Environmental State Under Pressure:

The Environmental State Under Pressure Arthur P. J. Mol, Frederick H. Buttel, 2002-04-18 In the 1980s the ideologies of deregulation and privatization formed the start of the debate on the environmental state and the 1990s left the debate facing new challenges This text examines the processes transformations and continuities related to the topic **State and Environment** Andreas Duit, 2014-05-30 This volume of comparative studies documents the continuing relevance of the state in environmental politics and policy The book also demonstrates the analytical power of the comparative approach to the study of environmental politics and policy offering cross national comparisons of environmental governance in both developed and developing countries Some chapters are based on qualitative studies from a small number of countries others offer statistical analyses of quantitative data from many more countries over a longer time period *The Green State in Africa* Carl Death, 2016-09-27 A provocative reassessment of the relationship between states and environmental politics in Africa From climate related risks such as crop failure and famine to longer term concerns about sustainable urbanization environmental justice and biodiversity conservation African states face a range of environmental issues As Carl Death demonstrates the ways in which they are addressing them have important political ramifications and challenge current understandings of green politics Death draws on almost a decade of research to reveal how central African environmental politics are to the transformation of African states **Ecological Modernisation and Japan** Brendan F.D. Barrett, 2005-04-28 In the 1990s Japan gradually began to turn green and started to experiment with more participatory forms of environmental governance Ecological Modernisation and Japan explores this transformation and looks at Japan as a case for ecological modernisation while contextualising the discussion within its unique history and recent discussions about globalisation and sustainability It makes a significant contribution to the ecological modernisation debate by unpacking the Japanese environmental experience **Governing Environmental Flows** Gert Spaargaren, A. P. J. Mol, Frederick H. Buttel, 2006 Lays the foundations for a new conceptualization of global environmental governance that draws on the flow perspective found in recent work in sociology **Policy Networks Under Pressure** Carsten Daugbjerg, 2018-11-09 First published in 1998 this book examines how established policy networks and the broader context within which they are embedded influence the choice of policy when change has been put on the agenda It criticises the existing network literature for being predominantly descriptive for having little to say on the choice of policy and for omitting the analysis of the broader political structures which have consequences for meso level policy making In order to reinforce the explanatory power of policy network analysis the book develops both a meso and a macro level theoretical model They help to explain why policy change is more radical in some settings than in others The theoretical arguments are tested by the use of detailed comparisons of agricultural policy making in Denmark and Sweden and of agricultural policy reforms in the European Union and Sweden Environmental Governance in Vietnam Stephan Ortmann, 2017-01-30 This book deals with

institutional reforms in response to a mounting environmental crisis in Vietnam The author introduces the reader to the most important environmental problems that Vietnam is currently facing and shows how the emphasis on economic growth has come at the expense of the natural environment Following an assessment of the still deteriorating environmental situation the book develops a theoretical framework of institutional change within the political system seeking to overcome the traditionally static understanding of institutions The empirical analysis devotes attention to the main aspects on Vietnam s environmental governance including the government society businesses and international organizations The book is based on four years of empirical research including interviews with government officials and representatives of international and national non governmental organizations observations of meetings official documents and numerous Vietnamese newspaper reports This book is directed both at academics students as well as development practitioners and activists It seeks to engage those working in the fields of environmental politics governance and institutional change in one party states

The Political Prospects of a Sustainability Transformation

Daniel Hausknost, Marit Hammond, 2021-06-14 Half a century ago many democratic states started to respond to environmental pressures that had arisen in the wake of rapid industrialization They set up environmental ministries and agencies and issued legislation to control the pollution of air and water and to manage industrial processes wastes and toxic substances This was the birth of the environmental state With planetary ecological challenges like climate change spiraling out of control and dwarfing the environmental state's classical tasks of environmental management new questions about the transformative capacities of the state are becoming acute today How large is the state's capability to transform enhanced industrial societies into sustainable post carbon societies Do its new environmental functions empower the state to prioritise ecological goals over economic growth Can the state's environmental management capabilities be radicalised to turn it into a sustainability state Can democracies be enhanced to enlarge the state's transformative capacities The Political Prospects of a Sustainability Transformation Moving Beyond the Environmental State explores these and other questions from a variety of theoretical and empirical angles covering the fields of democratic theory theories of the state political economy political sociology rhetoric and political philosophy The chapters in this book were originally published as a special issue of the journal Environmental Politics

Transnational Identity Politics and the Environment Gabriel Ignatow, 2007-01-01 This study in global sociology argues that environmental activism today has taken on a hybrid transnational character in reaction to the retreat of the state and the political activism of transnational migrant communities The argument is illustrated with in depth case studies of contemporary environmental social movements in Turkey and Lithuania

Saving Ourselves Dana R. Fisher, 2024-02-13 We've known for decades that climate change is an existential crisis For just as long we've seen the complete failure of our institutions to rise to the challenge Governments have struggled to meet even modest goals Fossil fuel interests maintain a stranglehold on political and economic power Even though we have seen growing concern from everyday people civil society has succeeded only in pressuring decision makers to adopt watered down policies All the while the climate crisis worsens Is there any hope of achieving the systemic change we need Dana R Fisher argues that there is a realistic path forward for climate action but only through mass mobilization that responds to the growing severity and frequency of disastrous events She assesses the current state of affairs and shows why public policy and private sector efforts have been ineffective Spurred by this lack of progress climate activism has become increasingly confrontational Fisher examines the radical flank of the climate movement its emergence and growth its use of direct action and how it might evolve as the climate crisis worsens She considers when and how activism is most successful identifying the importance of creating community capitalizing on shocking moments and cultivating resilience Clear eyed yet optimistic Saving Ourselves offers timely insights on how social movements can take power back from deeply entrenched interests and open windows of opportunity for transformative climate action
