Manaster, 2007-01      **Environmental Health Perspectives**, 1993      *Environmental Law, Crime, and Justice* Ronald G. Burns, Michael J. Lynch, Paul Stretesky, 2008

Environmental harms associated with pollution of the air land and water kill and injure more people than street crime on an annual and daily basis Financially the losses associated with environmental damage are enormous Environmental Law Crime and Justice addresses these issues through providing an introduction to the study of environmental issues pertinent to the study of environmental crime contemporary environmental law environmental policy and environmental justice This book blends together areas that are often treated or studied individually or in isolation from one another Designed for classroom use Environmental Law Crime and Justice exposes readers to the variety of issues involved in the study of environmental law crime and justice illustrates the serious nature of these problems and demonstrates how readers can and should become involved in studying environmental crime law and crime BOOK JACKET      Searching the Law, 3d Edition Frank Bae, Edward Bander, Francis Doyle, Joel Fishman, Paul Richert, 2021-12-13      **Law and Ecology** Richard O. Brooks, Ross Jones, 2017-07-05

In 1970 Earth Day was first celebrated marking the dawn of worldwide environmental consciousness and the passing of many environmental laws In part these events were the result of the maturing of the science of ecology which recognized the interdependence of the web and cycles of nature This volume explores the relationship between ecology and environmental law beginning with a description of the two very different disciplines This description is followed by a history of their episodic interactions the early period of origin the mid century formative period from 1950 to 1970 the initial serious period of interaction after Earth Day in 1970 and the testing of the relationship during the next two decades Utilizing a number of case studies examinations of the key linkage persons legal instruments and the migration of ecological concepts and frameworks this book analyzes the final flowering of an ecosystem regime which embraces the connections between the two disciplines of ecology and environmental law Concluding with an inventory of the problems posed by the relationship between the two disciplines and an agenda for future research this clearly structured comprehensive and stringent book is an essential resource for all serious scholars and students of ecology and environmental law      *Failed Promises* David M. Konisky, 2015-03-27 A systematic evaluation of the implementation of the federal government s environmental justice policies In the 1970s and 1980s the U S Congress passed a series of laws that were milestones in environmental protection including the Clean Air Act and the Clean Water Act But by the 1990s it was clear that environmental benefits were not evenly distributed and that poor and minority communities bore disproportionate environmental burdens The Clinton administration put these concerns on the environmental policy agenda most notably with a 1994 executive order that called on federal agencies to consider environmental justice issues whenever appropriate This volume offers the first systematic empirically

based evaluation of the effectiveness of the federal government's environmental justice policies. The contributors consider three overlapping aspects of environmental justice: distributive justice or the equitable distribution of environmental burdens and benefits; procedural justice or the fairness of the decision making process itself; and corrective justice or the fairness of punishment and compensation. Focusing on the central role of the Environmental Protection Agency, they discuss such topics as facility permitting, rulemaking, participatory processes, bias in enforcement, and the role of the courts in redressing environmental injustices. Taken together, the contributions suggest that despite recent environmental justice initiatives from the Obama administration, the federal government has largely failed to deliver on its promises of environmental justice.

Contributors: Dorothy M. Daley, Eileen Gauna, Elizabeth Gross, David M. Konisky, Douglas S. Noonan, Tony G. Reames, Christopher Reenock, Ronald J. Shadbegian, Paul Stretesky, Ann Wolverton.

**Environmental Crime and Restorative Justice** Mark Hamilton, 2021-03-01. This book explores the use of restorative justice approaches in the context of environmental crimes. It critically assesses regular criminal justice approaches with regard to green crimes and explores restorative justice conferencing as an alternative. Focussing on justice approaches in Australia and New Zealand, it argues that court processes following environmental offending provide minimal to no offender and victim voice interaction and input, rendering them invisible. It proposes a third measure of justice: that of meaningful involvement beyond that of fair procedure and outcome. It suggests the use of restorative justice conferencing: a facilitated dialogue between stakeholders to crime or conflict as a vehicle to operationalise and achieve justice as meaningful involvement. This book speaks to those interested in green criminology, victimology, and environmental law.

*Environmental Governance Reconsidered, second edition* Robert F. Durant, Daniel J. Fiorino, Rosemary O'Leary, 2017-08-25. Key topics in the ongoing evolution of environmental governance with new and updated material. This survey of current issues and controversies in environmental policy and management is unique in its thematic mix, broad coverage of key debates, and in-depth analysis. The contributing authors, all distinguished scholars or practitioners, offer a comprehensive examination of key topics in the continuing evolution of environmental governance with perspectives from public policy, public administration, political science, international relations, sustainability theory, environmental economics, risk analysis, and democratic theory. The second edition of this popular reader has been thoroughly revised with updated coverage and new topics. The emphasis has shifted from sustainability to include sustainable cities, from domestic civic environmentalism to global civil society, and from global interdependence to the evolution of institutions of global environmental governance. A general focus on devolution of authority in the United States has been sharpened to address the specifics of contested federalism and fracking, and the treatment of flexibility now explores the specifics of regulatory innovation and change. New chapters join original topics such as environmental justice and collaboration and conflict resolution to address highly salient and timely topics: energy security, risk assessment, communication, and technology innovation, regulation by revelation, and retrospective regulatory analysis. The topics are organized and integrated by the book.

s 3R framework reconceptualizing governance to reflect ecological risks and interdependencies better reconnecting with stakeholders and reframing administrative rationality Extensive cross references pull the chapters together A broad reference list enables readers to pursue topics further Contributors Regina S Axelrod Robert F Durant Kirk Emerson Daniel J Fiorino Anne J Kantel David M Konisky Michael E Kraft Jennifer Kuzma Richard Morgenstern Tina Nabatchi Rosemary O Leary Barry Rabe Walter A Rosenbaum Stacy D VanDeveer Paul Wapner

*Federal Antitrust Law* Daniel J. Gifford, Leo J. Raskind, 2002 The first chapter of this book provides an historical review of antitrust law in terms of the political and economic ideas which have shaped it throughout its development In the successive chapters the authors provide a sense of the manner in which changes in the underlying economic analysis have shaped the application of the statutes by the enforcement agencies and the courts The authors have addressed the antitrust issues raised by recent changes in technology in the rise of global markets and in the structure of health care markets by devoting three separate chapters to Intellectual Property International Trade and Health Care Author Commentaries throughout the book are designed to probe the doctrinal and policy issues raised by the case excerpts In keeping with the objective of providing the economic analysis that may amplify and clarify the legal and policy issues the authors have also taken into account recent trends in the relevant economic literature Professors and adjunct professors may request complimentary examination copies of LexisNexis law school publications to consider for class adoption or recommendation Please identify the book s you wish to receive provide your institutional contact information and submit your request here

**The Lawyer's Craft** Cathy Glaser, 2002 For as long as legal writing courses have existed students have been given large quantities of information all at once They are then expected to digest it in one large gulp and to do it The Lawyer s Craft takes a different approach The authors of this innovative book take the specific skills required to write a memo or brief and divided them into discrete building blocks that can be more easily absorbed by students The approach to drafting legal documents is highly structured to enable students to see how different parts fit together Memos and briefs are divided into parts and organized into a required format The format also provides students with a checklist to consult when constructing legal documents The Lawyer s Craft recognizes that skills must be practiced to be learned No matter how carefully students read the text and discuss it in class they will not be able to learn the material until they actually put it to work For this reason The Lawyer s Craft includes numerous examples and exercises The level of difficulty of the examples and exercises is gradually increased allowing students to master the basics before moving on to nuances and exceptions A Teacher s Manual is available to professors
