering work in the burgeoning field of environmental philosophy This ground breaking volume contains thirty six original articles exemplifying the rich diversity of scholarship in this field Contains thirty six original articles written by international scholars Traces the roots of environmental philosophy through the exploration of cultural traditions from around the world Brings environmental philosophy into conversation with other fields and disciplines such as literature economics ecology and law Discusses environmental problems that stimulate current debates *Beyond the Land Ethic* J. Baird Callicott, University Distinguished Research Professor J Baird Callicott, 1999-01-01 A leading theorist addresses a wide spectrum of topics central to the field of environmental philosophy **Environmental Philosophy** Robin Attfield, 1994 These 16 essays in environmental philosophy throw light on our traditions of environmental thinking and on its principles and applications **Environmental Philosophy and Environmental Activism** Don E. Marietta, Lester Embree, 1995-09-06 This collection of new essays by eleven distinguished environmental philosophers addresses two main questions first whether environmental philosophy and ethics should be seen as a form of applied philosophy or as something else perhaps best called practical philosophy and second how environmental philosophy is practiced in human life especially in the lives of academics

Skeptical Environmentalism Robert Joseph Kirkman, 2002-02-01 In Skeptical Environmentalism Robert Kirkman raises doubts about the speculative tendencies elaborated in environmental ethics deep ecology social ecology postmodern ecology ecofeminism and environmental pragmatism Drawing on skeptical principles introduced by David Hume Kirkman takes issue with key tenets of speculative environmentalism namely that the natural world is fundamentally relational that humans have a moral obligation to protect the order of nature and that understanding

the relationship between nature and humankind holds the key to solving the environmental crisis Engaging the work of Kant Hegel Descartes Rousseau and Heidegger among others Kirkman reveals the relational worldview as an unreliable basis for knowledge and truth claims and more dangerously as harmful to the intellectual sources from which it takes inspiration Exploring such themes as the way knowledge about nature is formulated what characterizes an ecological worldview how environmental worldviews become established and how we find our place in nature Skeptical Environmentalism advocates a shift away from the philosopher s privileged position as truth seeker toward a more practical thinking that balances conflicts between values and worldviews Environmental Philosophy Don S. Mannison, Michael A. McRobbie, Richard Sylvan, 1980

In Defense of the Land Ethic J. Baird Callicott, 1989-02-09 In Defense of the Land Ethic Essays in Environmental Philosophy brings into a single volume J Baird Callicott s decade long effort to articulate defend and extend the seminal environmental philosophy of Aldo Leopold A leading voice in this new field Callicott sounds the depths of the proverbial iceberg the tip of which is The Land Ethic The Land Ethic Callicott argues is traceable to the moral psychology of David Hume and Charles Darwin s classical account of the origin and evolution of Hume s moral sentiments Leopold adds an ecological vision of organic nature to these foundations How can an evolutionary and ecological environmental ethic bridge the gap between is and ought How may wholes species ecosystems and the biosphere itself be the direct objects of moral concern How may the intrinsic value of nonhuman natural entities and nature as a whole be justified In addition to confronting and resolving these distinctly philosophical queries Callicott engages in lively debate with proponents of animal liberation and rights finally to achieve an integrated theory of animal welfare and environmental ethics He critically discusses the land ethic that is alleged to have prevailed among traditional American Indian peoples and points toward a new and equally revolutionary environmental aesthetic **Japanese Environmental Philosophy** J. Baird Callicott, James McRae, 2017-05-01 Japanese Environmental Philosophy is an anthology that responds to the environmental problems of the 21st century by drawing from Japanese philosophical traditions to investigate our relationships with other humans nonhuman animals and the environment It contains chapters from fifteen top scholars from Japan the United States and Europe The essays cover a broad range of Japanese thought including Zen Buddhism Shintoism the Kyoto School Japanese art and aesthetics and traditional Japanese culture **Philosophy, Technology, and the Environment** David M.

Kaplan, 2017-03-03 Contributions by prominent scholars examining the intersections of environmental philosophy and philosophy of technology Environmental philosophy and philosophy of technology have taken divergent paths despite their common interest in examining human modification of the natural world Yet philosophers from each field have a lot to contribute to the other Environmental issues inevitably involve technologies and technologies inevitably have environmental impacts In this book prominent scholars from both fields illuminate the intersections of environmental philosophy and philosophy of technology offering the beginnings of a rich new hybrid discourse All the contributors share the intuition that

technology and the environment overlap in ways that are relevant in both philosophical and practical terms They consider such issues as the limits of technological interventions in the natural world whether a concern for the environment can be designed into things how consumerism relates us to artifacts and environments and how food and animal agriculture raise questions about both culture and nature They discuss among other topics the pessimism and dystopianism shared by environmentalists environmental philosophers and philosophers of technology the ethics of geoengineering and climate change the biological analogy at the heart of industrial ecology green products and sustainable design and agriculture as a bridge between technology and the environment Contributors Braden Allenby Raymond Anthony Philip Brey J Baird Callicott Brett Clark Wyatt Galusky Ryan Gunderson Benjamin Hale Clare Heyward Don Idhe Mark Sagoff Julian Savulescu Paul B Thompson Ibo van de Poel Zhang Wei Kyle Powys Whyte Environment and Philosophy Emily Brady, with Jane Howarth, Vernon Pratt, 2005-07-26 Environment and Philosophy provides an accessible introduction to the radical challenges that environmentalism poses to concepts that have become almost second nature in the modern world These include the ideas of science and objectivity the conventional placement of the human being within the environment the individualism of conventional Modern thought Written in an accessible way for those without a background in philosophy this text examines ways of thinking about ourselves nature and our relationship with nature It offers an introduction to the phenomenological perspective on environmental issues and also to the questions of what natural beauty is Understanding Environmental Philosophy Andrew Brennan, Y.S. Lo, 2014-12-05 Environmental philosophy is one of the exciting new fields of philosophy to emerge in the last forty years Understanding Environmental Philosophy presents a comprehensive critical analysis of contemporary philosophical approaches to current ecological concerns Key ideas are explained placed in their broader cultural religious historical political and philosophical context and their environmental policy implications are outlined Central ideas and concepts about environmental value individual wellbeing ecological holism and the metaphysics of nature set the stage for a discussion of how to establish moral rules and priorities and whether it is possible to transcend human centred views of the world The reader is also helped with an annotated guide to further reading questions for discussion and revision as well as boxed studies highlighting key concepts and theoretical material A clear and accessible introduction to this most dynamic of subjects Understanding Environmental Philosophy will be invaluable for a wide range of readers

Grounding Knowledge Christopher J. Preston, 2010-01-25 He asks what these ideas in contemporary epistemology and environmental philosophy mean for environmental policy concluding that the grounding of knowledge strongly suggests epistemic reasons for the protection of a full range of physical environments in their natural condition BOOK JACKET
